C. ABBREVIATIONS: CL- Classroom Learning, TL- Tutorial Learning, LL-Laboratory Learning,

SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment,

SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment **Legends:**

@ Internal Assessment, # External Assessment, *# On Line Examination, @\$ Internal Online Examination

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course, then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL) hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all 5 assignments here in tabular format)

D. i) RATIONAL:

Engineering graphics is the language of engineers. The concepts of graphical language are used in expressing the ideas, conveying the instructions, which are used in carrying out the jobs on the sites, shop floor etc. This course is useful in developing drafting and sketching skills in the student. It covers the knowledge & application of drawing instruments & also familiarizes the

learner about Bureau of Indian Standards related to engineering drawing. The curriculum aims at developing the ability to draw and read various engineering curves, projections and dimensioning styles. The subject mainly focuses on use of drawing instruments, developing imagination and translating ideas into sketches. The course also helps to develop the idea of visualizing the actual object or part on the basis of drawings and blue prints. This preliminary course aims at building a foundation for the further courses related to engineering drawing and other allied courses in coming semesters

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

Prepare simple engineering drawing manually using drawing instruments.

E. COURSE LEVEL LEARNING OUTCOMES (CO'S)

CCH106-1 Understand various fundamentals in engineering drawing.

CCH106-2 Produce different types of engineering curves.

CCH106-3 Produce the projection of point & lines inclined to one reference plane.

CCH106-4 Produce the projection of different planes.

CCH106-5 Produce orthographic drawing and sectional orthographic drawing from given pictorial view.

Competency, course outcomes and programme outcomes/programme specific outcomes (CP-CO-PO/PSO) matrix

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "0"]

F. CONTENT:

i) Practical exercises

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted in the *Drawing Hall for Engineering drawing* in practical sessions of batches of about 20- 22 students:

Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
1	Draw horizontal, vertical, 30-degree, 45 degrees, 60 & 75-degrees lines using Tee and Set squares/ drafter.	2	CO1
2	Draw different types of lines, dimensioning styles	2	CO1
3	Draw one figure showing dimensioning techniques, two problems on redraw the figures. (Sketch Book)	2	CO1
4	Draw one figure showing dimensioning techniques, two problems on redraw the figures and one problem on Scales. (01 Sheet)	4	CO1
5	Draw any four Engineering Curves (Sketchbook)	2	CO2
6	Draw any four Engineering Curves – (01 Sheet)	4	CO2
7	Draw any four problems on Line parallel to both the principal planes Line parallel to one principal planes & perpendicular to other Principal planes using first angle method of projection. (Sketchbook)	2	CO3 CO5
8	Draw any four problems on Line parallel to one principal plane & inclined to other principal planes using first angle method of projection - (01 Sheet)	4	CO3 CO5
9	Draw any four problems on Plane parallel to one principal plane & perpendicular to another Principal plane, Plane perpendicular to both the principal planes using first angle method of projection. (Sketchbook)	4	CO4 CO5
10	Draw any four problems on Plane inclined to one principal plane and perpendicular to other principal plane using first angle method of projection - (01 Sheet)	4	CO4 CO5
11	Draw two problems on orthographic projections using first angle method of projection having plain surfaces, slanting surfaces and slots etc.	2	CO5
12	Draw two problems on orthographic projections using first angle method of projection having cylindrical surfaces, ribs etc. (Sketchbook)	2	CO5

13	Draw two problems on orthographic projections using first angle method of projection having plain surfaces, slanting surfaces cylindrical surfaces, ribs and slots etc.- (01 Sheet)	2	CO5
14	Draw different types of sections of simple objects (Sketchbook)	2	CO5 CO6
15	Draw two problems on sections of solids having ribs, cylindrical surface etc. (01 Sheet)	4	CO5 CO6
16	Correlate ancient Indian sculptures, Indian temples, Monuments, etc. with Engineering Graphics. (IKS)	2	CO1 CO2 CO3 CO4 CO5 CO6

ii) THEORY

SECTION – I

Sr. No	Topics	Teaching (Hours)	Theory Evaluation Marks
<i>Course Outcome CCH106-1 Understand various fundamentals in engineering drawing</i>			
1.	INTRODUCTION TO ENGINEERING DRAWING 1.1 Drawing Instruments and their uses 1.2 Standard sizes of drawing sheets as per ISO-A series, Layout of sheet. 1.3 Letters and numbers (single stroke vertical) Convention of lines and their applications. 1.4 Scale (reduced, enlarged & full size) Plain scale and Diagonal scale. 1.5 Dimensioning technique as per SP-46 (Latest Edition), Elements of dimensioning, Types and applications of chain, parallel and Co-ordinate dimensioning	04	06
<i>Course Outcome CCH106-2 Produce different types of engineering curves</i>			
2.	ENGINEERING CURVES 2.1 Conic sections and their applications 2.2 Ellipse by Arc's of circle method & Concentric circles method. 2.3 Parabola by Directrix and focus method & Rectangle method 2.4 Hyperbola by Transverse Axis focus Method & Rectangular hyperbola (Inclined axes). 2.5 Involute of circle, & pentagon, hexagon 2.6 cycloid, epicycloids, hypocycloid 2.7 Helix & Archimedean spiral.	09	18

Course Outcome CCH106-3 Produce the projection of point & lines inclined to one reference plane			
3.	PROJECTION OF POINT AND LINES 3.1 Projection of points when point is in first quadrant only 3.2 Orientation of Line with respect to principal planes (Both ends of line should be in first quadrant) <ul style="list-style-type: none"> • Line parallel to both the principal planes • Line parallel to one principal planes & perpendicular to other Principal planes • Line parallel to one principal plane & inclined to other principal planes 	05	10

SECTION – II

Sr. No	Topics	Teaching (Hours)	Theory evaluation Marks
Course Outcome CCH106-4 Produce the projection of different planes.			
4.	PROJECTION OF PLANES 4.1 Types of Planes - Circular, Square, Triangular, Rectangular, Pentagonal, Hexagonal. 4.2 Orientation of plane with respect to principal planes (Planes in First Quadrant Only) – <ul style="list-style-type: none"> • Plane parallel to one principal planes & perpendicular to another Principal plane • Plane perpendicular to both the principal planes • Plane inclined to one principal plane and perpendicular to other principal plane 	03	10
Course Outcome CCH106-5 Produce orthographic drawing and sectional orthographic drawing from given pictorial view.			
5.	ORTHOGRAPHIC PROJECTIONS 5.1 Introduction to Orthographic Projections -First and Third angle Projection Method, their symbols 5.2 Conversion of Pictorial view into Orthographic Views. (First angle Projection Method Only)	05	14
Course Outcome CCH106-5 Produce orthographic drawing and sectional orthographic drawing from given pictorial view			
6.	SECTIONAL VIEWS 6.1 Types of sections 6.2 Conversion of pictorial view into sectional Orthographic views. (First Angle Projection Method only)	04	12
Total		30	70
1. Summative assessment – Theory paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.			

**** No questions will be asked on IKS learning subtopics in any question papers.**

G. SUGGESTED MICRO PROJECTS / ASSIGNMENTS/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING) UNDER SLA
- NOT APPLICABLE

H. SPECIFICATION TABLE FOR SETTING QUESTION PAPER FOR SEMESTER END THEORY EXAMINATION

Topic No.	Name of topic	Distribution of marks (Cognitive level-wise)			Course Outcome	Total Marks
		Remember	Understand	Application		
1	Introduction To Engineering Drawing	00	06	00	CCH106-1	06
2	Engineering curves	00	12	06	CCH106-2	18
3	Projection of Point and Lines	00	10	00	CCH106-3	10
4	Projection of Planes	00	00	10	CCH106-4	10
5	Orthographic Projection	00	00	14	CCH106-5	14
6	Sectional Views.	00	00	12	CCH106-5	12
	Total	00	28	42		70

I. Assessment Criteria

Formative Assessment of Practical: -

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
TOTAL		25

J. Instructional Methods:

- i) Lectures cum Demonstrations,
- ii) Class room practices.
- iii) Use of projector and soft material for demonstration

K. Teaching and Learning resources:

Chalk board, Power Point presentations and Demonstrative kits.

5. 1(one) credit is equivalent to 30 Notional hrs.
6. *Self learning hours shall not be reflected in the Time Table.

*Self learning includes micro project/ assignment/other activities.

D. i) RATIONALE:-

In any typical business setup in order to carry out routine tasks related to create business documents, perform data analysis and its graphical representations and making electronic slide show presentations, the student need to learn various software as office automation tools like word processing applications, spreadsheets and presentation tools. They also need to use these tools for making their project reports and presentations. The objective of this course is to develop the basic competency in students for using these office automation tools to accomplish the job. This course also presents an overview of emerging technologies so that students of different discipline can appraise the applications of these technologies in their respective domain.

ii) INDUSTRY/EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various teaching learning experiences: 1) Use computers for Internet services, Electronics Documentation, Data Analyze and Slide Presentation. 2) Appraise Application of ICT based Emerging Technologies in different domain

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CCH109-1 - Use computer system and its peripherals for given purpose

CCH109-2 - Prepare Business document using Word Processing Tool

CCH109-3 - Analyze Data and represent it graphically using Spreadsheet

CCH109-4 - Prepare professional Slide Show presentations

CCH109-5 – Illustrate the Use different types of Web Browsers, Apps and Emerging Technologies

F. CONTENT:

I) Practical exercises

The following practical exercises shall be conducted in the *Laboratory for Fundamentals of ICT developed* by the Institute in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	Identify various Input/output devices, connections and peripherals of computer system. Work with Computer System, Input/output devices, and peripherals for Manages files and folders for data storage.	CCH109-1
2	Create and manage word document. Apply formatting features on text at line, paragraph and page level.	CCH109-2
3	Insert and edit images, shapes in a document file	CCH109-2
4	Insert table and apply various table formatting features on it.	CCH109-2
5	Apply page layout features in word processing. Print a document by applying various print options. Use mail merge in word processing.	CCH109-2
6	Enter and format data in a worksheet. Insert and delete cells, rows and columns. Apply alignment feature on cell	CCH109-3

Sr. no	Laboratory experiences	CO
7	Create formula and “If” condition on cell data. Apply various functions and named ranges in worksheet.	CCH109-3
8	Implement data Sorting, Filtering and Data validation features in a worksheet.	CCH109-3
9	Create charts using various chart options in spreadsheet.	CCH109-3
10	Print the worksheet by applying various print options for worksheet.	CCH109-3
11	Apply design themes to the given presentation. Insert pictures text/images/shapes in slide. Use pictures text/images/shapes editing options.	CCH109-4
12	Add tables and charts in the slides. Run slide presentation in different Modes. Print slide presentation as handouts/notes.	CCH109-4
13	Apply animation effects to the text and slides. Add/set audio and video files in the presentation.	CCH109-4
14	Configure internet connection on a computer system. Use different web services on internet	CCH109-5
15	Configure different browser settings. Use browsers for the given purpose.	CCH109-5
16	Create web forms for survey using different options.	CCH109-6
17	Create web forms for Quiz using different options.	CCH109-6

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)
1	<p>Unit - I Introduction to Computer System</p> <p>1.1 Basics of Computer System: Overview Hardware and Software Block diagram of Computer System: Input/Output unit CPU, Control Unit, Arithmetic logic Unit (ALU), Memory Unit</p> <p>1.2 Internal components: processor, motherboards, random access memory (RAM), read-only memory (ROM), video cards, sound cards and internal hard disk drives)</p> <p>1.3 External Devices: Types of input/output devices, types of monitors, keyboards, mouse, printers: Dot matrix, Inkjet and LaserJet, plotter and scanner, external storage devices CD/DVD, Hard disk and pen drive</p> <p>1.4 Application Software: word processing, spreadsheet, database management systems, control software, measuring software, photo-editing software, video-editing software, graphics manipulation software System Software compilers, linkers, device drivers, operating system.</p> <p>1.5 Network environments: network interface cards, hubs, switches, routers and modems, concept of LAN, MAN, WAN, WLAN, Wi-Fi and Bluetooth</p> <p>1.6 Working with Operating Systems: Create and manage file and folders, Copy a file, renaming and deleting of files and folders, Searching files and folders, application installation, creating shortcut of application on the desktop.</p>	2

Sr. no.	Topics/Subtopics	Learning (Hours)
2	<p>Unit - II Word Processing</p> <p>2.1 Word Processing: Overview of Word processor Basics of Font type, size, colour, Effects like Bold, italic, underline, Subscript and superscript, Case changing options, Previewing a document, Saving a document, Closing a document and exiting application.</p> <p>2.2 Editing a Document: Navigate through a document, Scroll through text, Insert and delete text, Select text, Undo and redo commands, Use drag and drop to move text, Copy, cut and paste, Use the clipboard, Clear formatting, Format and align text, Formatting</p> <p>2.3 Changing the Layout of a Document: Adjust page margins, Change page orientation, Create headers and footers, Set and change indentations, Insert and clear tabs</p> <p>2.4 Inserting Elements to Word Documents: Insert and delete a page break, Insert page numbers, Insert the date and time, Insert special characters (symbols), Insert a picture from a file, Resize and reposition a picture</p> <p>2.5 Working with Tables: Insert a table, Convert a table to text, Navigate and select text in a table, Resize table cells, Align text in a table, Format a table, Insert and delete columns and rows, Borders and shading, Repeat table headings on subsequent page</p> <p>2.6 Working with Columned Layouts and Section Breaks: a Columns, Section breaks, Creating columns, Newsletter style columns, Changing part of a document layout or formatting, Remove section break, Add columns to remainder of a document, Column widths Adjust.</p>	3
3	<p>Unit - III Spreadsheets</p> <p>3.1 Working with Spreadsheets: Overview of workbook and worksheet, Create Worksheet Entering sample data, Save, Copy Worksheet, Delete Worksheet, Close and open Workbook.</p> <p>3.2 Editing Worksheet: Insert and select data, adjust row height and column width, delete, move data, insert rows and columns, Copy and Paste, Find and Replace, Spell Check, Zoom In-Out, Special Symbols, Insert Comments, Add Text Box, Undo Changes, - Freeze</p> <p>3.3 Formatting Cells and sheet: Setting Cell Type, Setting Fonts, Text options, Rotate Cells, Setting Colors, Text Alignments, Merge and Wrap, apply Borders and Shades, Sheet Options, Adjust Margins, Page Orientation, Header and Footer, Insert Page Breaks</p> <p>3.4 Working with Formula: Creating Formulas, Copying Formulas, Common spreadsheet Functions such as sum, average, min, max, date, In, And, or, mathematical functions such as sqrt, power, applying conditions using IF.</p> <p>3.5 Working with Charts: Introduction to charts, overview of different types of charts, Bar, Pie, Line charts, creating and editing charts. Using chart options: chart title, axis title, legend, data labels, Axes, grid lines, moving chart in a separate sheet.</p> <p>3.6 Advanced Operations: Conditional Formatting, Data Filtering, Data Sorting, Using Ranges, Data Validation, Adding Graphics,</p>	3

Sr. no.	Topics/Subtopics	Learning (Hours)
	Printing Worksheets, print area, margins, header, footer and other page setup options.	

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)
4	<p>Unit - IV Presentation Tool</p> <p>4.1 Creating a Presentation: Outline of an effective presentation, Identify the elements of the User Interface, Starting a New Presentation Files, Creating a Basic Presentation, Working with textboxes, Apply Character Formats, Format Paragraphs, View a Presentation.</p> <p>4.2 Inserting Media elements: Adding and Modifying Graphical Objects to a Presentation - Insert Images into a Presentation, insert audio clips, video/animation, Add Shapes, Add Visual Styles to Text in a Presentation, Edit Graphical Objects on a Slide, Format</p> <p>4.3 Working with Tables: Insert a Table in a Slide, Format Tables and Import Tables from Other Office Applications.</p> <p>4.4 Working with Charts: Insert Charts in a Slide, Modify a Chart, Import Charts from Other Office Applications.</p>	4
5	<p>Unit - V Basics of Internet and Emerging Technologies</p> <p>5.1 World Wide Web: Introduction, Internet, Intranet, Cloud, Web Sites, web pages, URL, web servers, basic settings of web browsers- history, extension, default page, default search engine, creating and retrieving bookmarks, Use of search engines.</p> <p>5.2 Web Services: e-Mail, Chat, Video Conferencing, e-learning, e-shopping, e-Reservation, e-Groups, Social Networking</p> <p>5.3 Emerging Technologies: IOT, AI and ML, Drone Technologies, 3D Printing.</p> <p>5.4 Tools: Docs, Drive, forms, quiz, Translate and other Apps</p>	3

**** No Questions will be asked on IKS learning subtopics in any question papers.**

G: List of Assignments under SLA
(Assignments Marked in * are compulsory)

Sr.No	List of Assignment (under SLA)	Hrs Allotted										
1*	Prepare a chart showing different generations of computer along with advantages & disadvantages.	02										
2*	Prepare survey report for: There is usually a positive side and a negative side to each new technological improvement. 1. Select a technology you use every day and consider its benefits and risks. 2. What benefits does the technology provide? 3. Are there any risks involved and, if so, how can they be minimized?	02										
3	The following are the marks obtained by the students in three subjects Assume suitable data in following table: <table border="1" style="margin-left: 20px;"> <thead> <tr> <th>ROLLNO</th> <th>NAME</th> <th>ME</th> <th>QT</th> <th>IOM</th> </tr> </thead> <tbody> <tr> <td> </td> <td> </td> <td> </td> <td> </td> <td> </td> </tr> </tbody> </table> Using Conditional Formatting list out students who secured(a) Less than 50 in QT, (b) More than 65 in IOM, (c) Between 60 and 80 in ME	ROLLNO	NAME	ME	QT	IOM						02
ROLLNO	NAME	ME	QT	IOM								
4*	Principal Amount 2, 00,000Rate of Interest 5%Time Period 10 YearsAmount to be Paid? From the above , Calculate the amount payable per annum and also show the effect on amount by changing a) Rate of Interest to 3% and 8%b) Time Period to 5 Years and 3 Years	02										
5	Prepare a PowerPoint presentation of at least 5 slide & perform 1. Add 2.delete 3.copy& paste 4.edit slide.	02										
6*	A person wants to start a business and he has four schemes to invest money according to profit and years. Find out which scheme is the most profitable. Investment Amount Percentage for Profit No of years 20000 10% 6 years 40000 20% 5 years 14000 30% 4 years 12000 15% 5 years	02										
7*	Conduct Survey of different IT Industry and prepare list of New Technology Trends in IT Industries.	02										
8*	Prepare a list and compare different desktop publishing software available in market.	04										

H : Specification table for setting question paper for semester end theory examination

I :-Assessment Criteria

i) Formative Assessment of Practical:-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

Every practical assignment shall be assessed for 25 marks as per following criteria:

Sr.no	Criteria	Marks allotted
1	Attendance at regular practical	05
2	Preparedness for practical	05
3	Neat & complete Diagram.	05
4	Observations & handling of instrument.	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Classroom practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

 @\$Internal Online Examination .

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL) hrs.*15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. *Self learning hours shall not be reflected in the Time Table.

*Self learning includes microproject/ assignment/ other activities.(Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:

Civil Workshop Practices mainly deals with Fitting, Plumbing, Welding and Wood working. A technician has to work in such an environment with his peers, superiors and subordinates for a major part of his life. Therefore, the emphasis on the practical work is needed for the primary experience of working in the team.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Use different engineering tools for performing site activities.

E. COURSE OUTCOMES:

CEH101-1: Practice safety in workshop and Use fire fighting tools and equipment.

CEH101-2: Prepare job using different tools in fitting shop

CEH101-3: Perform various operations using plumbing tools.

CEH101-4: Preparing simple components using carpentry tools.

CEH101-5: Produce simple job using different sheet metal operations.

CEH101-6: Produce simple job using different welding operations.

F. COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note: Correlation levels: 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), “-”: no correlation]

Competency and COs	Programme Outcomes POs and PSOs

G. CONTENT - PRACTICAL WORK:

The students will submit the following.

Workshop record book showing the details of the job viz. Drawing, Raw material size, time required for completing the job. The journal consisting of the neat sketches, specifications, use of the hand tool, and hand operations based on the demonstration in all the trades during the practical work.

H. ASSESSMENT CRITERIA

i) Formative Assessment of Practical:-

Every practical assignment shall be assessed for 50 marks as per following criteria:

Domain	Particulars	Marks out of 50
Cognitive	Understanding	10
	Application	10
Psychomotor	Operating Skills	10
	Drawing / drafting skills	10
Affective	Discipline and punctuality	10
TOTAL		50

ii) Summative Assessment of Practical:

Every student has to perform one practical within 2 hours at term end practical which shall be assessed as per following criteria.

Sr. no	Criteria	Marks allotted
1	Preparedness for practical	10
2	Correct figures / diagrams	10
3	Skill (Finishing in dimensions)	20
4	Safety / use of proper tools	10
	Total	50

I. INSTRUCTIONAL STRATEGIES: -

- i) Demonstration during Practical's.
- ii) Workshop Record Book

J. TEACHING AND LEARNING RESOURCES: -

- i) Shop Demonstration

Sr. No.	Topics/ Sub-Topics	Skills/ Competencies to be developed	Practical (Hours)/ Evaluation (Marks)
Course outcome: CEH101-1			
01	General Workshop Practice 1.1 Safety Practices, Causes of accidents, General safety rules, Safety signs and symbols 1.2 First Aid 1.3 Fire, Causes of Fire, Basic ways of extinguishing the fire, Classification of fire, Class A,B,C,D, Fire fighting equipment, fire extinguishers, and their types. 1.4 Workshop Layout 1.5 Issue and return system of tools, equipment and consumables	A. Follow safety practices B. Explain the different types of fire extinguisher and their uses C. Use fire fighting equipment D. Locate various machines and equipment in workshop E. Follow good housekeeping	04/–
Course outcome: CEH101-1 and 2			
02	Fitting Shop 2.1 Demonstration of different fitting tools-holding tools, marking & measuring tools, cutting tools, finishing tools, drilling and power tools and their specifications 2.2 Demonstration of different operations like marking, filing, cutting, drilling, tapping, dieing, chipping, scraping, grinding, sawing, reaming etc. 2.3 Demonstration of bending bars. 2.4 Demonstration of stirrups. 2.5 One simple job in aluminum window frame. 2.6 One job in stirrups. 2.7 Window frame.	A. Study of fitting tools, identifying materials B. Measuring dimensions C. Interpretation of drawing D. Selection of tools E. Time management and observing safety habits F. Operate drilling machine, saw machine G. Prepare utility article	12/10
Course outcome: CEH101-1 and 3			
03	Plumbing shop 3.1 Demonstration of Plumbing tools -pipe vice, pipe bending equipment, pipe wrenches, dies and their Specifications 3.2 Pipe fittings- bends, elbows, tees, cross, coupler, socket, reducer, cap, plug, nipple and their Specifications 3.3 Operation of Machineries in plumbing shops- pipe bending machine there specifications and maintenance. Basic process cutting, threading. 3.4 Demonstration of PVC pipe joint with various PVC fittings & accessories 3.5 One job on simple pipe joint with nipple coupling for Standard pipe, Pipe threading using standard die set (One job per one group of 04 students)	A. Study of plumbing tools, identifying materials B. Interpretation of drawing C. Threading with dies on pipe D. Time management and observing safety habits E. Selection of pipe joint & fittings.	12/10

	3.6 One job on T joint/elbow joint pipe fitting job as per given drawing.(One job per one group of 04 students)		
--	---	--	--

Course outcome: CEH101-1 and 4

04	<p>Wood Working shop: -</p> <p>4.1 Demonstration of types of artificial woods such as plywood, block board, hardboard, laminated board, Veneer, fiber boards and their applications</p> <p>4.2 Demonstration of different wood working tools such as carpentry vice, marking and measuring tools, holding tools, planing tools, cutting tools, drilling and boring tools saws, claw hammer, mallet, chisels, jack plane, smoothing plane, etc.</p> <p>4.3 Demonstration of different wood working processes like marking, sawing, planing, chiseling, grooving, boring, Turning of wood etc.</p> <p>4.4 Operate different machines & equipments in carpentry shop, their specifications and maintenance, safe practices.</p> <p>4.5 One simple job involving measuring, marking, cutting, assembly etc. operations. (One job per one group of 04 students)</p> <p>4.6 One simple job involving cutting, planing, wood turning, joining, finishing, varnishing, etc. operations (One job per one group of 04 students)</p>	<p>A. Study of wood working tools, Identifying materials</p> <p>B. Measuring dimensions</p> <p>C. Interpretation of drawing</p> <p>D. Operating planing, cutting, drilling machines.</p> <p>E. Time management and observing safety habits</p> <p>F. Prepare furniture or article with carpentry joints</p>	12/10
-----------	--	---	-------

Course outcome: CEH101-1 and 5

05	<p>Sheet Metal Shop</p> <p>5.1 Demonstration of different sheet metal tools and machines.</p> <p>5.2 Demonstration of sheet metal operations like Sheet cutting, Bending, Edging, End curling, Lancing, Riveting etc.</p> <p>5.3 One Job involving sheet metal operations from Dustbin, Letter Box, Tray, Bucket etc. (One job per one group of 04 students)</p>	<p>A. Study of sheet metal tools, identifying materials</p> <p>B. Measuring dimensions</p> <p>C. Interpretation of drawing</p> <p>D. Operating sheet cutting bending machines</p> <p>E. Time management and observing safety habits</p> <p>F. Prepare utility article</p>	12/10
-----------	---	---	-------

Course outcome: CEH101-1 and 6			
06	Welding shop :- a) Demonstration of various welding tools, joints of metals, type of welding machines. b) Demonstration of arc welding techniques. c) How to use current setting, earthing connection etc. and any one job composite job involving Butt, Lap joint from the following pieces of work - i) Window frame. ii) Grill. iii) Sanitary window frame. iv) Supporting frame. v) Stool frame. vi) Bench frame etc.	a) Study of welding tools, Identifying materials b) Measuring dimensions c) Interpretation of drawing d) Operating welding machines. e) Time management and observing safety habits	12/10

ii) ii) Hands on training on machine

D. i) RATIONALE

Diploma Graduate needs a sound body and mind to face the challenging situations in career as employee or as an entrepreneur. Yoga and Meditation brings about the holistic development of an individual and equips with necessary balance to handle the challenges. The age of polytechnic student is appropriate to get introduced to yoga practice as this will help them in studies as well as his professional life. Moreover, Yoga inculcates discipline in all walks of the life of student. Pranayama practice regulates breathing practices of the student to improve stamina, resilience. Meditation empowers a student to focus and keep calm to get peace of mind. World Health Organization (WHO) has also emphasized the role of yoga and meditation as stress prevention measure. National Education Policy-2020 highlights importance of yoga and meditation amongst students of all ages. Therefore, this course for Diploma students is designed for the overall well being of the student and aims to empower students to adopt and practice Yoga in daily life.

ii) INDUSTRY/EMPLOYER EXPECTED OUTCOME

By practicing basic yoga and pranayam in daily life, candidate should have attained the state of sound physique and balance mind to execute daily duties.

E. COURSE LEVEL LEARNING OUT-COMES (COs)

Students will be able to achieve & demonstrate the following

On completion of course based learning-

CCH110_1 Practice basic Yoga and Pranayam in daily life to maintain physical and mental fitness.

CCH110_2- Practice meditation regularly for improving concentration and better handling of stress and anxiety.

CCH110_3- Follow healthy diet and hygienic practices for maintaining good health.

I) Practical exercises

Sr No	Laboratory Experiment/Practical Titles/Tutorial Titles	Learning hrs.	Relevant COs
1	Introduction:- 1.1 Introduction to AshtangYog 1.2 Presentations on Introduction to Yoga and its History, Omkar chanting, prayer, Padmasan, Siddhasan & Vajrasan 1.3 Lab Exp: 1. Perform warming up exercises to prepare the body from head to toe for Yoga - i) Neck Movement ii) Shoulder Movement iii) Trunk Movement iv) Knee Movement v) Ankle Movement	03	CCH110-1
2	Lab Exp: 2. After warmup, perform all the postures of Surya Namaskar one by one in a very slow pace, Lab Exp 3. Perform multiple Surya-Namaskar (Starting with three and gradually increasing it to twelve) in one go. (Experiment 2 to 4 must be followed by shavasana for self relaxation.)	4	CCH110-1, CCH110-2
3	Lab Exp: 4 Perform Sarvangasana, Halasana, Kandharasana (setubandhasana), Uttanpadasan, Pavanmuttasan. Lab Exp: 5 Perform Bhujangasana, Naukasana, Mandukasana. Lab Exp: 6 Perform Shalabhasana, Dhanurasana, Vakrasana, Gomukhasana, Paschimottasana, Ardhamasendrasana Lab Exp: 7 Perform Veerasana, Veer-Bhadrasana, Vrukshasana, Trikonasana. (Follow up experiment 5 to 7 with shavasana for self relaxation)	4	CCH110-2
4	Lab Exp: 8 Perform Deepbreathing, Anulom Vilom Pranayam Kriya Lab Exp: 9 Practice Kapalbhatai Pranayam Kriya, Bhastrika Lab Exp: 10 Practice Bhramary Pranayam and Sheetali Pranayam	2	CCH110-3
5	Lab Exp: 11 Perform sitting in Dhyana Mudra and meditating. Start with five minutes and slowly increasing to higher durations. Introduction to Vipassana, Anapan & Chakras. (Trainer will explain the benefits of Meditation before practice)	2	CCH110-3

II) Theory : (Not Applicable)

Section I NA

Section –II NA

** No questions will be asked on IKS learning subtopics in any question papers.

G: List of Assignments under SLA

****Candidate has to complete at least one major assignment from the given during his or her a single semester.**

Maintain a diary indicating date wise practiced one by the student with a photograph of self in yogi c posture. Prepare Diet for and nutrition chart self

Assignment:

- Prepare Diet for and nutrition chart for your self
- Self-Learning
 - Practiceatleast thrice aweek.
 - Read books on different methods to maintain health, wellness and to enhance mood
 - WatchvideostonYogaPractices.

H: Specification table for setting question paper for semester end theory examination: NA

I:-Assessment Criteria

D. i) RATIONALE:-

Communication, being an integral part of every human activity, plays a fundamental role in education, science and technology. The communication skills are essential for engineering professionals to carry out routine tasks at workplace. These skills are also required for professional activities like dialogue, persuasion and negotiation. Considering the age group and socio-economical background of the students of the Institute, this course has been designed with a skill-oriented content with some necessary theoretical foundation. Thus, this course has been designed to enhance the skills to communicate effectively and skillfully at workplace.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

1. “Communicate in written and oral form of English effectively at workplace.”

E. COURSE LEVEL LEARNING OUTCOMES (COs)

CCH201-1 Use Contextual words in English appropriately.

CCH201-2 Comprehend the concept of communication and identify communication barriers.

CCH201-3 Prepare and participate in dialogue, conversation, elocution and debate.

CCH201-4 Make effective use of body language & graphical communication.

CCH201-5 Write letters, reports, e-mails and technical description in correct language.

CCH201-6 Prepare and present effective media aided presentation.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

CO: CCH201-1 Use Contextual words in English appropriately.			
1	Vocabulary Building 1.1 Affixation: Prefix and Suffix, Definition and Examples, List of common Prefixes and Suffixes 1.2 Synonyms and antonyms: Vocabulary Expansion, Context and Usage 1.3 Homophones: Identifying Homophones, Meaning and Contest, Vocabulary Expansion 1.4 Collocation: Definition and Identification, Types of Collocations	8	08
CO: CCH201-2 Comprehend the concept of communication and identify communication barriers.			
2	Introduction to Communication 2.1 Definition and Importance of Communication 2.2 Model of Communication 2.3 Principles of Effective Communication 2.4 Types of Communication: Formal, Informal, Oral, Written, Verbal, Non-Verbal, Horizontal, Upward, Downward and Diagonal Communication 2.5 Barriers to communication: Physical, Mechanical, Psychological and Language Barriers	14	16
CO: CCH201-3: Prepare and participate in dialogue, conversation, elocution and debate.			
3	Oral Communication 3.1 Characteristics of Oral Communication. 3.2 Phonetics: IPA, Vowels(12), Consonants(24) and Diphthongs (12) 3.3 Tone, Pronunciation and Accents. 3.4 Spoken English: Prepared and Extempore speeches 3.5 Role Play: Conversation and Dialogue 3.6 Group Discussion and Debate	8	10

Section II

Sr. No.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CCH201-4: Make effective use of body language & graphical communication.			
4	Non-verbal Communication 4.1 Importance of Non-Verbal Communication. 4.2 Aspects of Body Language: Facial Expressions, Eye Contact, Vocalics, Gestures, Posture, Dress, Appearance and Personal Grooming and Haptics. 4.3 Non-Verbal Codes: Proxemics, chroemics, artefacts 4.4 Graphical Communication: 4.4.1 Advantages and Disadvantages of Graphical Communication. 4.4.2 Tabulation of Data and its depiction in the form of Bar Graphs and Pie Charts	08	12
CO: CCH201-5 Write letters, reports, e-mails and technical description in correct language.			
5	Written Communication 5.1 Characteristics of Written Communication. 5.2 Letter Writing: Application with Resume, Enquiry Letter, Order Letter and Complaint Letter 5.3 Writing Reports: Accident, Fall in Production Reports and Micro Project 5.4 Email Writing 5.5 Technical Writing: Object Description, Picture Description, Diary Writing 5.6 Paragraph Writing: Narrative, Descriptive and Technical	16	20
CO: CCH201-6 Prepare and present effective media aided presentation.			
6	Media-Aided Presentations 6.1 Media aids for Presentation: Strengths and Precautions 6.2 Planning, Preparing and Making a Presentation 6.3 Use of Presentation Media	06	04

** No questions will be asked on IKS learning subtopics in any question papers.

G : List of Assignments/Activities/Micro-project under SLA

**A learner should complete at least on major activity mentioned in the above list under the guidance of subject teacher.

Sr. No	List of Assignment (under SLA)	Hrs Allotted
1	Report different types of episodes and anecdotes	02
2	Seminar preparation and Presentation	04
3	Make a pod cost episode based on Indian freedom fighters.	02
4	Present summary of the editorial column of English news paper	02
5	Write review of on any one: short story, novel, film	02
6	Prepare a booklet on Indian scientist/ eminent persons	04
7	Prepare blog, vlogs and pod cast	04
8	Prepare questionnaire for interview on any one: industry personnel, social worker, entrepreneur and conduct interview.	02
9	Prepare charts/tables of vowels, diphthongs, consonant, organs of speech, vocabulary in English	02
10	Prepare charts/tables of types of communication, barrier in communication, aspects of body language	02
11	Prepare a micro project on a given topic.	04

I:-Assessment Criteria

i) Formative Assessment of Practical:-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05

TOTAL	25
--------------	-----------

ii) Summative Assessment of Practical:

Every practical assignment shall be assessed for 25 marks as per following criteria:

Sr. No.	Criteria	Marks allotted
1	Attendance at regular practical	NA
2	Preparedness for practical	NA
3	Neat & complete Diagram.	NA
4	Observations & handling of instrument.	NA
5	Oral Based on Lab work and completion of task	NA
TOTAL		

J) Instructional Methods:

1. Lecture cum Demonstration,
2. Class room practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning Resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

S.N.	Name of Book	Author	Publication
1	Communication Skills	Sanjay Kumar and Pushp Lata	Oxford University Press
2	Personality Development and Soft Skills	Brun K. Mitra	Oxford University Press
3	Effective Communication Skills	M Ashraf Rizvi	Tata McGraw-Hill
4	Human Communication	Burgoon Michael	SAGE Publication Inc.
5	101 Ways to Better Communication	Elizabeth Hiemey	Pustak Mahal
6	Technical Writing and Professional Communication	Thomas Huckin and Leslie	McGraw-Hill Division College

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL) hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Basic science such as Chemistry is the fundamental of Engineering & technology. It is most essential to learn the basic science to understand the fundamental concepts in Engineering & technology. Engineering chemistry deals with the study of structure, composition & properties of the materials, which form the core of the fundamental science. Many processes are based on principle of Chemistry in various industries. Topics such as Water, Electrochemistry, Corrosion, & protection of metals from corrosion are some of the direct applications of chemistry in engineering. Hence, the knowledge of chemistry is essential to the aspiring engineers of all branches in their field. Engineering materials like Steel, Rubber, Plastic, Thermocole, Glass wool, Paints, Lubricants are the backbone of various industries, machines, equipment & processes.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Apply principles of advanced chemistry to solve engineering problems.

Cognitive: Understanding concepts of chemistry for applications in the area of engineering.

Psychomotor:

- i) Sketching and labeling the diagrams for extraction of copper
- ii) Experimentally analyzing the water samples for preparing portable water by different methods.
- iii) Preparing chart of showing percentage, composition, properties and industrial applications of solders.
- iv) Handling & use of glassware & chemicals.

Affective: i) Accuracy ii) Safety iii) Punctuality iv. Attitude.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CCH104-1 Apply the basic knowledge of atom, molecules and compounds in Engineering Chemistry.

CCH104-2 Apply the concepts of Electrochemistry to interpret the reasons of corrosion with its remedies.

CCH104-3 Select the relevant catalyst, alloys, insulators, adhesives, composite materials, plastic and rubber for different applications in the field of engineering.

CCH104-4 Use of water in Domestic purpose, Industrial purpose and its relevant treatment to solve industrial problems.

CCH104-5 Explain the method of Extraction of Iron.

CCH104-6 Choose appropriate with relevant method of lubrication to solve industrial problem and applications of Paint and Varnish.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/ps) matrix

F. CONTENT:

I) Practical exercises

The following practical exercises shall be conducted in the *Laboratory for Engineering Chemistry developed* by the Institute in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	Introduction to Chemistry laboratory	CCH104-1
2	Volumetric analysis of solution.	CCH104-1
3	Preparation of 1 N, 0.5 N & 0.1 N Solutions of different chemicals like NaOH, HCl, Oxalic acid, FeSO ₄ , etc.	CCH104-1
4	Titration of strong acid and strong bases (HCl X NaOH)	CCH104-1
5	Double titration of strong acid, strong base & weak acid (HCl X NaOH X H ₂ C ₂ O ₄ .H ₂ O)	CCH104-1
6	Titration of weak base , strong acid & strong base (Na ₂ CO ₃ X H ₂ SO ₄ X KOH)	CCH104-1
7	Estimation of chloride content in water by Mohr' s method	CCH104-4
8	Determination of amount of Ca and Mg ions present in given sample of water by E.D.T.A method	CCH104-4
9	Estimation of viscosity of oils/solutions by Ostwald's method	CCH104-6
10	Estimation of Ca in limestone.	CCH104-5
11	Titration of KMnO ₄ & FeSO ₄ (Redox titration)	CCH104-5
12	Estimation of % of Fe in given sample of steel.	CCH104-3
13	Determination of alkalinity of water.	CCH104-4
14	Determination of Electrochemical equivalent (ECE) by copper volt meter.	CCH104-2
15	To estimate volumetrically the percentage of copper in a given sample of Brass.	CCH104- 5
16	To demonstrate the different types of Solders.	CCH104-3

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO - CCH104-1 Apply the basic knowledge of atom, molecules and compounds in Engineering Chemistry.			
1	ATOMIC STRUCTURE AND CHEMICAL BONDING 1.1 Philosophy of atom by Acharya Kanad. 1.2 Atom, Fundamental particles, Nature of atom. 1.3 Atomic Number, Mass Number, Isotopes and isobars. 1.4 Bohr's theory of atom. 1.5 Statement of Aufbau's principle, Hund's rule of maximum multiplicity, Pauli's exclusion principle.	07	08

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	1.6 Lewis and Langmuir's concept of stable electronic configuration. 1.7 Electrovalency and Co-valency. 1.8 Formation Of electrovalent compounds- NaCl, CaCl ₂ . 1.9 Formation of Covalent compounds- H ₂ O, CO ₂		
CO - CCH104-2 Apply the concepts of Electrochemistry to interpret the reasons of corrosion with its remedies.			
2	ELECTROCHEMISTRY AND CORROSION. 2.1 Definitions- Cathode, Anode, Conductor, Electrolyte, Electrode, Ionisation, Electrolysis. 2.2 Arrhenius Theory Of Ionisation. 2.3 Degree of Ionisation & Factors affecting degree of ionisation. 2.4 Statement of Faraday's first and second law of electrolysis. 2.5 Relation between CE and ECE. 2.6 Electrolysis of molten NaCl. 2.7 Electrolysis of CuSO ₄ solution by using Cu-Electrodes. 2.8 Industrial applications of electrolysis. 2.8.1 Electroplating. 2.8.2 Electro refining of Cu. 2.9 Definition & types of corrosion. 2.10 Dry or Atmospheric corrosion , Oxide Film Formation & its types, Factors affecting atmospheric corrosion. 2.11 Wet or electrochemical corrosion 2.12 Factors influencing immersed corrosion 2.13 Methods of protection of metal from corrosion - Hot dipping (Galvanizing & Tinning) ,Metal spraying, Metal cladding, Cementation or sherardizing.	10	10
CO - CCH104-3 Select the relevant catalyst, alloys, insulators, adhesives, composite materials, plastic and rubber for different applications in the field of engineering.			
3	CHEMISTRY OF ENGINEERING MATERIALS AND CATALYSIS. 3.1 INSULATORS 3.1.1 Definition & Characteristics of insulator. 3.1.2 Preparation, properties & uses of Glass wool, Thermocole. 3.2 COMPOSITE MATERIALS 3.2.1 Definition. 3.2.2 Classification, Properties & Application of composite materials.	13	16

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	<p>3.3 PLASTICS 3.3.1 Definition of Polymer, Polymerization. 3.3.2 Types of polymerization – Addition & Condensation polymerization. 3.3.3 Classification of plastic - Thermosoftening & Thermosetting plastic. 3.3.4 Engineering properties & applications of plastic.</p> <p>3.4 RUBBER 3.4.1 Elastomer 3.4.2 Drawbacks of Natural rubber. 3.4.3 Vulcanization of rubber. 3.4.4 Engineering properties & uses of rubber.</p> <p>3.5 ADHESIVES 3.5.1 Definition of adhesives. 3.5.2 Characteristics of good adhesive. 3.5.3 Properties of adhesive.</p> <p>3.6 CATALYSIS 3.6.1 Definition. 3.6.2 Types of Catalyst with example. - Positive catalyst - Negative catalyst 3.6.3 Types of Catalysis. - Homogeneous catalysis. - Heterogeneous catalysis 3.6.4 Catalytic Promoters. 3.6.4 Catalytic Inhibitors 3.6.5 Autocatalysis.</p>		

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO - CCH104-4 Use of water in Domestic purpose, Industrial purpose and its relevant treatment to solve industrial problems.			
4	<p>WATER 4.1 Impurities in natural water. 4.2 Hard water & Soft water. 4.3 Hardness of water- Temporary & Permanent. 4.4 Reactions of hard water with soap. 4.5 Disadvantages of hard water for domestic & Industrial</p>	09	12

	<p>purpose - Textile Industry, Sugar Industry, Paper Industry Dying Industry.</p> <p>4.6 Sterilization of water - Chlorination -by Cl₂, bleaching powder, Chloramines with chemical reactions.</p> <p>4.7 Ion Exchange method to remove total hardness of Water.</p>		
CO - CCH104-5 Explain the method of Extraction of Iron.			
5	<p>METALLURGY AND ALLOYS</p> <p>5.1 Occurrence of metals, Definition of minerals, Ore, Flux, Gangue & Slag.</p> <p>5.2 Flow chart of metallurgical processes.</p> <p>5.3 Concentration of ores - Physical methods - 1. Gravity separation method 2. Electromagnetic separation method 3. Froth floatation method Chemical methods - 1. Calcination 2. Roasting</p> <p>5.4 Ores of Iron.</p> <p>5.5 Extraction of Iron from its ore - Blast furnace - Construction, working, reactions & Products.</p> <p>5.6 Definition of alloys.</p> <p>5.7 Classification & purposes of making of alloys.</p> <p>5.8 Composition, properties & engineering application of - Non- ferrous alloys - Duralumin, Monal metal & Woods metal. Ferrous alloys - Heat resisting steel, magnetic steel, Stainless steel.</p>	12	14
CO - CCH104-6 Choose appropriate with relevant method of lubrication to solve industrial problem and applications of Paint and Varnish.			
6	<p>LUBRICANTS, PAINT AND VARNISH</p> <p>6.1.1 Definition, Classification & Functions of lubricants.</p> <p>6.1.2 Characteristics of lubricants - Viscosity, Viscosity index, Oiliness, Volatility, Cloud point & Pour point, Flash & Fire point, Acid value.</p> <p>6.2 Oil paint - Definition & characteristics of oil paint.</p> <p>6.3 Purpose of using oil paint.</p> <p>6.4 Ingredients of oil paint with suitable example & its fuctions - Drying oil (Vehicle), Drier, Pigment, Thinner, Filler (Extenders),</p>	09	10

	Plasticizer. 6.5 Varnish – Definition, types, constituents, Properties & applications. 6.6 Distinction between paint & varnish.		
--	--	--	--

** No questions will be asked on IKS learning subtopics in any question papers.

G : List of Assignments under SLA

**** From the above any two assignments to be completed by the students.**

Sr.No	List of Assignment (under SLA) (Any one of the following)	Hrs Allotted
1	Prepare distinguish chart for Isotopes & Isobars, Electrovalent & Covalent bond	02
2	Prepare Charts of Bohr's Theory, Lewis & Langmuir's theory.	02
3	Faraday's First & Second law statements & formula.	02
4	Electroplating & Electrorefining with diagram	02
5	Note on corrosion due to Oxygen & its types	02
6	With neat labelled diagram explain the process of 1. Galvanizing, 2. Tinning, 3. Metal spraying, 4. Metal Cladding, 5. Sherardizing	02
7	Properties of Plastics, rubber, insulator, composite materials & adhesives.	02
8	Uses/Applications of Plastics, rubber, insulator, composite materials & adhesives.	02
9	Draw diagram of Ion Exchange method	02
10	Note on Impurities present in Natural Water.	02
11	Disadvantages of hard water in Domestic purposes	02
12	Disadvantages of hard water in Industrial purposes	02
13	Flow chart of Metallurgical processes	02
14	With neat labelled diagram explain 1. Gravity separation method. 2. Electromagnetic separation method. 3. Froth floatation method.	02
15	Explain ingredients present in Paints	02

D. i)RATIONALE:-

Mathematics is an important prerequisite for the development and understanding of engineering and technological concepts. For an engineer and technologist, knowledge of mathematics is an effective tool to pursue and master the applications in the engineering and technological fields. Algebra provides the language and abstract symbols of mathematics. The topic Matrices is helpful for finding optimum solution of system of simultaneous equations which are formed in the various branches of engineering using different parameters .Trigonometry is the study of triangles and angles. Contents of this subject will form foundation for further study in mathematics. Statistics can be defined as a type of mathematical analysis which involves the method of collection and analyzing the data and summing of the data in numerical form for a given set of real world observations. Calculus is a branch of mathematics that calculates how matter ,particles and heavenly bodies actually move. Derivatives are useful to find maxima & minima of a function, velocity & acceleration are also useful for many engineering problems. Hence the course provides the insight to analyze engineering problems scientifically using logarithms, matrices, trigonometry, straight line ,differential calculus and statistics.

ii) Competency:

Apply principles of Basic Mathematics to solve industry based technology problems.

- 1.Cognitive** : To understand the mathematical concepts
- 2. Psychomotor:** Proper handling of scientific calculator
- 3. Affective** : Attitude of accuracy, punctuality, proper reasoning and presentation

E. COURSE LEVEL LEARNING OUTCOMES (COS):

CCH105-1 : To Apply concepts of algebra to solve engineering related problems

CCH105-2 : To Use techniques and methods of statistics to compare multiple sets of data

CCH105-3 : Solve area specific engineering problems under given conditions of straight lines

CCH105-4:- To memorize trigonometric formulae and solve problems based on them.

CCH105-5:- To solve the problems of maxima, minima, radius of curvature and geometrical applications.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/pso) matrix

[Note : Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), “0”

F. CONTENT:

I) Tutorial exercises

Solve any **TEN** the following Tutorial exercises shall be conducted in the Tutorial room in tutorial sessions of batches of about 20- 22 students:

Sr. no	Tutorial experiences	CO
1	Solve Simple problems of Logarithms based on given application	CCH105-1
2	Solve elementary problems on Algebra of Matrices	CCH105-1
3	Solve simultaneous equations using Matrix inversion method	CCH105-1
4	Resolve into Partial Fractions using linear non repeated, repeated and irreducible quadratic factors	CCH105-1
5	Practice problems on equation of straight lines using different forms, Solve problems on perpendicular distance, distance between two parallel lines and angle between two lines	CCH105-3
6	Solve problems on finding range, coefficient of range and mean deviation	CCH105-2
7	Solve problems on Standard deviation, coefficient of variation and comparison of two sets	CCH105-2
8	Solve problems on Allied & Compound angles	CCH105-4
9	Solve problems on Multiple & sub multiple angles	CCH105-4
10	Solve problems on factorization & De- factorization formulae	CCH105-4
11	Solve problems on Inverse Trigonometric Functions	CCH105-4
12	Solve examples on functions & rules of derivatives	CCH105-5
13	Solve examples on Derivative of composite function ,inverse & parametric functions,	CCH105-5
14	Solve examples on Derivative of exponential, implicit and logarithmic functions	CCH105-5
15	Solve examples on Application of Derivatives	CCH105-5

II)Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CCH105-1 : To Apply concepts of algebra to solve engineering related problems			
Unit 1 Algebra	<p>1.1 LOGARITHMS 1.1.1 Concept and laws of logarithm 1.1.2 Simple examples based on laws of Logarithms</p> <p>1.2 MATRICES 1.2.1 Definition of a matrix, Types of matrices, Algebra of matrices, Equality of two matrices, Transpose of a matrix, 1.2.3 Adjoint and Inverse of a matrix 1.2.4 Solution of simultaneous equations having 3 unknowns using Matrix inversion method</p> <p>1.3 PARTIAL FRACTIONS 1.3.1 Definition of rational, proper and improper fractions 1.3.2 Various cases of Partial fractions and Examples</p> <p>1.4 Algebra of Indian Knowledge System: Solution of simultaneous equations using Vedic Mathematics</p>	12	16
CO: CCH105-2 : To Use techniques and methods of statistics to compare multiple sets of data			
Unit 2 Statistics	<p>MEASURES OF DISPERSION 2.1 Range, Coefficient of Range of Discrete and grouped data 2.2 Mean deviation and Standard Deviation about mean for Discrete & Grouped Data (except Assumed mean method and Step deviation method) 2.3 Variance and coefficient of Variance 2.4 Comparison of 2 sets of observations</p>	6	10
CO: CCH105-3 : Solve area specific engineering problems under given conditions of straight lines			
Unit 3 Coordinate Geometry	<p>THE STRAIGHT LINE 3.1 Slope, intercepts & various methods of finding slope 3.2 Conditions for two straight lines to be parallel and Perpendicular to each others 3.3 Various forms of straight line 3.4 Perpendicular distance of a point from a line 3.5 Distance between two parallel lines 3.6 Angle between two straight lines 3.7 Geometry in Sulabh sutras in Indian Knowledge System</p>	6	8

Section –II

Sr. no.	Topics/Subtopics	Learning Hours	Classroom learning evaluation Marks
CO: CCH105-4:- To memorize trigonometric formulae and solve problems based on them.			
Unit 4 Trigonometry	<p style="text-align: center;"><i>TRIGONOMETRY</i></p> <p>4.1 Fundamental Identities(Only state,No examples)</p> <p>4.2 Conversion of degree into radian and vice versa of standard angles</p> <p>4.3 Trigonometric ratios of Compound Angles(Without Proof) , Examples</p> <p>4.4 Trigonometric ratios of Allied Angles (Without Proof) , Examples</p> <p>4.5 Trigonometric ratios of Multiple and Submultiple Angles (Without Proof) , Examples</p> <p>4.6 Factorization and De-Factorization Formulae (Without Proof) , Examples</p> <p>4.7 Inverse Trigonometric ratios , Principle values and simple problems</p> <p>4.8 Trigonometry in Indian Knowledge System : The evolution of sine function in India</p> <p>4.9 Trigonometry in Indian Knowledge System : Indian Trigonometry-From ancient beginning to Nilakantha</p> <p>4.10 Trigonometry in Indian Knowledge System : Ancient Indian Astronomy</p> <p>4.11 Trigonometry in Indian Knowledge System: Pythagorean to triples in Sulabhsutras</p>	14	14
CO: CCH105-5:- To solve the problems of maxima, minima, radius of curvature and geometrical applications.			
Unit 5 Differential Calculus	<p>5.1 Functions:Concept of Functions and simple examples</p> <p>5.2 Limits: Concept of Limits without examples</p> <p>5.3 Derivatives:</p> <p>5.3.1 Derivative of sum, difference, product and quotient of two or more functions</p> <p>5.3.2 Derivative of composite functions</p> <p>5.3.3 Derivative of Inverse functions</p> <p>5.3.4 Derivative of Implicit functions</p> <p>5.3.5 Derivative of Parametric functions</p> <p>5.3.6 Derivative of exponential and logarithmic functions</p> <p>5.3.7 Calculus in Indian Knowledge system “ Discovery of Calculus by Indian Astronomers (Indian Mathematics)</p>	16	16

CO: CCH105-5:- To solve the problems of maxima, minima, radius of curvature and geometrical applications.			
Unit 6 Application of Derivatives	<i>APPLICATIONS OF DERIVATIVES</i> 6.1 Second Order Derivatives(without examples) 6.2 Equation of Tangent & Normal 6.3 Maxima & Minima(only for algebraic functions) 6.4 Radius of curvature	06	06

** No questions will be asked on IKS related subtopics in any question paper

G : List of Microproject /Assignments under SLA

Sr.No	List of Assignment (under SLA)	Hrs Allotted
1	Collect the Data of Marks obtained by your class in mid semester test. Compute the variance and coefficient of variance of the data	02
2	Prepare a model using the concept of tangent and normal, bending of curves in case of sliding of a vehicle.	02
3	Prepare charts of grouped and ungrouped data.	02
4	Collect statistical data on real world problems and find Mean Deviation & S.D.	02
5	Collect at least 10 examples based on real world applications which will be used to find S.D. /Variance.	02
6	Prepare models to explain different concepts.	02
7	Prepare a model using concept of radius of curvature of bending of railway tracks.	02
8	A window in the form of rectangle surmounted by a semicircular opening . The total perimeter the window to admit maximum light through the whole opening ,prepare a model using concept of Maxima & Minima for the above problem and verify the result.	02
9	Collect applications of radius of curvature on lens design and optics, mirror and reflective surface properties , road and highway design , structural behavior, roller coaster track design & make a video of 5- minutes duration.	02
10	Design a puzzle based on matrices . Create a grid of numbers and operations.	02
11	Develop a math game based on operations of matrices.	02

12	Collect examples based on real world applications of logarithm and prepare a pdf file.	02
13	Measure height of trees/buildings in surrounding locations using trigonometry and prepare presentation.	02
14	Apply trigonometric principles to calculate angles ,distances, dimensions relevant to the chosen area and make a poster presentation.	02
15	Find height of room or distance between two pillars by using concept of straight line.	02

****Attempt any 10-12 Micro Projects, out of the given list.**

I) :-Assessment Criteria

Formative Assessment of Tutorial:-

Every Tutorial shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Solving skill	05
	Remembering formulae & Accuracy	05
Affective	Discipline and punctuality	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Classroom practices.
3. Use of projector and soft material for demonstration
4. Use of internate.
5. Whatsapp groups.
6. Use of books

K) Teaching and Learning resources:

Chalk board, Books,LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

Legends:@Internal Assessment, #External Assessment,*# Online Examination, @\$Internal Online Examination

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.*15Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. *Self learning hours shall not be reflected in the Time Table.

*Self learning includes microproject / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE :-

Physics is the foundation of engineering and technology. The development of all engineering areas requires good understanding of fundamental principles in physics. Studying physics develops scientific methodology and technical aptitude in the students. Applications of principles of physics in engineering fields create interest and motivate the students.

ii) INDUSTRY/ EMPLOYER EXPECTED OUTCOME

Apply principles of Physics to solve engineering problems as follows:

Cognitive : i) Understanding and applying principles and laws of Physics to simple practical problems/ situations. ii) Observing iii) Classifying iv) Interpreting

Psychomotor : Handling of instruments, apparatus and tools

Affective : Skill of i) working in team ii) curiosity, interest and self-confidence

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CCH102-1 Estimate errors in measurement of physical quantities.

CCH102-2 Express importance of semiconductors and nanotechnology.

CCH102-3 Select proper material in engineering industry by analysis of its physical properties.

CCH102-4 Apply principles of electricity and magnetism to solve engineering problems.

CCH102-5 Apply principles of optics to solve engineering problems.

CCH102-6 Apply principles of acoustics and ultrasonics for related engineering applications.

Course outcomes and programme outcomes/ programme specific outcomes (co-po/ps0) matrix

[Note : Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), “0”

Cos	Programme Outcomes POs and PSOs								
	PO 1 Basic and Discipline specific knowledge	PO 2 Problem Analyses	PO 3 Design / Development of solutions	PO 4 Engineering Tools, Experimentation and Testing	PO 5 Engineering Practices for society, sustainability and Environment	PO 6 Project Management	PO 7 Life- long Learning	PSO1	PSO2

F. CONTENT :

I) Practical exercises

The following practical exercises shall be conducted in the *Laboratory for Physics developed* by the Institute in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	To measure internal and external dimensions of hollow cylinder by using Vernier Caliper	CCH102-1
2	To measure the diameter of bob and thickness of plate by using Vernier Caliper	CCH102-1
3	To measure the diameter of bob and thickness of plate by using Micrometer screw gauge	CCH102-1
4	To determine forbidden energy band gap in semiconductors	CCH102-2
5	To determine the viscosity of liquid by Stokes method.	CCH102-3
6	To determine the buoyancy force on a solid immersed in a liquid	CCH102-3
7	To measure unknown resistance of wire by Ohm’s law	CCH102-4

Sr. no	Laboratory experiences	CO
8	To verify series law of resistances	CCH102-4
9	To verify parallel law of resistances	CCH102-4
10	To draw magnetic lines of force for given magnet by using magnetic compass	CCH102-4
11	To verify Snell's law using glass slab	CCH102-5
12	To study variation of δ with i for a prism by pin method	CCH102-5
13	To determine velocity of sound by resonance tube	CCH102-6
14	To measure distance using ultrasonic meter	CCH102-6
15	To be added by the subject teacher as per requirement	

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CCH102-1 Estimate errors in measurement in Physical quantities.			
1	UNITS AND MEASUREMENT 1.1 Unit, Physical Quantities : Fundamental and Derived Quantities and their units 1.2 Systems of units : CGS, MKS, FPS and SI 1.3 Errors , Types of errors : Instrumental, Systematic and Random error, Estimation of errors : Absolute, Relative and percentage errors 1.4 Significant figures 1.5 Ancient Astronomical Instruments : Chakra, Dhanuryantra, Yasti and Phalaka yantra (IKS learning) 1.6 Simple Numerical problems	10	12
CO: CCH102-2 Express the importance of Semiconductors and nanotechnology.			
2	INTRODUCTION TO SEMICONDUCTORS AND NANOTECHNOLOGY 2.1 SEMICONDUCTORS 2.1.1 Conductors, insulators and semiconductors 2.1.2 Energy bands 2.1.3 Intrinsic and extrinsic semiconductors 2.1.4 Minority and majority charge carriers 2.1.5 P and N type semiconductors 2.1.6 Properties of semiconductors 2.1.7 Applications of semiconductors No numericals on above topic	08 (06)	08 (06)

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	<p>2.2 Nanotechnology 2.2.1 Definition of nanoscale, nanometer, nanoparticle 2.2.2 Definition and examples of nanostructured materials 2.2.3 Applications of nanotechnology in electronics, automobile, textile, space, medicine, cosmetics and environment No numericals on above topic</p>	(02)	(02)
CO: CCH102-3 Select proper material in engineering industry by analysis of its physical properties.			
3	<p>PROPERTIES OF MATTER</p> <p>3.1 ELASTICITY 3.1.1 Definitions of elasticity, plasticity, rigidity, deforming force, restoring force 3.1.2 Stress, Strain and their types 3.1.3 Elastic Limit, Statement of Hooke's law 3.1.4 Modulus of elasticity and its types, Relation between Y, K and η (No derivation) 3.1.5 Ultimate stress, breaking stress, Working stress, Factor of safety 3.1.6 Applications of elasticity 3.1.7 Simple Numerical problems</p> <p>3.2 VISCOSITY 3.2.1 Definition and meaning of viscosity, velocity gradient 3.2.2 Newton's law of viscosity, Coefficient of viscosity 3.2.3 Stokes law 3.2.4 Derivation of expression for coefficient of viscosity of liquid by Stokes method 3.2.5 Effect of temperature and adulteration on viscosity of liquids 3.2.6 Applications of viscosity No numericals on above topic</p>	<p>12</p> <p>(06)</p> <p>(06)</p>	<p>14</p> <p>(10)</p> <p>(04)</p>

CO: CCH102-6 Apply principles of acoustics and ultrasonics for related engineering applications.			
6	<p>ACOUSTICS AND ULTRASONICS</p> <p>6.1 ACOUSTICS 6.1.1 Echo and reverberation of sound 6.1.2 Sabine's formula 6.1.3 Requirements of good acoustics 6.1.4 Acoustical planning of an auditorium No numericals on above topic</p> <p>6.2 ULTRASONICS 6.2.1 Limits of audibility 6.2.2 Ultrasonic waves 6.2.3 Ultrasonic transducers : Piezoelectric and Magnetostriction 6.2.4 Applications of ultrasonic waves No numericals on above topic</p>	06	06

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Microprojects/ Assignments/ Other Activities under SLA

Sr. No.	List of Microprojects (any one of the following under SLA)	Hrs Allotted
1	Prepare chart showing multipliers required for converting units of physical quantities.	02
2	Prepare prototype vernier caliper of desired least count using card sheet.	02
3	Collect information about ancient astronomical instruments like Chakra, Dhanuryantra, Yasti and Phalaka yantra.	02
4	Collect different materials such as metal, plastic, glass etc and prepare models to show their electrical conductivity.	02
5	Collect different sizes of same material (eg. sugar, salt etc) and list the physical/elerical/optical/chemical/mechanical characteristics for each of them.	02
6	Prepare chart showing the three types of modulus of elasticity developed in a material.	02
7	Prepare working model to differentiate liquids on the basis of viscosity.	02
8	Prepare chart/models to demonstrate magnetic lines of force of different types of magnets.	02

9	Prepare chart/models for series and parallel combination of resistances of different values.	02
10	Prepare a model to demonstrate the variation of angle of refraction with respect to angle of incidence.	02
11	Use keychain laser to differentiate laser with ordinary light.	02
12	Prepare a presentation for application of x-rays in different fields.	02
13	Collect information using internet about ancient acoustic architecture. (For CE/ME/MT students)	02
OR		
Sr.No	List of Assignment (any one of the following under SLA)	Hrs Allotted
1	Write fundamental and derived Physical quantities with their SI units	02
2	Enlist the rules used to decide significant figures in measurements.	02
3	Write points to differentiate conductors, semiconductors and insulators on the basis of energy band diagram.	02
4	List applications of semiconductors in Civil, Mechanical, Electrical, Information Technology, Electronics and Telecommunication, Metallurgical Engineering etc.	02
5	Write down the applications of nanotechnology in the field of electronics, cosmetics, textile, environment, medical, space and defense, automobiles.	02
6	Write applications of elasticity.	02
7	Explain free fall of a sphere in a liquid column.	02
8	Write information of electric lines of force and magnetic lines of force.	02
9	Explain conversion of galvanometer into ammeter/voltmeter of desired range.	02
10	Draw ray diagrams showing different phenomena of light (reflection, refraction, dispersion etc).	02
11	Enlist the properties and applications of laser.	02
12	Explain production of X-rays using Coolidge tube.	02
13	Write the information of factors to be considered while planning of an auditorium. (For CE/ME/MT students).	02
AND		
Sr.No	List of Activity (Compulsory activity under SLA)	Hrs Allotted
	Write importance and significance of calibration of measuring instruments. Collect information of related industries in nearby industrial areas.	02

****One microproject/ assignment and given activity is to be completed during the semester.**

H : Specification table for setting question paper for semester end theory examination

I :-Assessment Criteria

i) Formative Assessment of Practical:-

Every practical assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Presentation (Observations, calculations & Result table)	05
Psychomotor	Operating Skills	05
	Drawing skills (Neat & complete circuit Diagram / schematic Diagram)	05
Affective	Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical :

Every practical assignment shall be assessed for 25 marks as per following criteria:

Sr.no	Criteria	Marks allotted
1	Attendance at regular practical	05
2	Preparedness for practical	05
3	Neat & complete Diagram / observation table	05
4	Observations / Calculations / Result / Graph	05
5	Safety / use of proper tools	05
TOTAL		25

iii) Assessment of SLA :-

Every Self-learning assignment shall be assessed for 25 marks as per following criteria:

Sr.no	Criteria	Marks allotted
1	Attendance	05
2	Preparedness and workmanship	05
3	Presentation (neat figures/ diagrams/ tables/ graphs etc.)	05
4	Conclusion / Inference	05
5	Oral Based on microproject/ assignment/ activity	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Discussions
2. Regular Home Assignments
3. Laboratory work
4. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

1. Chalk board
2. Video clips
3. Slides
4. Item Bank
5. Charts

L) Reference Books:

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination.

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D.RATIONALE:

The role of an engineer is to dream a mechanism for the present and the future generation. Understand the concept of existing mechanism thoroughly. An engineer in his initial stages of learning need to understand the basics of components of the machine, then forces in those components, interaction of these forces resulting in an engineering marvel or a mechanism. The contents of this most versatile basic course for engineering curriculum aims at providing fundamental meaning of various engineering principles and concept in engineering applications .The contents also forms basic or primary set for higher level of subject such as strength of material, analysis of structures and design of steel structures and RCC structures. The subject being first and foremost entry level curriculum for the various programs in engineering it acts as gateway for engineering career. With the learning outcomes of the subject, learner can get clues for various fields such as mechanical, civil, metallurgical and varied courses like aerodynamics, space mechanics, marine structures .The subject being interdisciplinary in nature it comes under allied department applied mechanics.

Competency identified for the course:

The MPEC 2020 curriculum design based on MSBTE K curriculum guideline and NEP2020 policy incorporates all salient features such as notional hours and non-national hours of learning. Indian knowledge system through 2 hours in a semester is aimed at exploring ancient traditional technical knowledge prevailing in the country. Subject is given 4 hrs. Of class room learning, 2hrs of practicals (lab learning) and 2 hrs. of self-leaning. All these hrs. Of learnings including IKS learning are aimed at achieving following skills sets.

Cognitive	psychomotor	Affective domain
<p>Understanding force concepts in various mechanics through FBD for various physical situations</p> <p>Solving for equilibrium condition of various force system and appreciating the mechanism analytically.</p> <p>Understanding the kinematics geometry of motion in rectilinear and circular motion</p> <p>Solving static equilibrium and dynamic equilibrium condition(kinetics) and lifting machines.</p> <p>Formative assessment is employed through two unit test., end semester exam (specification table) (30 marks)and progressive assessment format for lab work is to be followed .(10 marks)</p>	<p>Practicals with hands on experience on force system to verify Lamis theorem ,law of polygon of forces ,parallelogram of forces ,beam reactions on force table or similar set up.</p> <p>Lifting machines are operated to establish law of machine and compute efficiency .</p> <p>By performing motion of bodies with different surfaces in contact , frictional resistance is evaluated .</p> <p>By simulating areas to forces centroid for different laminae is graphically found.</p> <p>progressive assessment format for lab work is to be followed(10marks) .</p>	<p>All practical systematically executed to understand the principles, appreciate the inferences with the set of observations conducting lab learning in a small group where every individual gets ample opportunity, essence of team work is developed, result oriented performance is appreciated and time bound activity is scheduled . the neatness and presentation skills are appreciated in formative progressive assessment format for lab work is to be followed (5marks).</p>

E. COURSE LEVEL LEARNING OUTCOMES (COs):

CCH108-1 Understanding mechanisms for the interaction of various forces in their components with types and corresponding effects. With due focus on rigid body concept, principle of superposition resolution and composition of forces.

CCH108-2 Study of equilibrium for concurrent and non-concurrent force system and finding resultant and equilibrant graphically and analytically.

CCH108-3 Problems on equilibrium condition involving friction and support reactions in beams graphically and analytically.

CCH108-4 Knowing simple lifting mechanisms establishing law of machine, evaluating efficiency for set of loads.

CCH108-5 Studying equations of motion for rectilinear and circular motion, establishing relation between linear and angular motion parameters.

CCH108-6 Understanding effect of force for executing work, energy principles and conservation of energy concept.

**Competency, course outcomes and programme outcomes/programme specific outcomes
(CO-PO/PSO matrix)**

[Note : Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), “0”]

F. CONTENT:**I) LABORATORY WORK**

Practical Exercise and related skills to be developed

The following exercises shall be conducted as practical work as detailed in laboratory manual for Applied Mechanics developed by the institute in practical sessions of batches of about 20-22 students.

In the list, Expt. No.1 to7 exercises are compulsory and from 8 to 12, any three exercises shall be conducted. in all 10 experiments are mandatory.

Sr no	Title of practical exercise	Course Outcome
1	Verification Law of parallelogram of forces	CCH108-1
2	Verification Law of polygon of forces	CCH108-1
3	Verification of Lamis theorem	CCH108-2
4	Determination of Beam reaction (Graphically and Analytically)	CCH108-2
5	Graphic statics (To find resultant of concurrent and non-concurrent force system)	CCH108-2
6	Determination of centroid (regular and irregular laminas)	CCH108-2
7	Determination of coefficient of friction between different surfaces	CCH108-3
8	Simple lifting machine introduction of basic terms Study of differential axle and wheel	CCH108-4
9	Screw jack Application and finding efficiency and its law	CCH108-4
10	Study of worm and worm wheel	CCH108-4
11	Gear mechanism (Either single or double)	CCH108-4
12	Experiment on simple pendulum to know dynamic characteristics	CCH108-5

II) THEORY:**Section I**

Sr no	Course content	Lecture hours (class room learning)	Theory Assessment marks
CO: CCH108-1 Understanding mechanisms for the interaction of various forces in their components with types and corresponding effects. With due focus on rigid body concept, principle of superposition resolution and composition of forces.			
1	Force systems and principles 1.1 Rigid body concepts, physical quantities and their units 1.2 Free body diagram for various mechanisms 1.3 Force characteristics, definition, force and force system-principles and laws 1.4 Different type of actions and their representation, with their effect (resultant moment, couple etc.) 1.5 Application on force system – numerical on law of parallelogram of forces, law of polygon of forces	8 hours	12 marks
CO: CCH108-2 Study of equilibrium for concurrent and non-concurrent force system and finding resultant and equilibrant graphically and analytically.			
2	Equilibrium of bodies 2.1 Two force system resultant and equilibrium inference 2.2, Lami's theorem for three force system and its application 2.3 Varignon's principle and its application 2.4 Solving graphically and analytically beams with roller and hinge support 2.5 Definition of centroid and centroid for standard areas /sections. Its determination experimentally for irregular areas	12 hours	12 marks
CO: CCH108-3 Problems on equilibrium condition involving friction and support reactions in beams graphically and analytically.			
3	Friction on bodies and beam statics 3.1 Laws of dry friction 3.2 Free body diagram to derive expression for μ_s & μ_k 3.3 Problems on block and ladder friction 3.4 Reaction in beams carrying point load and udl with hinge and roller support. 3.5 Beam carrying transverse loads and couple	10 hours	10 marks
Total		30	34

Section II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CCH108-4 Knowing simple lifting mechanisms establishing law of machine, evaluating efficiency for set of loads.			
4	Simple Lifting machines 4.1 Basic definition of terms involved in lifting mechanisms. 4.2 Different types of simple lifting machines such as simple gears differential axial and wheel, screw jack 4.3 Inclined plane and evaluating coefficient of static friction	12 hours	14 marks
CO: CCH108-5 Studying equations of motion for rectilinear and circular motion, establishing relation between linear and angular motion parameters.			
5	Kinematics and kinetics 5.1 Kinematics and kinetic equations of motion 5.2 D'Alembert's principle for dynamic equilibrium 5.3 Kinetics for circular motion 5.4 Evaluating dynamic characteristics of simple pendulum	10 hours	12 marks
CO: CCH108-6 Understanding effect of force for executing work, energy principles and conservation of energy concept			
6	Work, power and energy 6.1 Definition of work done and dot product of force and displacement vectors 6.2 Energy types and law of conservation of energy 6.3 Collision of bodies and problem solving 6.4 Power and its interpretation in different mechanism	8 hours	10 marks
Total		30	36

G. List of Assignments/Microprojects under SLA

**assignments/Microproject are to be completed during the semester.

Sr.No	List of Microproject objectives	Format	Assessment criteria
1	Mechanism –free body diagrams, force equations and efficiency	Title:	Objectives: 5 marks
2	Equilibrium of static force systems - Buildings, Dams, Engineering structures case studies	Objectives:	Methodology:10 marks
3	Gear systems –case studies	Study scheme: 2* 15 = 30 hours planning	Presentation /inferences:10 marks
4	Rope drives, weighing machines case studies	Procedure: theory/ modeling	
5	Rolling, sliding friction field applications.	Observations:	
6	Machine foundation aspects	Inference:	
7	Vibration analysis of simple motions	Conclusion	
8	Motion of bodies, projectile, space mechanics preliminary studies	Bibliography	
9	Energy principles, fly wheel machine concept and applications		

H: Specification table for setting question paper for semester end theory examination

Section / Topic no.	Name of topic	Distribution of marks (level wise)			Total marks	CO
		Remember	Understand	Apply		
I / 1	Force systems and principles	4	4	4	12	CCH108-1
I / 2	Equilibrium of bodies	4	4	4	12	CCH108-2
I / 3	Friction on bodies and beam statics	4	2	4	10	CCH108-3
II / 4	Simple Lifting machines	4	2	8	14	CCH108-4
II / 5	Kinematics and kinetics	4	4	4	12	CCH108-5
II / 6	Work,power and energy	4	2	4	10	CCH108-6
Total Marks					70	

I:-Assessment Criteria

i) Formative Assessment of Practical: -

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

Every practical assignment shall be assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Attendance at regular practical	05
2	Preparedness for practical	05
3	Neat & complete Diagram.	05
4	Observations & handling of instrument.	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

iii) Assessment of SLA: -

Every Self-learning assignment/microproject shall be assessed for 25 marks as per assessment shown in table of criteria G.

J. Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K. Teaching and Learning resources:

1. Chalk board
2. LCD presentations
3. Demonstrative kits
4. Demonstrative charts
5. Question Bank
6. Digital learning resources

D. i)RATIONALE:-

Mathematics is an important pre-requisite for the development and understanding of engineering and technological concepts. For an engineer and technologist, knowledge of Mathematics is an effective tool to pursue and to master the applications in the engineering and technological fields. Applied mathematics is designed for its applications in engineering and technology. It includes integration, differential equation,. The connection between applied mathematics and its applications in real life can be understood and appreciated. Integral calculus helps in finding the area . Differential equation is used in finding curve, rectilinear motion. Statistics and probability will help a student to analyze data of large volume in their higher studies. The fundamentals of these topics are directly useful in understanding engineering applications in various fields.

ii) Competency:

The course should be taught and implemented with the aim to develop the course outcomes (CO's) for the student to acquire the competency needed to apply the mathematical techniques for engineering subjects.

- 1.Cognitive** : Understanding and applying principles of mathematics to engineering problems
- 2. Psychomotor:** To prepare charts displaying the area of irregular shapes using the concept of integration,prepare charts to displaying grouped and ungrouped data .
- 3. Affective** : discipline, consistency, hard work , to concentrate ,accuracy, punctuality, aesthetics

E. COURSE LEVEL LEARNING OUTCOMES (COS)(TNR 14)

CCH301-1 : To solve examples on integration using various techniques

CCH301-2 : To solve Differential equation of first order and first degree by various methods

CCH301-3 : To find approximate solution of algebraic equations and simultaneous equations by various methods.

CCH301-4:- To solve problems on Probability distributions

CCH301-5 :- Solve examples on Laplace Transform

F. CONTENT:

I) Tutorial exercises

Any **TEN** of the following Tutorial exercises shall be conducted in the Tutorial room in tutorial sessions of batches of about 20- 22 students:

Sr. no	Tutorial experiences	CO
1	Solve simple problems of Integration by substitution.	CCH301-1
2	Solve integration using by parts.	CCH301-1
3	Solve examples on Definite Integral based on given methods.	CCH301-1
4	Solve problems on properties of definite integral.	CCH301-1
5	Solve given problems for finding the area under the curve and area between two curves . (Only for civil and mechanical engg. group)	CCH301-1
6	Solve examples on mean value and root mean square value.(only for Computer, Electrical and Electronics engg. group)	CCH301-1
7	Solve first order first degree differential equation using variable separable method.	CCH301-2
8	Solve first order first degree differential equation using exact differential equation and linear differential equation.	CCH301-2
9	Solve engineering application problems using differential equation.	CCH301-2
10	Solve problems on Bisection method, Regula falsi and Newton-Raphson method.	CCH301-3
11	Solve problems on Jacobi's method and Gauss Seidel method.	CCH301-3
12	Use Bakshali iterative methods for finding approximate value of square root.(IKS)	CCH301-3
13	Solve engineering problems using Binomial Distribution, Poisson Distribution and Normal Distribution.	CCH301-4
14	Solve problems on Laplace transform and properties of Laplace transform.	CCH301-5
15	Solve problems on Inverse Laplace transform and properties of Inverse Laplace transform.	CCH301-5

II)Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CCH301-1 : To solve examples on integration using various techniques.			
Unit 1 Indefinite Integration	Indefinite Integration 1.1 Definition, Standard formulae 1.2 Rules of Integration (without proof), Examples 1.3 Integration by substitution 1.4 Integration by parts 1.5 Integration by partial fractions (only linear non repeated factors at denominator of proper fraction)	14	16
CO: CCH301-1 : To solve examples on integration using various techniques			
Unit 2 Definite Integration	Definite Integration 2.1 Definition, Examples 2.2 Properties of Definite Integration (without proof), Examples based on properties	8	8
CO: CCH301-2 : To solve Differential equation of first order and first degree by various methods			
Unit 3 Differential equation	Differential equation 4.1 Definition of differential equation 4.2 Order & degree of Differential equations 4.3 Methods of solving Differential equations of first order & first degree of following types: 4.3.1 Variable separable form 4.3.2 Exact Differential equations 4.3.3 Linear Differential Equations	8	10

Section –II

Sr. no.	Topics/Subtopics	Learning Hours	Classroom learning evaluation Marks
CO: CCH301-3 :- To find approximate solution of algebraic equations and simultaneous equations by various methods.

D. i) RATIONALE:-

Life skills can be defined as abilities that enable an individual to deal effectively with the demands and challenges of life. Social skills are a subset of life skills that are needed for successful, healthy relationships to easily adapt when moving from one social situation to the next. They help regulate our emotions effectively and develop enduring, supportive relationships, we're happier and healthier. This is why developing life skills and eventually social skills is key not only to being successful in life, it's key for our health and well-being. Thus, Teaching of Social and life skills provide students with essentials of knowing, understanding attitudes, values, morals, social skills and better equip them to handle stress and build their self-efficacy, self-esteem and self-confidence.

Note: The course offers four different alternatives (modules) for achieving above outcomes. Students must complete any one module from the following given options.

- A) MODULE-I : Unnat Maharashtra Abhiyan (UMA)
- B) MODULE-II : National Service Scheme (NSS)
- C) MODULE-III : Universal Human Values
- D) MODULE-IV: Value Education (Unati Foundation)
- E) MODULE-V : Financial Literacy (NABARD)

The institute can choose to offer any one MODULE to the groups of the students by taking into consideration the resources required and resources available in the institute. Different group of students may be offered different MODULE based on their choices.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Exhibit psychosocial competencies, workplace ethics, resilience, positive attitude, integrity and self-confidence

E. COURSE LEVEL LEARNING OUTCOMES (COs)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

- CCH204-1 - Develop ability to adapt to new challenges.
- CCH204-2 - Manage emotions effectively.
- CCH204-3 - Follow workplace ethics and practices
- CCH204-4 - Manage time effectively.
- CCH204-5 - Increased self-confidence to handle stress.

COMPETENCY, COURSE OUTCOMES AND PROGRAMME OUTCOMES (CP-CO-PO) MATRIX:

[Note : Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "0"

	PO 1 Basic and Discipline specific knowledge	PO 2 Problem Analysis	PO 3 Design / Development of solutions	PO 4 Engineerin g Tools, Experiment ation and Testing	PO 5 Engineering Practices for society, sustainability and Environment	PO 6 Project Manage ment	PO 7 Life- long Learnin g	PSO1	PSO2
Competency: Apply principles of communication to communicate in formal and informal scenario.									
CCH204-1 Develop self-confidence and positive attitude towards work.							2		
CCH204-2 Set personal and professional goals.							2		
CCH204-3 Develop ability to manage emotions and to handle stress.							2		
CCH204-4 Manage time effectively.						2	2		
CCH204-5 Demonstrate effective interpersonal and leadership skills.							2		
CCH204-6 Identify and handle different types of conflicts.						2	2

5	TLO 5.1 Literacy About Savings and Investments TLO 5.2 Literacy About Financial Planning TLO 5.3 Literacy About Transactions TLO 5.4 Literacy About Income, expenditure and budgeting TLO 5.5 Literacy About Inflation TLO 5.6 Literacy About Loans TLO 5.7 Literacy About the Importance of Insurance TLO 5.8 Literacy About the Dos and Don'ts in finances	Unit - V MODULE-V : Financial Literacy 5.1 Introduction - Life Goals and financial goals 5.2 Savings and Investments - Three pillars of investments, Popular asset classes, Government schemes, Mutual Funds, Securities markets (Shares and bonds), Gold, Real Estate, Do's and Don'ts of investments 5.3 Retirement planning 5.4 Cashless transactions 5.5 Income, expenditure and budgeting – Concepts and Importance 5.6 Inflation- Concept, effect on financial planning of an individual 5.7 Loans – Types, Management of loans, Tax benefits 5.8 Insurance – Types, Advantages, selection Dos and Don'ts in Financial planning and Transactions	i) Online/Offline Mode of Instructions ii) Video Demonstrations iii) Presentations iv) Case Study v) Chalk-Board Collaborative learning

** No questions will be asked on IKS learning subtopics in any question papers.

G : List of Assignments/Activities/Micro-project under SLA

Suggestive list of activities during Regular as well as Special Camping (NSS Activities)

Following list is only an illustrative list of the type of activities that can be undertaken. Under the programme it would be open to each NSS Unit to undertake one of these programmes or any other activity which may seem desirable to them according to local needs. The NSS Unit should aim at the integrated development of the area selected for its operation which could be a village or a slum. It has also to be ensured that at least a part of the programme does involve manual work.

(a) Environment Enrichment and Conservation:

The activities under this sub-theme would inter-alia, include:

- (i) plantation of trees, their preservation and upkeep
- (ii) Construction & maintenance of village streets, drains
- (iii) Cleaning of village ponds and wells;
- (iv) Popularization and construction of Gobar Gas Plants, use of non-conventional energy;
- (v) Disposal of garbage & composting;
- (vi) Prevention of soil erosion and work for soil conservation,
- (vii) Watershed management and wasteland development
- (viii) Preservation and upkeep of monuments, and creation of consciousness about the preservation of cultural heritage among the community.

(b) Health, Family Welfare and Nutrition Programme:

- (i) Programme of mass immunization;
 - (ii) Working with people in nutrition programmes with the help of Home Science and medical college students;
 - (iii) Provision of safe and clean drinking water;
 - (iv) Integrated child development programmes;
 - (v) Health education, AIDS Awareness and preliminary health care.
 - (vi) Population education and family welfare programme;
 - (vii) Lifestyle education centres and counselling centres.
- © Programmes aimed at creating an awareness for improvement of the status of women: (i) programmes of educating people and making them aware of women's rights both constitutional and legal;
- (ii) creating consciousness among women that they too contributed to economic and social well-being of the community;
 - (iii) creating awareness among women that there is no occupation or vocation which is not open to them provided they acquire the requisite skills; and
 - (iv) imparting training to women in sewing, embroidery, knitting and other skills wherever possible.

(d) Social Service Programmes:

- (i) work in hospitals, for example, serving as ward visitors to cheer the patients, help the patients, arranging occupational or hobby activities for long term patients; guidance service for out-door-patients including guiding visitors about hospital's procedures, letter writing and reading for the patients admitted in the hospital; follow up of patients discharged from the hospital by making home visits and places of work, assistance in running dispensaries etc.
- (ii) work with the organisations of child welfare;
- (iii) work in institutions meant for physically and mentally handicapped;
- (iv) organising blood donation, eye pledge programmes;
- (v) work in Cheshire homes, orphanages, homes for the aged etc.;
- (vi) work in welfare organisations of women;
- (vii) prevention of slums through social education and community action;

(e) Production Oriented Programmes:

- (i) working with people and explaining and teaching improved agricultural practices;
- (ii) rodent control land pest control practices;
- (iii) weed control;

- (iv) soil-testing, soil health care and soil conservation;
- (v) assistance in repair of agriculture machinery;
- (vi) work for the promotion and strengthening of cooperative societies in villages;
- (vii) assistance and guidance in poultry farming, animal husbandry, care of animal health etc.;
- (viii) popularisation of small savings and assistance in procuring bank loans

(f) Relief & Rehabilitation work during Natural Calamities:

- (i) assisting the authorities in distribution of rations, medicine, clothes etc.;
- (ii) assisting the health authorities in inoculation and immunisation, supply of medicine etc.;
- (iii) working with the local people in reconstruction of their huts, cleaning of wells, building roads etc.;
- (iv) assisting and working with local authorities in relief and rescue operation;
- (v) collection of clothes and other materials, and sending the same to the affected areas;

(g) Education and Recreations: Activities in this field could include:

- (i) adult education (short-duration programmes);
- (ii) pre-school education programmes;
- (iii) programmes of continuing education of school drop outs, remedial coaching of students from weaker sections;
- (iv) work in crèches;
- (v) participatory cultural and recreation programmes for the community including the use of mass media for instruction and recreation, programmes of community singing, dancing etc.;
- (vi) organisation of youth clubs, rural land indigenous sports in collaboration with Nehru Yuva Kendras;
- (vii) programmes including discussions on eradications of social evils like communalism, castism, regionalism, untouchability, drug abuse etc.;
- (viii) non- formal education for rural youth and
- (ix) Legal-literacy, consumer awareness.

H: Specification Table for Setting Question Paper for Semester End Theory Examination: Not Applicable

I:-Assessment Criteria

i) Formative Assessment of Practical:-

Formative assessment (Assessment for Learning) report and presentation of fieldwork activities, self-learning (Assignment)

ii) Summative Assessment of Practical:

(Assessment of Learning)

J) Instructional Methods:

1. Group Discussion, Flipped Classroom
2. Demonstration, Case Study, Role Play, Collaborative Learning, Cooperative Learning
3. Field Visit, Survey
4. Use of projector and soft material for Demonstration (ppt, audio ,video etc)

K) Teaching and Learning Resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

S.N.	Name of Book	Author	Publication
1	Compendium of Training Materials for the Capacity Building of the Faculty and Students of Engineering Colleges on 'IMPROVING THE PERFORMANCE OF RURAL WATER SUPPLY AND SANITATION SECTOR IN MAHARASHTRA' Districts Economic survey reports	IRAP, Hyderabad, CTARA, IIT Bombay and UNICEF, Mumbai	UNICEF
2	Central Public Health and Environmental Engineering Organisation	Manual on Water Supply and Treatment	Ministry of Urban Development, New Delhi
3	Specifications And Standards Committee	Indian Standards (IS) Codes and Indian Roads Congress (IRC) Codes	Bureau of Indian Standards and The Indian Road Congress
4	Prepared by each district administration	Districts Economic survey reports	Govt. of Maharashtra
5	Local college students,UMA staffs	Sample Case Studies on UMA website	IITB-UMA team

M) Learning Website & Software

					Practical						
	FA-TH MAX	SA-TH MAX	TOTAL MAX MIN		FA -PR MAX MIN		SA-PR MAX MIN		MAX	MIN	
03	30	70	100	40	25	10	-	-	25	10	150

(Total IKS Hrs for Sem. :01Hrs)

C: Abbreviations: CL-Class Room Learning, TL-Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA –Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *#On Line Examination, @\$ Internal Online Examination.

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
 2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
 3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
 4. Notional Learning hours for the semester are(CL+LL+TL+SL)hrs.*15Weeks
 5. 1(one) credit is equivalent to 30 Notional hrs.
 6. *Self-learning hours shall not be reflected in the Time Table.
- *Self-learning includes micro-project/assignment/other activities.

D. i) RATIONALE:-

Building Materials and Construction is the key element in the construction project. It is a challenging job for the civil engineer to select relevant material for construction which is durable, economical and eco-friendly along with the construction procedure. At diploma level, students are expected to develop their understanding, performance-oriented abilities in order to apply their knowledge in construction industry. This course essentially imparts the knowledge of construction technology along with the processes involved in it and various construction materials used for economic and effective execution of various construction activities. This knowledge shall be used for effective and efficient utilization of these materials during the building construction..

ii) INDUSTRY/EMPLOYER EXPECTED OUT COME

Undertake safe building construction practices with relevant building materials.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CO1-Identify relevant type of construction materials for the given type of building.

CO2-Use the relevant type of special purpose construction materials in the given situation.

CO3-Undertake the given type of building construction activity for the given component of Building structure.

CO4-Design the relevant means of communication for the given building structure.

CO5-Use the relevant type of material for finishing purpose in the given situation.

CO6-Use the relevant type of special construction techniques in the given situation.

F. CONTENT:-

I) Practical exercises

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical sessions of batches of about 20-22 students: Continuous assessment work is dividing three parts as below –

I. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES.

Sr No	Laboratory Experiment / Practical Titles / Tutorial Titles	Number of hrs.	Relevant COs
Practical:-			
1	Identify the different Construction materials used in building construction	2	CO1
2	Perform field test on given sample of brick.	2	CO2
3	Assemble one and half Brick thick wall in a English Bond and prepare a report on it.	2	CO3
4	Practice to hold plumb-bob, tube level and transferring the levels ex. Lintel level for doors and windows.	2	CO3
5	Setting out a simple residential building (Line out of a framed structure)	2	CO3
Field Visits:-			
1	Prepare a visit report with labeled sketches of inspected RCC footing, beam, column, slab, chajja etc construction during site visit.	2	CO3
2	Prepare a visit report with sketches/photos of construction site with respect scaffolding, formwork and centering work.	2	CO6
3	Prepare a visit report with labeled sketches of inspected building components like masonry work, staircase, doors, windows, and flooring and roofing materials during site visit.	2	CO3-CO5
4	Prepare a visit report with sketches/photos by observing the process of plastering; pointing and painting work at construction site.	2	CO5
5	Prepare a visit report with sketches/photos by observing brick kiln/ stone quarry/ stone crusher.	2	CO1
6	Prepare a visit report with sketches/photos by observing different types of woods & sawing of wood.	2	CO1
Market Survey:-			
Market survey for types, cost, sizes, specifications etc of following materials. (Each of five)			
1	Wall tiles, flooring tiles, natural stones like polished granite, marble, kadapa etc.	CO1,CO2,CO5	
2	Plumbing materials : GI,PVC, APVC, CPVC etc		
3	Aluminum / structural steel / gas lines etc		
4	Fixtures and fastening of doors and windows		
5	Plywood, sun mica, fore-mica etc.		

II) Theory

Section I			
Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CEH301-CO1 Identify relevant type of construction materials for the given type of building.			
1	<p>Overview of construction Materials</p> <p>1.1 Introduction to National Building Code-Part III (2005) Group A to I.</p> <p>1.2 Types of Constructions- Load Bearing Structures, Framed Structures, Composite Structures.</p> <p>1.3 Broad classification of materials–Sources of materials, Natural, Artificial -special, finishing and recycled.</p> <p>1.4 Natural Building Construction Materials- Types, uses and applications of: - Stone, Timber, Soil, Sand and Coarse Aggregates, Bitumen (IKS-Materials used in Ancient Buildings-Stone , Lime)</p> <p>1.5 Artificial Building Construction Materials– Types, uses and applications of :- Cement, Clay Brick, Flooring Tiles, Concrete Blocks, Plywood, particle board, Veneers, laminated board and Glass:.</p>	8	10
CEH301-CO2 Use the relevant type of special purpose construction materials in the given situation.			
2	<p>Special Building Construction Materials</p> <p>2.1 Water proofing methods- Introduction to Brick bat Coba, Acrylic Polymer modified water proofing,</p> <p>2.2 Termite proofing - Introduction and applications</p> <p>2.3 Acoustic materials- Introduction and applications</p> <p>2.4 Geo polymer cement- uses and applications.</p>	3	6
CEH301-CO3 Undertake the given type of building construction activity for the given component of building structure.			

3	<p>Construction of substructure & Superstructure</p> <p>3.1 Building Components: Building Components & their Function: Substructure, Superstructure</p> <p>3.2 Earthwork: Excavation For Foundation, Timbering and Strutting Earthwork for Embankment Material for Plinth Filling</p> <p>3.3 Foundation: Functions, Types: hallow Foundation-Stepped Footing, Wall footing, Column Footing, Isolated and Combined Column Footing, Raft Foundation. Deep Foundation-Pile Foundation, Well foundation and Caissons, Pumping Methods of Dewatering, Deep wells, Cofferdams.</p> <p>3.4 Stone Masonry: Terms used in stone masonry- facing, backing, hearting, through stone, cornerstone, cornice. Type of stone masonry: Rubble masonry, Ashlar Masonry and their types .Selection of Stone Masonry .Precautions to be observed in Stone Masonry Construction.(IKS- Ancient heritage building-stone masonry work</p> <p>3.5 Brick masonry: Terms used in brick masonry- header, stretcher, closer, quoins, course, face, back, hearting, bat bond, joints, lap, frog, line, level and plumb. Bonds in brick masonry, header bond, stretcher bond, English bond and Flemish bond, Requirements of good brick masonry. Precautions to be observed in Brick Masonry Construction.</p> <p>3.6 Comparison between stone masonry and Brick Masonry, Tools and plants required for construction of stone masonry and brick masonry.</p>	12	20
	TOTAL	23	36
Section II			
CEH 301-CO4 Design the relevant means of communication for the given building structure.			
4	<p>Building Communication</p> <p>4.1 Horizontal Communication: Doors–Components of Doors, Types of Doors: Fully Paneled Doors, Partly Paneled and Glazed Doors, Flush Doors, Collapsible Doors, Rolling Shutters, Revolving Doors, Glazed Doors. Sizes of Door recommended by BIS.</p> <p>4.2 Windows: Component of windows, Types of Windows: Fully Paneled, Partly Paneled and Glazed, Wooden, Steel, Aluminum Windows, Sliding Windows. Sizes of Windows recommended by BIS and Ventilators</p> <p>4.3 Fixtures and fastenings for doors and windows.</p>	8	12

	<p>4.4 Vertical Communication - Staircase, Ramps, Elevator and types of Escalators (excluding mechanism). Terms used in staircase, Types of staircases- Straight, doglegged, open well, Circular, Quarter turn. Calculation of no of flight's, dimensions of rise and trade.</p>		
<p>CEH301- CO5 Use relevant type of material for finishing purpose in the given situation.</p>			
5	<p>Building Finishes</p> <p>5.1 Types of Floor Finishes, laying process and its suitability- Shahabad, Kota, Marble, Granite, Kadapa, Ceramic Tiles, Vitrified, Pavement Blocks, Concrete Floors, Wooden Flooring (Introduction) ,Skirting and dado, Mezzanine floors- location and use.</p> <p>5.2 Roofs - Necessity of Roofs, Types: Pitched & flat, component parts of pitched roof, requirements of good roof.</p> <p>5.3 Plastering–Necessity, Procedure, rough finish, Neeru finishing.</p> <p>5.4 Pointing – Necessity, Procedure and types (Sketches).</p> <p>5.5 Special Plasters- Stucco Plaster, sponge finish, rough cast finish, pebbles finish. I. SUGGESTED MICROPROJECT/ASSIGNMENT/ACTIVITIES FOR SPECIFIC LEARNING/SKILLS DEVELOPMENT (SELF LEARNING)

Micro project

- a. Collect the market rates for following construction materials from various dealers/suppliers of local market for different brands. i. Bricks. ii. Stone / aggregate (20 mm, 40 mm and 80 mm) iii. Teak wood. iv. Flooring tiles. v. Ordinary Portland Cement vi. Oil paint vii. Cement Paint viii. Plaster of Paris ix. Plastic paints x. Recent types of paint.
- b. Collect the technical brochures of following construction materials. i. Ordinary Portland cement ii. Vitrified flooring tiles. iii. Particle boards used for aluminum partitions. iv. Paints.
- c. Undertake a market survey for the cost and technical specification of different brands of following construction Materials and prepare comparison chart. i. Cement ii. Tiles iii. Glass iv. Paints.
- d. Collection of information related to recent technologies used in building construction.
- e. Identify the different types of cracks and remedial measures (Case Study).
- f. Collection of information related to different techniques of demolition of existing structure.
- g. Visit to the site to check different construction activities as per the checklist.

Assignment

Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which should be undertaken to accelerate the attainment of the various outcomes in this course:

Students should prepare **ASSIGNMENT ON EACH UNIT**.

SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Overview of construction Materials.	CO1	8	4	2	4	10
2	II	Special Building Construction Materials.	CO2	3	2	2	2	6
3	III	Construction of substructure & Superstructure.	CO3	12	4	6	10	20
4	IV	Building Communication.	CO4	8	2	4	6	12
5	V	Building Finishes.	CO5	10	4	4	6	14
6	VI	Formwork and Allied Techniques.	CO6	4	2	2	4	08
Grand Total				45	18	20	32	70

I. ASSESSMENT METHODOLOGIES/TOOLS

Formative assessment (Assessment for Learning) - Term work, Self-Learning (Assignment) , Question Answer in Classroom, Quiz and Group Discussion.

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

Summative Assessment (Assessment of Learning - Pen Paper test / Oral Exam/ Practical Exam

Instructional Methods:

1. Lectures cum Demonstrations,
2. Classroom practices.
3. Use of projector and soft material for demonstration

Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

II. SUGGESTED LEARNING MATERIALS / BOOKS

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Surveying is generally used to make land maps and boundaries. The development of engineering survey is the basic foundation to ensure the quality of the project, because it can provide accurate data for the subsequent construction. Surveying is involved in everything right from accurately drawing boundaries between private and public land, to inspecting bridges and other critical infrastructure. Without surveying, the placement security, and safety of projects cannot be assured. Therefore, the students are required to develop such competency to carry out the given type of survey using relevant equipment's so as to prepare the plan to interpret the information to take the appropriate decisions. This course will help the students in achieving in above mentioned goal.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Prepare plans and Contour maps using Surveying Equipment's and Techniques.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH302-1 State the importance of survey

CEH302-2 Determine distances with various linear instruments & Calculation of area.

CEH302-3 Setting up plane table and finding out area and distance.

CEH302-4 Determine reduced levels by different methods & Draw contour by interpolation & other methods.

CEH302-5 Measurement of horizontal and vertical angles by theodolite.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/ps) matrix

[Note: Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "0"

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	*Measure the distance between two intervisible survey stations using chain, tape and ranging rods.	CEH302-2
2	*Determine area of open field using chain and cross staff survey.	CEH302-2
3	Determine area of irregular field using Digital Planimeter	CEH302-2
4	*Measure Fore Bearing and Back Bearing of survey lines of open traverse using Prismatic Compass	CEH302-2
5	*Measure Fore Bearing and back bearing of a closed traverse of 5 to 6 sides and correct the bearings and included angles.	CEH302-2
6	*Prepare plans and locate details by using Radiation Method.	CEH302-3
7	*Prepare plans and locate details by Intersection Method	CEH302-3

Sr. no	Laboratory experiences	CO
8	*Prepare traverse using Plane table Surveying	CEH302-3
9	Prepare plan to establish plant nursery	CEH302-3
10	*Determine Reduced Level by Height of Instrument Method	CEH302-4
11	*Determine Reduced Level by Rise and Fall Method	CEH302-4
12	*Perform Fly Levelling to check levelling work	CEH302-4
13	Undertake differential leveling by using dumpy level/Auto Level and leveling staff for Installation of irrigation pipelines	CEH302-4
14	Prepare Contour Plan/map using Block Contouring for the area of 40m x 40m to draw its contour plan	CEH302-4
15	Prepare Contour plan for control farming using block contouring method	CEH302-4
16	Measure Horizontal angle by using Transit Theodolite by Direct Method	CEH302-5
17	*Measure Horizontal angle by using Transit Theodolite by method of Repetition	CEH302-5
18	*Measure vertical angle using Transit Theodolite	CEH302-5
PROJECTS		
1	*Profile leveling and cross-sectioning for a road length of 300 m with cross-section at 20 m interval. (Compulsory).	CEH302-4
2	*Plotting contour map using block contouring method for a block of 150m x 150m with grid of 10m x 10m for given land parcel. (Compulsory).	CEH302-4
3	*Use transit theodolite to carry out Survey Project for closed traverse for minimum 5 sides (Compulsory).	CEH302-5
<p>Note : Out of above suggestive LLOs - '*' Marked Practicals (LLOs) Are mandatory. Minimum 80% of above list of lab experiment are to be performed. Judicial mix of LLOs are to be performed to achieve desired outcomes.</p>		

II) Theory

Section I

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO CEH302:-4: Determine reduced levels by different methods & Draw contour by interpolation & other methods.			
4	Levelling and Contouring 4.1 Terminologies: Level surfaces, level line, Horizontal and vertical surfaces, Datum, Bench Marks- GTS, Permanent, Arbitrary and Temporary, Reduced Level, Line of collimation, Back sight, Fore sight, intermediate sight, Change point, Height of instruments 4.2 Types of levels: Dumpy, Auto level, Digital level, Fundamental axis of Dumpy Level. Temporary adjustments of Level. 4.3 Types of Levelling Staffs: Self-reading staff and Target staff. 4.4 Reduced level by Plane of collimation method and Rise/ Fall Method 4.5 Find the R. L. by H.I. method with necessary checks (Numerical problems) 4.6 Find the R.L by Rise and Fall method with necessary checks. (Numerical problems) 4.7 Types of Leveling : Simple, Differential, Fly, Profile and Reciprocal Levelling 4.8 Contour, contour interval, horizontal equivalent.	12	20

	4.9 Contour maps: Characteristics and uses of Contour maps 4.10 Methods of Locating Contour: Direct and Indirect		
CO CEH302 -5: Measurement of horizontal and vertical angles by theodolite.			
5	Theodolite Surveying 5.1 Types and uses of Theodolite; Component parts of transit Theodolite and their functions, Reading the Vernier of transit Theodolite 5.2 Technical terms- Swinging, Transiting, Face left, Face right 5.3 Fundamental axes of transit Theodolite and their relationship 5.4 Temporary adjustment of transit Theodolite 5.5 Measurement of horizontal angle- Direct and Repetition method, Errors eliminated by method of repetition 5.6 Measurement of vertical Angle 5.7 Theodolite traversing by included angle method and deflection angle method 5.8 Checks for open and closed traverse, Calculations of bearing from angles 5.9 Traverse computation-Latitude, Departure, Consecutive coordinates, independent coordinates, Balancing the traverse by Bowditch's rule and Transit rule, Gale's Traverse table computation	12	16

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Assignments under SLA

Sr.No	List of Assignment (under SLA)	Hrs Allotted
1	Explain one method each to measure the distance between points on either side of obstacles in case of following: River, Lake, Building.	2
2	Set the alignment of proposed road using Theodolite	2
3	Interpret the given contour maps.	2
4	Draw the representative contour maps for the following: Ridge of a mountain, Hillock, Valley, Pond/lake, Gent slope, Very Steep Slope, Plain Surface	2
5	Determine the reservoir capacity from a give contour map of reservoir. Measure area of small open ground by plane tabling.	4
6	Measure the height of the flag post using Theodolite.	2
7	Determine the reservoir capacity from a give contour map of reservoir.	4

List of Micro Projects (Under SLA)		
1	Collect the contour maps of different terrains available with various authorities & prepare a report on its interpretation.	
2	Determine the RLs of the components of existing structures like Plinth, lintels, chajja, slab, and beam etc	
3	Prepare a flex chart to explain one method of plane tabling.	
4	Compare Traversing with plane table and compass method.	
5	Perform reconnaissance survey for plotting the alignment of road	
6	Observe Topographical maps and interpret the details	
7	Carry out comparative study of following survey instruments of different make and brands : Auto level and Dumpy Level	
8	Collect the map of city /town and calculate the ward wise and total area using digital planimeter.	
9	Collect the information of survey instruments available in the market with their specifications.	
Note : “These are the just suggestive topics. Faculty must design Microproject/Activities/ Assignments based on Course Outcome requirements”.		

H : Specification table for setting question paper for semester end theory examination

I :-Assessment Criteria

i) Formative Assessment of Practical :-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05

	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical :

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

Programme :- ALL
Semester : THIRD
Course Title : ESSENCE OF INDIAN CONSTITUTION
Course Code :- CCH205

I. RATIONALE

This course will focus on the basic structure and operative dimensions of Indian Constitution. It will explore various aspects of the Indian political and legal system from a historical perspective highlighting the various events that led to the making of the Indian Constitution. The Constitution of India is the supreme law of India. The document lays down the framework demarcating the fundamental political code, structure, procedures, powers, and sets out fundamental rights, directive principles, and the duties of citizens. The course on constitution of India highlights key features of Indian Constitution that makes the students a responsible citizen. In this online course, we shall make an effort to understand the history of our constitution, the Constituent Assembly, the drafting of the constitution, the preamble of the constitution that defines the destination that we want to reach through our constitution, the fundamental right constitution guarantees through the great rights revolution, the relationship between fundamental rights and fundamental duties, the futurist goals of the constitution as incorporated in directive principles and the relationship between fundamental rights and directive principles.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry /employer expected outcome – Abide by the Constitution in their personal and professional life.

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

IV. TEACHING-LEARNING & ASSESSMENT SCHEME

CCH205	ESSENCE OF INDIAN CONSTITUTION	EIC	VEC	1	-	-	1	2	1	-	-	-	-	-	-	-	-	50	20	50

Total IKS Hrs for Sem. : 4 Hrs

Abbreviations: CL- Classroom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination
 Note :

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1 credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

CO1 - List salient features and characteristics of the constitution of India.

- CO2 - Follow fundamental rights and duties as responsible citizen and engineer of the country.
 CO3 - Analyze major constitutional amendments in the constitution.
 CO4 - Follow procedure to cast vote using voter-id.
 CO5-List the roles and responsibilities of State Election Commission towards peoples in the state.
 CO-6 List Judiciary provisions for the peoples in general

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

SECTION-I		
Sr. No.	Topics / Sub-topics	Lectures (Hours)
1	CCH 205. 1. The Constitution:- 1.1 Introduction. 1.2 The History of making of the Indian Constitution. 1.3 Basic structure and its interpretation. 1.4 Fundamental Rights and Duties and their interpretation	2
2	CCH 205. 2. Union Government 2.1 Structure of the Indian Union. 2.2 President –Role and power. 2.3 Prime minister and council of ministers. 2.4 Lok Sabha and Rajya Sabha. 2.5 Union Territories and their limitations.	3
3	CCH 205.3 State Government. 3.1 Governor –Role and power. 3.2 Chief Minister and council of ministers. 3.3 State secretariat. 3.4 Administrative Regions of Maharashtra.	3
SECTION -II		
4	CCH 205.4 Local Administration:-Their roles and responsibilities 4.1 District Administration. 4.2 Municipal Corporation. 4.3 Zilla Panchayat 4.4 Taluka (Tahasil) Administration .	2
5	CCH 205. 5. Election Commission. 5.1 Role and functioning. 5.2 Chief Election Commissioner –Appointment. 5.3 State Election Commission. 5.4 Elections and duties of government /Non government servants – introduction	2
6	CCH 205. 6. Introduction to Judiciary Provisions :- 1.1 Introduction 1.2 Different courts. 1.3 Government legal advisor-provisions. 1.4 Limitations of courts and co-ordination with Home department.	3

VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES : N.A.

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

- 1.Outline the procedure to submit application for Voter-id

2. Assignments are to be provided by the course teacher in line with the targeted COs.
3. Prepare an essay on Constitution of India .
4. Prepare a comparative chart of Unique features of Indian Constitution of India and Constitution of USA
 [Assignments are to be provided by the course teacher in line with the targeted COs. A1. Prepare an essay on .Constitution of India . A2 Prepare a comparative chart of Unique features of Indian Constitution of India and Constitution of USA A3. Self-learning topics: Parts of the constitution and a brief discussion of each part Right to education and girl enrollment in schools. GER of Girls and Boys. Right to equality. Social Democracy. Women Representation in Parliament and State Assemblies.]

Micro project :- Organize a workshop-cum discussions for spreading awareness regarding Fundamental Rights of the citizen of the country

1. Prepare elaborations where directive principle of State policy has prevailed over Fundamental rights with relevant Supreme Court Judgements.
2. Organize a debate on 42nd, 97th and 103rd Constitutional Amendment Acts of Constitution of India.

Seminar

- 1 Differences in the ideals of Social democracy and Political democracy.
- 2 Democracy and Women's Political Participation in India.
- 3 Khap Panchayat - an unconstitutional institution infringing upon Constitutional ethos.
- 4 Situations where directive principles prevail over fundamental rights.

Group discussions on current print articles.

- Art 356 and its working in Post-Independent India.
- Women's Resrvation in Panchayat leading to Pati Panchayats - Problems and Solutions.
- Adoption of Article 365 in India.
- Need of Amendments in the constitution.
- Is India moving towards a Unitary State Model ?

Activity

Arrange Mock Parliament debates.

Prepare collage/posters on current constitutional issues.

- i. National (Art 352) & State Emergencies (Art 356) declared in India.
- ii. Seven fundamental rights.
- iii. Land Reforms and its effectiveness - Case study of West-Bengal and Kerala.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED : NOT APPLICABLE

IX. SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Constitution and Preamble	CO1	4	-	-	-	-
2	II	Fundamental Rights and Directive Principles	CO2	4	-	-	-	-
3	III	Governance and Amendments	CO3	4	-	-	-	-
4	IV	Electoral Literacy and Voter's Education	CO4	3	-	-	-	-
Grand Total				15				

X. ASSESSMENT METHODOLOGIES/TOOLS

Formative assessment (Assessment for Learning): Suggested Proformas are to be used for ASSESSMENT.

Assignment, Self-learning and Terms work Seminar/Presentation

Summative Assessment (Assessment of Learning):- Suggested Proformas are to be used for ASSESSMENT

XI. SUGGESTED COS - POS MATRIX FORM

Course Outcomes (COs)	Programme Outcomes (POs)							Programme Specific Outcomes* (PSOs)		
	PO-1 Basic and Discipline Specific Knowledge	PO-2 Problem Analysis	PO-3 Design/ Development of Solutions	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2	PSO-3
CO1	1	-	-	-	2	-	-			
CO2	1	-	-	-	2	-	-			
CO3	1	2	-	-	2	-	1			
CO4	-	-	-	1	-	-	-			

Legends :- High:03, Medium:02,Low:01, No Mapping: -
 *PSOs are to be formulated at institute level

XII. SUGGESTED LEARNING MATERIALS / BOOKS

Sr.No	Author	Title	Publisher with ISBN Number
1	P.M.Bakshi	The Constitution of India	Universal Law Publishing, New Delhi 15th edition, 2018, ISBN: 9386515105 (Check the new edition)
2	D.D.Basu	Introduction to Indian Constitution	Lexis Nexis Publisher, New Delhi, 2015, ISBN:935143446X
3	B. K. Sharma	Introduction to Constitution of India	PHI, New Delhi, 6th edition, 2011, ISBN:8120344197
4	MORE READS :	Oxford Short Introductions - The Indian Constitution by Madhav Khosla. The Indian Constitution: Cornerstone of a Nation by Granville Austin. Working a Democratic Constitution: A History by Garnville Austin Founding Mothers of the Indian Republic: Gender Politics of the Framing of the Constitution by Achyut Chetan. Our Parliament by Subhash C. Kashyap. Our Political System by Subhash C. Kashyap. Our Constitution by Subhash C. Kashyap. Indian Constitutional Law by Rumi Pal.	Extra Read
5	B.L. Fadia	The Constitution of India	Sahitya Bhawan, Agra, 2017, ISBN:8193413768

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.
7. * Self learning includes micro project / assignment / other activities.

D. i) RATIONALE:-

The technology has brought the significant advancements in field of surveying. This will help civil engineers for accurate measurements of physical features of various construction projects and land with utmost accuracy, speed and easy operation of these surveying equipment's. The data obtained by various advanced surveying equipment's includes information of topography, grading, elevation, distances etc. Such data obtained helps civil engineers for future project planning and effective execution. The advanced surveying also helps in identifying potential risks associated with construction projects. This course will help students to acquire skills associated with surveying of land and buildings.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Use the relevant instrument to undertake the survey of the given area.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

CEH 303 -1 - Use the Tacheometer to obtain relevant details of the terrain in given situation.

CEH 303 -2 - Set out a Simple Circular curve to finalize the alignment of the given element.

CEH 303 -3 – State the importance of Aerial Survey

CEH 303 -4 - Prepare layout plans using relevant surveying instruments.

CEH 303 -5 - Locate the co-ordinates of a given stations using the relevant technology.

CEH 303 -6 - Interpret the images of given terrain using Photogrammetry Techniques.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/pso) matrix [Note: Correlation levels : 1: Slight (Low), 2: Moderate (Medium), 3: Substantial (High), "0"]

Competency and Cos	Programme Outcomes POs and PSOs									
	PO 1 Basic and Discipline specific knowledge	PO 2 Problem Analysis	PO 3 Design / Development of solutions	PO 4 Engineering Tools, Experimentation and Testing	PO 5 Engineering Practices for society, sustainability and Environment	PO 6 Project Management	PO 7 Life-long Learning	PSO1 Plan and Design	PSO2 Construction and Maintenance	P Problem Solving on fieldSO3
Competency: Apply principles of surveying-1 to solve engineering problems	3	3	2	2	1	1	1	1	1	1
CEH 303 -1 - Use the Tacheometer to obtain relevant	3	3	2	2	2	1	2	1	2	2

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	*Determine the Tacheometric Constant	CEH 303 -1

Sr. no	Laboratory experiences	CO
2	*Determine reduced levels of given stations and horizontal distances by Tacheometric Method (Part I)	CEH 303 -1
3	*Determine reduced levels of given stations and horizontal distances by Tacheometric Method (Part II)	CEH 303 -1
4	*Setting out of a circular curve by offsets from Long Chord Method.	CEH 303 -2
5	*Determine horizontal and vertical distance by using EDM.	CEH 303 -4
6	*Determine Horizontal and vertical angles using Electronic Digital Theodolite	CEH 303 -4
7	Setting up the Total Station instrument on site for surveying.	CEH 303 -4
8	*Determine horizontal, vertical and slope distances using Total station equipment (Part I)	CEH 303 -4
9	*Determine horizontal, vertical and slope distances using Total station equipment. (Part II)	CEH 303 -4
10	*Determine horizontal angles using Total Station.	CEH 303 -4
11	*Determine vertical angles using Total Station.	CEH 303 -4
12	*Determine the Reduced Levels of given stations (Minimum 10 station)	CEH 303 -4
13	Stack out (transferring the data on ground) using Total Station.	CEH 303 -4
14	Road profile of 100m length using Total Station instrument.	CEH 303 -4
15	Contouring using Total Station instruments for the area of size 50 X 50 m	CEH 303 -4
16	*Locate the coordinates of a station with the help of GPS.	CEH 303 -5
17	Create the images of contouring map with given data (Photogrammetry images, etc) using the freeware/open source software.	CEH 303 -6
18	Create the images of Road Profile plan with given data (Photogrammetry images, etc) using the freeware/open source software.	CEH 303 -6
19	*Write a brief report on the visit to nearby surveying software laboratory for visualization of image creation of contouring map of given area using given data OR Arrange Expert Lecture OR Show study videos of Photogrammetry surveying.	CEH 303 -6
PROJECTS		
1	*Setting out a circular curve by Rankine's Method of Deflection Angles. (Project) . Plot the curve details on A1 size imperial drawing sheet.	CEH 303 -2
2	*Prepare Building site layout by using Total Station (Project) . Plot the project details on A1 size imperial drawing sheet.	CEH 303 -4
3	*Carry out 5-Sided closed traverse Surveying project by using Total Station. (Project) . Plot the traverse details on A1 size imperial drawing sheet.	CEH 303 -4
<p>Note: Out of above suggestive LLOs - '*' Marked Practical's (LLOs) Are mandatory. Minimum 80% of above list of lab experiment are to be performed. Judicial mix of LLOs is to be performed to achieve desired outcomes.</p>		

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CEH 303 -1 - Use the Tacheometer to obtain relevant details of the terrain in given situation.			
1	Unit - I Tacheometric Surveying 1.1 Principle of tacheometry, Use of Tacheometry 1.2 Tacheometer and its component parts, Analytic lens, Tacheometric formula for horizontal distance with telescope horizontal and staff vertical. 1.3 Methods of Tacheometry: Stadia and fixed hair method 1.4 Field method for determining constants of tacheometer, Limitations of tacheometry.	12	16
CEH 303 -2 - Set out a Simple Circular curve to finalize the alignment of the given element.			
2	Unit - II Curves setting 2.1 Curve: Definition, Necessity of Curves, Types of curves used in roads and railway alignments. 2.2 Elements of simple circular curve, Designation of the curve by Radius and Degree of curve. 2.3 Radius and Degree of curve. 2.4 Setting out a simple circular curve by offsets from long chord and Rankine's method of deflection angles.	08	12
CEH 303 -3 – State the importance of Aerial Survey			
3	Unit - III Aerial Surveying 3.1 Aerial surveying: Definition, principle, uses, methods 3.2 DGCA Classification of Drones 3.3 Silent features of Drone Rules, 2021 as per DGCA.	02	06

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CEH 303 -4 - Prepare layout plans using relevant surveying instruments.			
4	Unit - IV Advanced Surveying Equipment's 4.1 Electronic Distance Meter (EDM): Principle of Electronic Distance Meter (EDM), component parts and their Functions, use of EDM. 4.2 Electronic Digital Theodolite: Construction and Features of Electronic Digital Theodolite, procedure of angle	12	16

	<p>measurement.</p> <p>4.3 Total Station: Introduction, component parts with their functions, and Applications of Total Station, Temporary adjustments, sources of errors in Total Station, Measurements of Horizontal angles, vertical angles, distances and coordinates using Total Station. Traversing, Profile Survey and Contouring with Total Station.</p> <p>4.4 Building Site layout using Total Station: Procedure</p>		
CEH 303 -5 - Locate the co-ordinates of a given stations using the relevant technology.			
5	<p>Unit - V Remote sensing, GPS and GIS</p> <p>5.1 Remote Sensing : Definition, Electro-Magnetic Energy, Active and Passive system, Applications of remote sensing in Mining, land use / Land cover, mapping, disaster management and Environment.</p> <p>5.2 Global Positioning System: Introduction, Construction and use of Global Positioning System (G.P.S.)</p> <p>5.3 Geographic Information System (GIS): Overview, Component, Sources of errors, applications, Software's in GIS.</p>	08	14
CEH 303 -6 - Interpret the images of given terrain using Photogrammetry Techniques			
6	<p>Unit – VI Photogrammetry</p> <p>6.1 Definition of photogrammetry Basic Principles of Photogrammetry. Types of Photogrammetry: Terrestrial and Aerial Photogrammetry</p> <p>6.2 Types of Photographs, Terminology in aerial surveying.</p> <p>6.3 Merits and Demerits of Photogrammetry surveying</p> <p>6.4 Applications of Photogrammetry in civil engineering.</p>	03	06

G : List of Assignments under SLA

Sr.No	List of Assignment (under SLA)
1	Measure the height of the flag post in your institute using Theodolite as tacheometer.
2	Measure the height of the slab bottom of second floor of your institute building using Theodolite as tacheometer.
3	Set the alignment of proposed road using Theodolite as tacheometer.
4	Use freeware or open source software for image processing using photogrammetry principles
5	Plot the contours using Total station by direct method.
6	Mark building layout using Total station.
7	Measure distance between two distant(>500m) points using EDM
8	Locate the coordinates of the campus using GPS
9	Search and download the freeware/open source software and prepare a report stating the applications.

H : Specification table for setting question paper for semester end theory examination

List of Micro Projects (Under SLA)		
1	Carry out comparative study of following survey instruments of different make and brands: Total station/ EDM/GPS/Digital theodolite.	
2	Collect the relevant technical and commercial information of minimum five advanced survey instruments available in the market with specifications.	
3	Determine the RLs of the existing structures like lintels, chajja, slab, and beam using Tacheometer and Total station in a multistoried building and compare the results.	
4	Download specifications for Total Station/ EDM/GPS and make a chart.	
5	Set the profiles of curves at the changes in alignment of road in the premises of the institute (minimum two).	
6	Study the specifications of Mobile devices used for distance measurement.	
7	Collect the information on 360-degree laser	
8	Collect information of software required for mapping of images for photogrammetry.	
9	Collect the Information about Drone survey.	
10	Collect the information on Rover survey for land measurement	
<p>Note :</p> <p>Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.</p> <p>The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.</p> <p>If a microproject is assigned, it is expected to be completed as a group activity. SLA marks shall be awarded as per the continuous assessment record.</p> <p>If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.</p>		

Section / Topic no.	Name of topic	Distribution of marks (level wise)			Total marks	CO
		Remember	Understand	Apply		
I / 1	Tacheometric Surveying	02	04	10	16	CEH 303 -1
I / 2	Curve Setting	02	04	06	12	CEH 303 -2
I / 3	Aerial Surveying	02	04	00	06	CEH 303 -3
II / 4	Advance Survey Equipment's	04	06	06	16	CEH 303 -4
II / 5	Remote sensing, GPS and GIS	02	06	06	14	CEH 303 -5
II / 6	Photogrammetry	02	04	00	06	CEH 303 -6
Total Marks					70	

I: - Assessment Criteria

i) Formative Assessment of Practical: -

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

	30	70	100	40	25	10	25	10	25	10	

(Total IKS Hrs for Sem. : 01 Hrs)

C. Abbreviations: CL- ClassRoom Learning , TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination , @\$ Internal Online Examination

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
 2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
 3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
 4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
 5. 1(one) credit is equivalent to 30 Notional hrs.
 6. * Self learning hours shall not be reflected in the Time Table.
- * Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D.i) RATIONALE:-

Building planning and drawing are critical components of the construction process, enabling stakeholders to visualize, communicate, problem-solve, comply with regulations, estimate costs, guide construction, and ensure quality throughout the project lifecycle. In today's era of globalization and technology revolutions, it is necessary to prepare the civil engineering drawings in such a way that it can be prepared with utmost precision and accuracy. This course is therefore planned with the goal of developing such competency among the learners.

ii)INDUSTRY / EMPLOYER EXPECTED OUTCOME

Prepare Drawings of the given building structure with required specifications.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning.

CEH304-1 Draw different types of lines.

CEH304-2 Apply building byelaws for planning of building.

CEH304-3 Apply principles of planning for planning and design of building.

CEH304-4 Planning of public buildings.

CEH304-5 Prepare presentation drawings

CEH304-6 Development of residential buildings Plan.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/pso) matrix

D) PRACTICALS/EXERCISES

Practical Exercises and related skills to be developed:

The following practical exercises shall be conducted as practical sessions of batches of about 20 students: Drawing on full imperial sheet ,size A1 paper.

Sr. No.	Title of Practical/Exercise	Skills/ Competencies to be developed	Course outcome
1	Measured Drawing – of small residential building (single storey) with minimum two rooms, kitchen, and sanitary block consisting of plan, Elevation, section, schedule of opening, site plan, and construction notes.	1. Measure the units of existing building(Load bearing/ Framed structure) 2. Drawing of submission drawing	CEH304-3 CEH 304-1, CEH304-2, CEH304-3
2	Reading and interpreting readymade Architectural building drawing – (Drawing to be procured by student from consulting Engineer/ Architect) students should read and interpreting the drawing and write a report.	1. Observation of Technical details	CEH 304-1, CEH304-2
3	Submission drawing, to the scale 1:100, of single storied Load Bearing Residential Building (2BHKD) with Flat Roof and staircase showing developed plan, Elevation, section passing through Stair or W.C. and Bath, site plan (1:200), area Statement, schedule of openings and	Drawing of submission drawing	CEH 304-1, CEH304-2, CEH304-3, CEH304-6

		construction notes.		
4	Submission drawing, to the scale 1:100, of (G+1) Residential Building Framed Structure (2 BHKD) with attached toilet to 1 bedroom showing developed plan, elevation, section passing through staircase, Site plan (1:200), area statement, schedule of openings and construction notes.	Drawing of submission drawing	CEH 304-1, CEH304-2, CEH304-3, CEH304-6	
5	Working drawing of above G+ 1 building showing foundation plan (1:50), RCC column and footing, RCC beam, RCC Chajja and RCC staircase.	Drawing of working drawing	CEH304-3	
6	Two Point Perspective Drawing of small objects - steps, monuments, pedestals (any two) scale 1:50	Drawing of presentation drawing	CEH304-5	
7	Line Plan – Of any two public building on full imperial graph sheet.	Drawing of public building	CEH304-4	

CONTENT: THEORY

Section – I

Sr. No.	Topics / Sub-topics	Lectures (Hours)	Theory Evaluation (Marks)
<i>Course Outcome-</i> CEH304-1 Draw different types of lines.			
1	<p>Introduction</p> <p>1.1 Purpose of drawing, preliminary requirement of good drawing.</p> <p>1.2 Symbols & notations as per IS 962:1989 in civil engineering drawing such as earth work, brick work, stone work, concrete, wood work and glass used in civil engineering. Symbols for door, window, sanitary, electrical installations.</p> <p>1.3 Types of lines-visible line, center line, hidden line, section line, dimension line, extension line, pointers, arrow heads or dots, north point. Scales for various types of drawings.</p> <p>1.4 Types of scales- Monumental, intimate, human and shock scale. Selection of scale for specific drawing.</p>	05	04
<i>Course Outcome-</i> CEH304-2 Apply building bye-laws for planning of building.			

2	<p>Agencies in Building construction work.</p> <p>2.1 Role of different agencies in building construction work – such as Owner, architects, structural engineer, contractor, promoter, quantity surveyor and supervisor, specialist of air conditioning, acoustics, lifts, interior decoration etc.</p> <p>2.2 Building bye laws –Definition, objectives of bye laws, The Municipalities, Corporations published their rules & bye laws regarding building activities. Student is expected to know the following terminology – plot area, Margins,built – up-area, carpet area, plinth area, floor area, FAR/FSI.</p> <p>2.3 Plan sanctions authorities- such as gram panchayat, Municipal Corporation, town planning etc.</p> <p>2.3.1 Procedure for submitting plan for sanctioning.</p> <p>2.3.2 List of documents required and number of copies.</p>	05	06
Course Outcome-CEH304-3 apply principles of planning for planning and design of building.			
3	<p>Planning of Residential Building –</p> <p>3.1 Principles of planning of buildings –aspect, prospect, roominess, grouping, circulation, privacy, flexibility, furniture requirement, sanitation, elegance, economy, Orientation of Building (IKS-Orientation of Indian Heritage Structures such as Mahalaxmi Temple, Kolhapur, Concept of Vastushastra for building planning.)</p> <p>3.2 Space requirements and norms for various units of residential buildings.</p> <p>3.3 Minimum / standard dimensions of various units such as W.C., Bath, Otta height , Plinth height , Window sill height , Garage height etc.</p> <p>3.4 Drawing line plan for residential building.</p> <p>3.5 Planning of staircase in available space, Working drawing of RCC staircase, column, column footing, Beam, chajja etc.</p>	06	08
Course Outcome -CEH304-4 Planning public buildings.			
4	<p>Planning of public buildings –</p> <p>4.1 Planning of public building such as school building, primary health centre or hospital building, post office, banks, hostels, restaurant etc. Units required for each type of building with their approximate sizes. Grouping of various units with their functional requirements. (In examination only line plans of the same should be asked)</p>	04	06
Course Outcome -CEH304-5 Prepare presentation drawings			

5	<p>Perspective drawings –</p> <p>5.1 Definition, necessity and principles of perspective drawing.</p> <p>5.2 Terms used in perspective drawing such as picture plane, station point, vanishing point, angle of vision, center of vision etc.</p> <p>5.3 Types of perspective such as one point perspective, two point perspective</p> <p>5.4 Concept of one point and two point perspective and its application. (In examination small objects such as steps block, pedestal may be asked to draw one or two point perspective)</p>	04	10
	<i>Total</i>	24	34
(Semester end exam question paper should be such that total marks of questions on each topic are one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted.)			

Section II

Sr. No.	Topics / Sub-topics	Lectures (Hours)	Theory Evaluation (Marks)
<i>Course Outcome - CEH304-6 Design of residential buildings.</i>			
6	<p>Drawing of residential Building</p> <p>6.1 Detail development of line plan with orientation.</p> <p>6.2 Elevation</p> <p>6.3 Section</p> <p>6.4 Site plan and North direction.</p> <p>6.5 Preparing schedules of doors / windows</p> <p>6.6 Calculation of areas such as plot area, built-up-area, carpet area, floor area, plinth area, F.S.I./F.A.R.</p> <p>6.7 General construction notes, general specifications etc.</p> <p>6.8 Foundation plan.</p> <p>Note – In examination a small single storied residential building load bearing/ framed structure for development of line plan should be asked.</p>	06	36
	Total	06	36
Semester end exam question paper should be such that total marks of questions on the topic is 36 having no options and is compulsory.			

G : List of Assignments under SLA

SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR

SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

Micro project

Suggested Micro-projects: Any one project for group of three to five students.

- 1) Prepare report on provisions given in National Building Code 2005.
- 2) Collect and study building Bye laws, rules and regulation for planning any two competent authority such as Gram- Panchayat/Municipal Corporation/Metro Cities/Town Planning Department.
- 3) Prepare list of the documents required for obtaining permission for construction of residential building/apartment from competent authority and write report.
- 4) Develop plan of any public building
- 5) Draw one / Two point perspective of small building
- 6) Prepare a model of small building with waste packaging materials and apply principles of planning.
- 7) Prepare a report on IS-962:1989 - Code of practice for architectural and building drawings

Self Learning

1. List any five software's used for building planning and drawing.
2. Prepare a model of a simple building using cardboard showing different components with suitable color.
3. Prepare line plan as per given requirement. (Any THREE -- other than mentioned in curriculum)
4. Free Online Courses on Auto CAD by NPTEL /Coursera/IGNOU/SWAYAM

Assignment

1. State and explain the classification of residential buildings with respect to Planning such as Row House/Apartments/detached /Semi-detached Buildings
 2. Explain the Role of Architect, Structural Engineer and Supervisor in Planning of Building.
 3. Prepare a report on BUILDING PLAN MANAGEMENT SYSTEM -By Urban Development Department Government of Maharashtra.
 4. Prepare a report on Building Plan Approval Process as per NBC -2005
- ** No questions will be asked on IKS learning subtopics in any question papers**

Note :

Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.

The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.

If a microproject is assigned, it is expected to be completed as a group activity. SLA marks shall be awarded as per the continuous assessment record.

If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

Note – In Section II, line plan of small residential building shall be given & students are asked to prepare the following

- | | |
|---|--------------|
| 1. Detailed plan | – 08 marks |
| 2. Front Elevation | -- 06 marks |
| 3. Section (section line shall be given on line plan) | -- 10 marks. |
| 4. Schedule of doors & windows | -- 06 marks. |
| 5. Area statement | -- 05 marks |
| 6. North Line | -- 01 marks. |

H : Specification table for setting question paper for semester end theory examination

Topic No.	Name of topic	Distribution of marks (Cognitive level-wise)			Course Outcome	Total Marks

INDUSTRIAL EXPOSURE:

SN	Mode of Exposure	Topic
1.	Field Visits 1.Existing construction sites	For related topic

I :-Assessment Criteria

i)Formative Assessment of Practical

Every practical assignment shall be assessed for 25 marks as per following criteria

ii) Summative Assessment of Practical :

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

Domain	Particulars	Marks out of 25
Cognitive	Understanding	02
	Application	03
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
	Decency and presentation	05
TOTAL		25

INSTRUCTIONAL STRATEGIES :

J) Instructional Methods:

1. Lectures cum Demonstrations
2. Classroom practices
- 3.Massive open online courses (**MOOCS**)may be used to teach various topics/subtopics.
- 4.About**15-20% of the topics/subtopics** which relatively simpler or descriptive in nature is to be given to the students for **self directed learning** .

Suggested Micro-projects:

Only one micro-project is planned to be undertaken by the student that needs to be assign him/her in the beginning of the semester. The groups of students is to be formed and the no.

of students in the group should not exceed five. A suggestive list of Micro-Projects is given in Practical's/Exercise table. Similar Micro-Projects could be added by Concerned faculty.

K) Teaching and Learning resources:

Teaching and Learning resources:

1. Chalk board
2. LCD presentations
3. Audio/ video presentations Demonstrative kits, Demonstrative charts
4. Question Bank

Legends: @Internal Assessment, #External Assessment, *#OnLine Examination, @\$Internal Online Examination

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.*15Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. *Self learning hours shall not be reflected in the Time Table.

*Self learning includes microproject /assignment/other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

The course caters to the need of technician engaged in the investigation, planning, construction and maintenance of road, bridge, railway and tunnels. In practical field such a component of transportation is a specialized branch of engineering. This subject aims to imparting basic knowledge about roads, railways, bridges and tunnels in respect of their various types, materials used functions of component parts, method of construction, planning, aspects of supervision and maintenance.

ii) INDUSTRY/EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences.

1. Investigation, planning, construction and maintenance of road, bridge, railway and Tunnels.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH305-1 Identify types of roads and implements the geometrical design features of Different types of roads.

CEH305-2 Construction methods of different types of roads.

CEH305-3 Choose the shape of tunnel & identify the methods of tunnel surveying and its Construction.

CEH305-4 Identify different component parts and functions of permanent way.

CEH305-5 Identify the terms related to permanent way & track maintenance.

CEH305-6 Illustrate site selection, component parts and maintenance of bridge.

Competency, course outcomes and programme outcomes/programme specific outcomes

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in the *Laboratory for Transportation Engineering developed* by the Institute in practical sessions of batches of about 20- 22 students:

Sr No.	Title of Practical Exercise	Skills / Competencies to be developed	Course Outcome
1.	A)List of Practicals :- (Any five) 1. Penetration test on bitumen. 2. Softening point test on bitumen. 3. Ductility test on bitumen. 4. Flash and fire point test on bitumen. 5. Viscosity test on bitumen 6. Extraction of bitumen	1. Self learning ability using laboratory journal 2. Applying concepts stud 3. Drawing real view diagrams of equipment's. 4. Time management and team working skills. 5. Presentation skills 6. Information collection regarding grade of bitumen. 7. Understand different properties of bitumen.	CEH305-3

2.	Visits Report with detailed Report (any four):- 1) Visit to WBM road under construction 2) Visit to concrete road under construction 3) Visit to Bituminous road under construction 4) Visit to Bridge site to study component parts 5) Visit to Railway station to study station details and track geometric.	1. Time management, team working. 2. Studying component parts of roads, railways, bridges. 3. Understand, prepare and interpret the drawings related to work. 4. Understand the procedure of construction of different types of road.	CEH305-3 CEH305-6 CEH305-10
----	---	--	-----------------------------------

II) Theory

Section I

Sr. no.	Topics	Teaching (Hours)	Theory evaluation Marks
A) Roads			
Course Outcome CEH305-1 Identify types of roads and implements the geometrical design features of different types of roads.			
1	Introduction with Geometric Design 1.1 Importance of Transportation Engg. History of the Road development in India (*IKS- Ancient Roads) 1.2 Classification of Roads 1.3 Alignment- selection, requirement & factors affecting 1.4 Geometric elements/ Technical terms of road pavements - Cross section in embankment & in cutting, right of way, width of carriage way, shoulder, camber – definition and objects. With IRC values. Cross section in embankment & in cutting, right of way, width of carriage way, shoulder, camber – definition and objects. With IRC values, Design speed 1.5 Gradients – definition - types, IRC values, sight distance – types and various components. 1.6 Super elevation- Definition, minimum and maximum values and objects. 1.7 Brief introduction of traffic volume study.	09	12
Course Outcome CEH305-2 Construction methods of different types of roads.			
2	Construction of road 2.1 Introduction to Rigid & Flexible Pavements. 2.2 Concept of W.B.M Roads , Construction procedure 2.3 Technical terms - Bitumen, Asphalt, Cutback, Tar, Emulsion, Seal coat, Prime coat, Tack coat, surface dressing, grouted macadam, semi and full grout. 2.4 Construction procedure.-bituminous carpet, bituminous concrete, bituminous bound macadam 2.5 Concrete Roads - advantages and disadvantages, Construction procedure- Alternate and continuous bay method, Joints- necessity and types	10	12

Sr. no.	Topics	Teaching (Hours)	Theory evaluation Marks
B) Tunnel			
<i>Cour Outcome</i> CEH305-3 Choose the shape of tunnel & Identify the methods of tunnel surveying and its construction.			
3	3A. Introduction of tunnels 3A.1 History of development of tunnels in India (IKS). 3A.2 Necessity of tunnels. Advantages and disadvantages of tunnels. 3A.3 Shapes of tunnel & its suitability. 3A.4 Tunnel surveying - 3A.4.1 Initial surveys 3A.4.2 Setting out the alignment of tunnel on the ground 3A.4.3 Transferring the alignment through shafts 3A.4.4. Shaft – purpose and construction	06	06
	3B Tunneling – Construction & its maintenance 3B.1 Tunneling in soft rock –Different methods (only names),Shield method (Explain in brief) 3B.2 Tunneling in hard rock - Different methods(only names), full face heading method(Explain in brief) 3B.4 Lining of tunnels – purpose and factors affecting 3B.5 Tunnel Maintenance- Purpose measure to be taken for proper maintenance	05	04
	Total	30	34

Section –II

Sr. no.	Topics	Teaching (Hours)	Theory evaluation Marks
C) Railways			
<i>Course Outcome</i> CEH305-4 Identify different component parts and functions of permanent way.			
4	Permanent Way 4.1. History of development of railways, in India (IKS) Definition, requirements 4.2. coning of wheels. 4.3 Components of railway track: 4.3.1 Rails – Functions, types, dimensions of Flat Footed Rails, Creep of rails, Causes of creep. 4.3.2. Sleepers – Function of sleepers and their requirements, list of Sleepers, sleeper density. 4.3.3. Rail fixture and fastenings – Fish plate , spikes , their types , bolts , chairs , blocks , keys , bearing plates . 4.3.4. Ballast – Functions and requirements, different types, their merits and demerits 4.4 Gauges – Different types	08	12

Sr. no.	Topics	Teaching (Hours)	Theory evaluation Marks
Course Outcome CEH305-5 Identify the terms related to permanent way & track maintenance.			
5	5.1 Technical terms & track maintenance 5.1 Points and crossings- 5.1.1 Definition, necessity, important technical terms, 5.1.2 Left hand and Right hand turnouts 5.2 Stations and Yards – 5.2.1 Stations - Definition, site selection, requirements, Classification 5.2.2 Yards – Definitions ,types 5..2.3 Track Maintenance- Necessity, Classification, Tools required for track maintenance with their function, Organization of track maintenance, duties of permanent way Inspector, gang mate and key man.	11	11
D) Bridges			
Course Outcome CEH305-6 Illustrate site selection, component parts and maintenance of bridge.			
6	Bridge Components & its maintenance 6.1 History of development of bridges in India (IKS) Factors affecting Site selection and Alignment of Bridges 6.2 Substructure – foundation, pier, abutment, wing walls – Functions and types. 6.3 Superstructure components - Slab, Girder, Box only 6.4 Types of Bearings for R C C Bridge 6.5 Approaches- types 6.6 Afflux, span, scour, waterway, free board, clearance, economic span 6.7 Types of Bridges 6.7.1 Definition and Classification of Bridges 6.7.2 Definition and types of causeway (No sketches ask in exam) & culvert 6.7.3 Sketches , merits & demerits of RCC girder bridge, Prestressed girder bridge, simple suspension bridge Inspection & maintenance 6.8.1 Inspection of bridges-General points to be observed, Pre and post monsoon inspection Maintenance of bridges – types—routine and special Maintenance.	11	13
Total		30	36
Ssemester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.			

**** No questions will be asked on IKS learning subtopics in any question papers.**

CL- Class Room Learning, TL- Tutorial Learning, LL-Laboratory Learning, SLH-Self Learning Hours, NLH-Notional Learning Hours, FA - Formative Assessment, SA -Summative assessment, IKS - Indian Knowledge System, SLA - Self Learning Assessment

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination, @\$ Internal Online Examination.

FA-TH represents average of two class tests of 30 marks each conducted during the semester.

1. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
2. If candidate is not securing minimum passing marks in SLA of any course then the

candidate shall be declared as fail and will have to repeat and resubmit SLA work.

3. Notional Learning hours for the semester are (CL+LL+TL+SL) hrs.* 15 Weeks

4. 1(one) credit is equivalent to 30 Notional hrs.

5. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities.

D.RATIONALE:

As all the structures rely on the bearing strength of earth's surface for support, it's imperative to comprehend how soils behave under various mechanical forces. The behaviour of soil under load directly affects the design and foundation techniques. Civil Engineering diploma technicians are required to supervise the construction of roads, pavements, dams, embankments and other Civil Engineering structures. As such the knowledge of basic soil engineering is the pre-requisite for effective dealing with their job profile and role. This makes it necessary to introduce Geotechnical Engineering course in the curriculum for Diploma Course in Civil Engineering as value addition. This course aims to identify and classify the different types of soils, its origin, its properties and to apply principles of mechanics including hydraulics to the engineering problems related to soil.

Competency identified for the course:

The MPEC 2023 curriculum design based on MSBTE K curriculum guideline and NEP2020 policy incorporates all self and tutorial such as notional hours and non-national hours of learning. Indian knowledge system is also intended to explore through additional hours of learning during the semester. Subject is allotted 3 hrs. of class room learning and 2hrs of practical (lab) and 2 hrs. of self-learning. All these hrs. Of learnings including IKS learning are aimed at achieving following skills sets.

E. COURSE OUTCOMES (COs):

CEH306-1:Geology and its significance in Civil Engineering

CEH306- 2:To determine coefficient of permeability and seepage parameters of soil

CEH306-3 :To Determination Shear strength and stability parameters of soil

CEH306-4:To understand behavior of soil under loading and ground improvement techniques

CEH306-5:To understand types of foundations and determine bearing capacity of soil in shallow foundation

CEH306-6:To understand methods of exploring the sub soil before design of structure and to provide safety measures in construction of foundation.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/pso) matrix

F. CONTENT:

I) LABORATORY WORK

Practical Exercises and related skills to be developed

The following exercises shall be conducted as practical work as detailed in laboratory manual for Geotechnical engineering produced by the department as manual for batches of about 20- 22 students.

In A part any 10 practicals are to be performed along with Part B (mandatory)

Sr. No.	Laboratory Experience	Skills / Competencies to be developed	
A	Any 10 Experiments		
1	Determination of water content by oven drying method	<p>Follow IS code procedures for tests.</p> <p>Studying equipment.</p> <p>Understanding test procedure</p> <p>Accuracy in taking observation.</p> <p>Reinforcement of Concepts.</p> <p>Performing calculation and plotting graphs. from observation.</p> <p>Interpreting test results.</p> <p>Classifying materials as per IS standards.</p> <p>Finding quality of material.</p>	
2	Determination of specific gravity by pycnometer method.		
3	Mechanical analysis of soil		
4	Determination of liquid limit by Casagrande's apparatus		
5	Determination of plastic limit		
6	Determination of liquid limit by cone penetrometer		
7	Determination of Shrinkage limit		
8	Determination of field unit weight by core cutter method.		
9	Determination of field unit weight by sand replacement method.		
10	Determination of soil permeability by lab test either constant head or falling head method		
11	Determination of OMC and MDD by standard Proctor test		
12	Determination of shear strength by direct shear test		
13	Vane shear test		
14	Determination of CBR by laboratory/Field method		
15	Standard penetration test/plate load test demo /vedio		
16	Calculation of bearing capacity of soil using Liquid limit and plastic limit of soil		
17	Unconfined compression test		
B	Site visit report –foundation details/soil exploration /site investigation /pavement design /shear strength determination		

II) THEORY:

Section I

Sr no	Course content	Lecture hours (class room learning)	Theory Assessment marks
CO: CEH-1 Determination of the elementary properties of soil and classification of soil			
1	<p>Introduction to Geology and index properties of soil:</p> <p>1.1 Introduction to Geology –Definition , branches and importance of geology</p> <p>1.2 Earth and its composition</p> <p>1.3 Formation of rock –petrology, classification based on genesis</p> <p>1.4 Soil map of India, soil in India,Local soil found in Maharashtra. Geological origin of soils with special reference to soil profiles in India: residual and transported soil, alluvial deposits, lake deposits</p> <p>1.4 I.S. definition of Soil, Three phase system, weight and volume relationships, Void ratio, Porosity, relative density ,Inter-relationships between Water content, Degree of saturation, Specific gravity,</p> <p>1.5 Atterberg’s limits of consistency and their determination, plasticity index,</p>	06 hours	10 marks
CO: CEH-2 Determination of coefficient of permeability and seepage parameters of soil			
2	<p>Soil classification and properties</p> <p>2.1 Soil Classification ...(04marks) Necessity of soil classification, IS classification, Grain size distribution, Mechanical analysis, Use of semi log paper to draw Particle size distribution curve, Effective diameter of soil, Uniformity coefficient, Coefficient of curvature. Numerical problem</p> <p>2.1Permeability:(04marks) Adsorbed water, absorbed water, pore water, Capillarity water, shrinkage and swelling of soil, Permeability of soil and factors affecting , effective stress, Darcy’s law, Laboratory method to determine coefficient of permeability by constant head and falling head method as per IS - 2720, Numerical problem to determine coefficient of permeability</p> <p>2.2Seepage:..... (04 marks) Seepage through soil mass; Flow net and its application. Quick sand condition, Numerical problem on seepage calculation through flow net, List of Methods to obtain flow net</p>	09hours	12marks

CO: CEH-3 Determination of Shear strength and stability parameters

3	<p>Shear strength and soil pressure</p> <p>3.1 Shear strength of soils ... (06 marks) Coulomb's theory and failure envelop. Strength equation, Representation of stresses by Mohr's circle for Cohesive, non-cohesive, saturated, partly saturated soil. Factors affecting shear strength and various strength tests to determine shear strength and their suitability. Types pavement ; CBR test for flexible pavement design – interpretation of values.</p> <p>3.2 Earth Pressure ... (06 marks) Lateral earth pressure, Rankine's theory, Concept of earth pressure. Active and passive earth pressure Types of earth retaining structures, Earthen embankments and their stability. Numericals to calculate coefficient of earth pressures.</p>	08 hours	12 marks
	Total	23	34

Section II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CEH-4 : To understand behavior of soil under loading and ground improvement techniques			
4	<p>Soil stabilization techniques</p> <p>4.1 Soil Compaction (06marks) Compaction phenomenon, Purpose, field application, standard Proctor test, modified proctor test, difference between standard and modified compaction test, Compaction curve, factors affecting compaction, Field methods of compaction. Numerical to calculate amount of compaction</p> <p>4.2 Soil consolidation: (04marks) Meaning, conditions/situations of occurrence with emphasis on practical significance of Consolidation and settlement</p> <p>4.3 Ground Improvement techniques: (02 marks) Stabilization, Stabilization methods</p>	08 hours	12 marks
CO: CEH-5 To understand types of foundations and determination of bearing capacity of soil in shallow foundation			

5	<p>Foundation- purpose (civil engineering structure /machine) and types .</p> <p>5.1 Shallow Foundations(02marks) Shallow foundation meaning types – spread, strap, combined, raft. Pressure distribution beneath rigid footing. IS criteria for depth of foundation</p> <p>5.2 Deep Foundations(02marks) Meaning of deep foundation, Use and classification of piles, Under-reamed piles, Well foundation – type, Caissons, Pier foundations</p> <p>5.3 Bearing Capacity of soil in shallow foundation:(12marks) Concept of bearing capacity, Ultimate, Safe, Allowable bearing capacity Bearing capacity concept & equation (IS equation and meaning of each term involved), (No derivation and problems), effect of water table, Presumptive bearing capacity values of different types of soils. Calculation of bearing capacity of soil using Liquid limit and Plastic limit, Numerical problem Field test to determine bearing capacity of soil: Plate load test, Standard penetration test. Foundation settlement, permissible settlement</p>	08 hours	16marks
<p>CO: CEH305-6 To determine soil properties at site by exploring the sub soil and to provide safety measures in construction of foundation</p>			
6	<p>Soil Investigation and soil exploration</p> <p>6.1 Soil Investigation: (04marks) Necessity of site investigation, List of Methods with brief introduction and its application (open excavation, boring, geophysical method) Soil sampling, disturbed and undisturbed samples, Bore log</p> <p>6.2 Safety measures during construction of foundation ... (02marks) Soil support methods , shuttering while excavation with variety of pile- sheet piles, Rackers, Tiebacks, Diaphragm walls, Cofferdam types, Dewatering methods</p> <p>6.3 Safety aspects while providing foundation (02 marks) Foundation treatments, Corrosion resistance, water proofing, epoxy coatings</p>	06hours	08 marks
Total		22	36

G. SLA (Self Learning Assessment)

It should be assessed by practical teacher.

Number of assignments /Microproject / model making/any other activity like making of chart etc are to be completed during the semester. (but it's announced before starting of the practical and same policy to every student in a batch)

H: Specification table for setting question paper for semester end theory examination

Section / Topic no.	Name of topic	Distribution of marks (level wise)			Total marks	CO
		Remember	Understand	Apply		
I / 1	Introduction to Geology and index properties of soil	2	4	4	10	CEH306-1
I / 2	Soil classification and properties	2	2	4	08	CEH306-2
I / 3	Shear strength and soil pressure	4	4	8	16	CEH306-3
II / 4	Soil stabilization techniques	4	4	4	12	CEH306-4
II / 5	Foundation- purpose (civil engineering structure /machine) and types	4	4	8	16	CEH306-5
II / 6	Soil Investigation and soil exploration	2	2	4	08	CEH306-6
Total Marks					70	

I:-Assessment Criteria

i) Formative Assessment of Practical: -

Every practical shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

End exam practical assignment shall be assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Attendance at regular practical	05

2	Preparedness for practical	05
3	Neat & complete Diagram.	05
4	Observations & handling of instrument.	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

iii) Assessment of SLA: -

Every Self-learning assignment/microproject shall be assessed for 25 marks as per Following criteria

Sr.no	Criteria	Marks allotted
1	Attendance	05
2	Preparedness and workmanship	05
3	Presentation (neat figures/ diagrams/ tables/ graphs etc.)	05
4	Conclusion / Inference	05
5	Oral Based on microproject/ assignment/ activity	05
TOTAL		25

J. Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K. Teaching and Learning resources:

- | | |
|-----------------------|--|
| 1. Chalk board | 2. LCD presentations |
| 3. Demonstrative kits | 4. Demonstrative charts |
| 5. Question Bank | 6. Digital learning resources -NPTEL, Swayam |

L. REFERENCE BOOKS

a) Book / journals / IS code

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Computers are used in each and every sphere of life. Numbers of civil engineering software packages are available and are used in different organizations. In this, Computer aided drawing as drafting software to draw, read and interpret the civil engineering drawing is now very much essential. This will increase speed and accuracy of drawing as well as give facilities to repetitive use of drawing as and when needed.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Use CAD software for drafting and editing of the given type of drawing.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEK306-1 Know different types of latest of software's.

CEK306-3 Understand fundamentals and various commands

CEK306-4 Generate submission drawing of residential building

Competency, course outcomes and programme outcomes/programme specific outcomes

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in the in practical sessions of batches of about 20- 22 students:

Sr. No.	Laboratory experiences	CO
1	Demonstration the components of CAD screen and apply the process of initial setting using format menu	CEH307-CO1
2	Starting Auto CAD and Demonstration of auto-CAD commands as mentioned in topic no. 2	CEH307CO1& CEH307-2
3	Writing the names of the all commands and Short Keys	CEH307-CO2
4	Exercise on establishing limits and units of the proposed drawing	CEH307-CO2
5	Exerciser on Use of ortho, grid, snap, Line weight, and osnap, Polar commands	CEH307-CO2
6	Drawing triangles, rectangles, pentagon, circle etc using various commands with dimensions	CEH307-CO2
7	Layers – Drawing line sketch of three rooms residential building on different layers	CEH307-CO2
8	Hatching an object say brick work, stone masonry, bed concrete, sand filling, grill work etc.	CEH307-CO2
9	Reducing and increasing the dimension of a rectangular object / room using ‘stretch’ command	CEH307-CO2
10	Increasing or decreasing the size of an object using ‘scale’ command	CEH307-CO2
11	Calculating the area of the given figure	CEH307-CO2

12	Drawing the plan of a building showing living room, bedroom, kitchen, WC and bath, staircase etc	CEH307-CO2 and CEH307-CO3
13	Drawing elevation and section for serial no. 12	CEH307-CO2 and CEH306-CO3
14	Preparing area statement, site plan, construction notes, schedule of doors and windows etc. for serial no. 12 & 13	CEH307-CO2 and CEH307-CO3
15	Demonstration and taking printout (preferably on plotter) of serial no. 12 to 14	CEH307-CO2 and CEH307-CO3
16	Writing short notes on topic no. 1 and 2	CEH307-CO1 to CEH-CO2

II) Theory

Sr. no.	Topics/Subtopics
Course Outcome- CEH307-1 Know different types of latest of software's	
1	A brief study of latest software in Civil Engineering Auto CAD, STADPRO, 3D MAX, 3D HOMEARCHITECT
Course Outcome- CEH307-3 Understand fundamentals and various commands.	
2	<p>Auto-CAD package</p> <p>2.1 Fundamentals: System requirement for drawing software. Advantages of computer aided drawing over traditional method of drawing.</p> <p>2.2 Initial setting required to start new drawing.</p> <p>2.3 Draw commands: Line, poly line, construction line, rectangle, polygon, circle, ellipse, hatch, boundary, text, arc, point, make block, insert block etc.</p> <p>2.4 Modify commands: Erase, copy, mirror, offset, trim, move, extend, rotate, array, lengthen, scale, chamfer, fillet, explode, stretch. break, join, explode, divide, lengthen etc.</p> <p>2.5 Compute area of the given drawing</p> <p>2.6 Changing properties of entity: line type, color, scale, font- size, color, style.</p> <p>2.7 Layer command: Create layers for given components of given drawing, Layer on/off, Freeze/Thaw, Lock/Unlock etc.</p> <p>2.7 Dimension toolbar: Quick dimension, linear dimension, and continuous dimension; align dimension, angular dimensions, dimension style.</p>

	2.9 Use of plot/print command for the output of given drawing.
Course Outcome- CEH307-4 Generate submission drawing of residential building	
3	Submission drawings 4.1 Generation of plan of a building (on layers) Generation of detailed plan, elevation, section, site plan, area statement, schedule of doors and windows of a residential building

Note - Above theory content will be delivered in practical hours.

**** No questions will be asked on IKS learning subtopics in any question papers.**

G: List of Assignments under SLA

- 1) Draw Plan, elevation and section of a collected framed structure drawing from builder/Architect/ civil engineer.
- 2) Prepare construction notes, site plan and schedule of openings from the framed structure collected from builder/Architect/ civil engineer.
- 3) Draw Plan, elevation and section of a collected load bearing structure drawing from builder/Architect/ civil engineer.
- 4) Prepare construction notes, site plan and schedule of openings from the load bearing structure collected from builder/Architect/ civil engineer.
- 5) Draw working drawing of available drawing from builder/Architect/ civil engineer.
- 6) Learn latest software's of Civil Engg. Drawing

Note :

Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.

The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.

If a microproject is assigned, it is expected to be completed as a group activity. SLA marks shall be awarded as per the continuous assessment record.

If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

H : Specification table for setting question paper for semester end theory examination- Not Applicable for this Course

I :-Assessment Criteria

i) Formative Assessment of Practical :-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical :

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum demonstrations
2. Laboratory practices
3. Massive open online courses (*MOOCS*) may be used to teach various topics/subtopics.
4. About *15-20 of the topics/subtopics* which relatively simpler or descriptive in nature is to be given to the students for *self directed learning*.

K) Teaching and Learning resources:

1. Computer
2. Computer based training packages.
3. LCD Presentations

L) Reference Books:

Sr.No	AUTHOR	TITLE	PUBLISHER
1.	George Omura, Brian C. Benton	Mastering Auto CAD	SYBEX, U.S.A.
2.	Prof. Sham Tickoo	Auto CAD 2016 for Engineers and Designers	Dream tech, USA
3.	David Frey	AutoCAD	
4.	Rajendra Solkhe	AutoCAD	Aruta Publishers, Chiplun
5.	Tickor Maini	Understanding AutoCAD	

LI) LEARNING WEBSITES & PORTALS

Legends: @ Internal Assessment, # External Assessment, *# On Line Examination, @\$ Internal Online Examination

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

In the recent years large developments have taken place in the process of construction methods in the Civil Engineering Industry. Various new innovative techniques, variety of plants and equipment's are used on small scale to large scale civil engineering projects to obtain quality construction and productivity. These emerging trends in Civil Engineering help to complete the undertaken projects within prescribed schedule, saves the natural resources and to make the projects eco-friendly. This subject is framed to induce knowledge of advanced techniques and equipment's used on construction sites.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

1. Apply knowledge of advance concreting methods and construction equipment's to solve construction problems as follows.
2. Knowing operation of different equipment's.
3. Drawing different types of Equipment.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH310- 1- Understand and decide appropriate advanced concreting method and grouting Technique

CEH310- 2- Explain Ground improvement techniques and Slope stabilization methods.

CEH310- 3- Decide advanced formwork system.

CEH310- 4 -Recommend the suitable Hoisting and conveying equipment, Earth work Equipment's for the given situation

CEH310- 5- Recommend the suitable tools and equipment's for Concreting, Aggregate Manufacturing and Road construction Equipment's as per the given situation.

CEH310- 6- Suggest the equipment management techniques for the given project.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/ps) matrix

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in classroom or Field visits in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
	Field visits and use of digital techniques to study (Animation videos and case studies)	
1	Advance concreting techniques	CEH310-CO1
2	Grouting methods	CEH310-CO1
3	Slope stabilization techniques	CEH310-CO2
4	Advanced formworks	CEH310-CO3
5	Working of various types of construction equipment's	CEH310-CO4,6
6	RMC plant	CEH310-CO1
7	Hot mix bituminous plant	CEH310-CO5
8	Stone crusher unit	CEH310-CO5

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO:CEH000-1: Understand and decide appropriate advanced concreting method and grouting Technique			
1	A) Advanced Concreting methods and grouting 1.1 Pumping concrete- two types of pumps and there working and application 1.2 Vaccum Processed concrete- Process and application 1.3 Shotcrete Concrete-Process and application 1.4 Repacked concrete -Process and application 1.5 Cold and hot weather - Process and application concreting 1.6 Mass concreting in dams- Process and application 1.7 Ready Mix concrete (RMC) 1.8 Tremix Concreting B) Grouting 1.1 Necessity of grouting 1.2 Materials used for grouting, 1.3 Grouting pressure, drilling pattern, Equipment for Grouting 1.4 Types of grout- cement grouting, clay grouting,	8	10

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	chemical grouting 1.5 Asphalt grouting. Uses of grouts in buildings, dams & tunnels.		
CO: CEH000-2: Explain Ground improvement techniques and Slope stabilization methods			
2	2.1 Ground improvement techniques 2.2 Advanced piling techniques 2.3 Stone Column 2.4 Vibro Flootation 2.5 Micro piles 2.6 Soil Nailing 2.7 Vertical drains- Sand Drains 2.8 Pre-Fabricated Vertical Drains 2.9 Thermal Methods- soil heating and soil freezing. 2.10 Slope stabilization in cutting and embankment by soil reinforcing techniques	8	12
CO: CEH000-3: Understand and Decide advanced formwork system			
3	3.1 Slip formwork: Concreting with slip form 3.2 Maivan :Brief idea 3.3 Form work for Bridges 3.4 Form work Heavy Structures 3.5 Tunnel Formwork for buildings 3.6 Modular Formwork 3.7 Climbing System of Formwork	6	12

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CEH000 -4: Recommend the suitable.Hoisting and conveying equipments, Earth work equipments for the given situation			
4	A) Hoisting and conveying equipment's 4.1 Hoisting equipment's Principles and working of Tower crane 4.2 Crawler cranes, Truck mounted cranes, Gantry cranes, Mast cranes and Derricks ,Mobile crane all terrain cranes 4.3 Conveying equipment's: Different types of trucks, dumpers, belt conveyors B) Earth work equipment's 4.4 Excavating equipment's : Working and output of	11	14

	bulldozers, Scrapers, Graders, Power Shovels, Loader with Back Hoe, Draglines 4.6 Compacting equipment's: Uses of rollers, types of rollers : plain rollers, sheep footed rollers, pneumatic rollers, Rammers : use and working		
CO: EEG307-5: Recommend the suitable tools and equipment's for Concreting ,Aggregate Manufacturing and Road construction Equipment's as per the given situation			
5	Concreting Aggregate manufacturing and Road construction Equipment's A) Concreting equipments: 5.1 Types of concrete mixers, weigh batching equipments, Equipments for transportation of concrete: trolleys, lifts, Transit mixer. Concrete Vibrators: Needle vibrators and Screed vibrators. Automatic concrete plants. Concrete pumps B) Aggregate manufacturing 5.2. Stone Crushers: Types of stone crushers, working and capacities, equipment for the production of artificial sand C) Road Construction Equipments- 5.3 Compoments and Working of hot mix bitumen plant, Bitumen paver 5.4 Concrete road paver	8	14
CO: EEG307-6: Suggest the equipment management techniques for the given project			
6	Equipment management 6.1 Standard equipment 6.2 Special equipment 6.3 Selection of equipment 6.4 Owning and hiring an equipment 6.5 Economic life of an equipment 6.6 Maintenance of equipment	04	08

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Assignments under SLA

Sr.No	List of Assignment (under SLA)	Hrs Allotted
1	Advance concreting methods	01
2	Grouting	02
3	Soil reinforcing techniques.	01
4	Formwork	02
5	Hoisting and conveying equipment's.	01
6	Earth moving equipment's	02
7	Stone crushers and concreting equip	01
8	Industrial Visits to Hot mix plant and RMC plant.	02
9	Collect detailed information of Ready Mix concrete Plant	01
10	Collect detailed information of Hot Mix Plant	01
11	Miscellaneous equipment's and Management	02

I :-Assessment Criteria

i) Formative Assessment of Practical:-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical : Not Applicable for this course

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration
4. Animation Videos and construction case studies.

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

A great awareness & huge concern towards environmental protection compelled us to discover, develop & make use of eco friendly construction materials. Also a trend of utilizing maximum natural resources like rain water, sunlight, wind etc change the planning & requirement of construction materials. In the recent past, Composite materials, Plastics, Aluminium and ceramics have been the dominant emerging materials. Students of civil engineering should be familiar with all new construction materials.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Students of civil engineering should be familiar with all new construction materials.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH 311 -1 To know History and developments of building materials.

CEH 311 -2 Know different advanced materials for wall construction.

CEH 311 -3 Know different materials available for doors, windows and partition walls and Suitability of each.

CEH 311 -4 Know types of Flooring, cladding, ceiling panels and its suitability.

CEH 311 -5 Know various roofing materials and its applications.

CEH 311 -6 To know advanced types of pipes and fixtures in plumbing, to know Geo-synthetics, painting and water proofing.

Competency, course outcomes and programme outcomes/programme specific outcomes (cp-co-po/ps) matrix

F. CONTENT:-

I) Practical exercises

Continuous assessment work contains assignments, market survey reports, information brochure, leaf-lets and pamphlets on the following

Sr. no	Laboratory experiences	CO
1	*Fly Ash	CEH 311- 1
2	*Doors and windows made up of Advanced materials	CEH 311 – 2
3	*Partition panels	CEH 311– 2
4	*Structural Glazing	CEH 311– 3
5	*Flooring	CEH 311 – 4
6	*Cladding, ceiling panels	CEH 311 - 4
7	*Roofs and pre cast roofing elements	CEH 311- 5
8	*Plumbing	CEH 311 – 6
9	*Construction Chemicals	CEH 311– 6
10	*Geo-synthetics Heat and sound insulating materials Acoustic materials	CEH 311 6

Note : Out of above suggestive LLOs -

'*' Marked Practicals (LLOs) Are mandatory.

Sr. no	Laboratory experiences	CO
Minimum 80% of above list of lab experiment are to be performed. Judicial mix of LLOs are to be performed to achieve desired outcomes.		

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CEH 311 -1 To know History and developments of building materials.			
1	<p style="text-align: center;">Unit No 1 Introduction to Building Materials</p> 1.1 Introduction to Innovative building Materials, 1.2 History & developments, 1.3 Future building materials Scop & Limitation.	04	06
CEH 311 -2 Know different advanced materials for wall construction.			
2	<p style="text-align: center;">Unit No 2 Wall</p> 2.1 Stabilized, compressed Earth Blocks, Fal-G stabilized Mud Blocks, 2.2 Bricks-, Fly ash, Sand- Lime, Red Mud burnt 3D printed brick, Bricks made up of cigarette butts, SBA (Sugar Bagas Ash) 2.3 Fly ash – Lime- Gypsum (Fal-G) products :- Lato/ Precast Stone – Concrete – Hollow Blocks, 2.4 Fly ash based light weight Aerated & cellular concrete walling, 2.5 Bonding System e.g. Rat-Trap Bond 2.6 Composite Ferro cement systems 2.7 Ready mix plastering material 2.8 Plaster of Paris, Gypsum wall Plasters, Gypsum Plaster Boards Adhesives, (Only description advantages & application)	08	14
CEH 311 -3 Know different materials available for doors, windows and partition walls and Suitability of each.			
3	<p style="text-align: center;">Unit No 3 Doors, windows and partition panels</p> 3.1 UPVC 3.2 Precast RCC 3.3 Resin or Oxi chloride Cement Bonded Saw dust based ,	10	14

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	3.4 Natural Fibre Reinforced Polymer Composite, Ferro cement Shutters, 3.5 FRP – Fibre reinforced plastic 3.6 Aluminium- plain, powder coated, Anodized Heat and sound insulating materials (Only description, advantages & application)		

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CEH 311 -4 Know types of Flooring, cladding, ceiling panels and its suitability.			
4	<p>Unit No 4 Flooring, cladding, ceiling panels:</p> <p>4.1 Ceramic, Marbonite, Vitrified, Artificial Marble flooring, Pavements Blocks. Laminated timber 3D tiles</p> <p>4.2 Synthetic flooring: PVC, linoleum and rubber flooring, Industrial flooring: epoxy, tremix and glass flooring. Other flooring: cork- tile and asphalt flooring</p> <p>4.3 Ceramic, Cement based artificial cladding tiles, Ready to use Tiles- Porch, Riser, Tread etc.</p> <p>4.4 False Ceiling boards, Gypsum based paneling & ceiling tiles</p> <p>4.5 Study of materials and constructional details of Expansion joints Curtain Walls and Structural Glazing stabilized mud blocks, micro concrete tiles, pre cast roofing elements. (Only description advantage & application)</p>	06	10
CEH 311 -5 Know various roofing materials and its applications.			
5	<p>Unit No 5 Roofs:</p> <p>5.1 Life extended Thatch roofing,</p> <p>5.2 Pyramidal Brick roofing</p> <p>5.3 Cement bonded Fibre Roofing sheets,</p> <p>5.4 Micro concrete tile / stone Patti, Precast brick panels</p> <p>5.5 Ferro cement channel / shell units,</p> <p>5.6 Precast Waffle units/Channel units /cored units/ In-situ Thin Ribbed Slabs. (Only description advantage & application)</p>	07	10

CEH 311 -6 To know advanced types of pipes and fixtures in plumbing, to know Geo-synthetics, painting and water proofing.			
6	<p>Unit No 6 Other Construction materials</p> <p>6.1 Plumbing Materials – Plumbing pipes & fixtures, composite copper, PPR</p> <p>6.2 Thermo Mechanically Treated Steel sections (TMT)</p> <p>6.3 Construction Chemicals used in - Roof slab, plaster, flooring & waterproofing.</p> <p>6.4 Types and properties of acoustic materials.</p> <p>6.5 Road Materials – Geo-synthesis, Noise Reducing Asphalt, porous pavement, plastic roads, <i>solar roads</i>, <i>Anti-Icing Roads</i>, <i>Use of SBA (Sugar Bagas Ash)</i> in concrete roads</p> <p>6.6 Sustainable Materials – Ground Granulated Glass Blast Furnace slag (GGBS) concrete, Agro-gel Insulation, Cooling Bricks, Green Concrete, Timbercrete, Ferrock</p> <p><i>(Only description, advantage & application)</i></p>	10	16

List of Micro Projects (Under SLA)		
1	To prepare and present a case study of above assignments in a seminar type situation	
2	Collect data of pre-stressed components manufactured in your vicinity.	
3	Write a detailed report of visit to anyone prefabricated unit.	
4	Collect data for materials required for precast elements, with their suppliers, sale price etc.	
5	Carry out market survey for identifying various advanced construction materials and prepare a report.	
<p>Note :</p> <p>“These are the just suggestive topics. Faculty must design Microproject/Activities/ Assignments based on Course Outcome requirements”.</p>

*Self learning includes micro project/assignment/other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Technological development in all sectors has caused imbalance in energy generation and its consumption. Building heating and cooling are the most energy-intensive activities, followed by electricity use for lighting and appliances. Rising standards of living result in more energy services required for heating, cooling, lighting and communicating. Energy being in limited quantum as on date is a very scarce resource now days and need to be used optimally. Higher levels of energy efficiency reduce carbon emissions from the home's own energy systems. Therefore, it becomes necessary to be energy conscious and make every effort for the conservation of energy. Energy conservation is a scientific tool provided to minimize the energy imbalance. Green building use the resources optimally, reduce waste and reduce the cost of lifecycle and provide healthy indoor environment for its occupants through restoring/improving the natural environment. Therefore today's home buyers are interested in green building as it improve the way homes use energy, water, and materials, to reduce negative impacts on human health and the overall environment-both during construction and over its lifetime. This course will enable the student's to face these challenges of today's era in most effective way to build the structures as green one to improve the quality of environment significantly. This is one of the rapid emerging fields in the area of engineering hence this has been included as core technology subject.

ii) INDUSTRY/EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

1. To be energy conscious and make every effort for the conservation of energy

COURSE LEVEL LEARNING OUTCOMES (COs)

CEH312-1 .Identify the need of Energy Conservation and understand renewable, non renewable energy sources

CEH312-2 Justify the need of EIA and Implement the different steps in environmental impact Assessment

CEH312-3 Identify Energy efficiency opportunities and suggest measures for energy efficiency in Building

CEH312-4 Explain the principles of. Green building and suggest the strategies for design of the green buildings.

CEH312-5 Identify the relevant Materials required for the given building to have Green building construction.

CEH312-6 Select the relevant rating system for assessment of given Green building.

Competency, course outcomes and programme outcomes/programme specific outcomes (CP-CO-PO/PSO) matrix

E. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in the *class room for Energy Conservation & Green Building* developed by the Institute in practical sessions of batches of about 20- 22 students:

Sr No.	Title of Practical Exercise	Skills / Competencies to be developed	Course Outcome
	<ol style="list-style-type: none"> 1. Visit any building in your locality to identify there Levant legal provisions followed for control of pollution and submit your Observations -cum-findings in the form of a report. 2. Inspect your institute building and submit an action plan for improving indoor and outdoor environmental quality 3. Estimate the capacity of the solar plant required for your institute building on the basis of the total electricity consumption data 4. Visit to any organization Where Energy Conservation program is Implemented. (e.g. Hospitals, Workshops, Commercial Buildings, Residential buildings and submit your observations-cum-findings in the form of a report. 5. Study of different Electrical fixtures in the building to reduce energy consumption 6. Identify the impact of number of trees, green belt on the energy level of the building. (By physical verification) 7. Prepare an action plan for energy conservation by inspecting an existing structure to explore its potential in it. 8. Conduct the energy audit of your institute building using any rating system 9. Visit to the nearby wind mill and prepare a report on your observations w.r.t. generation of energy with relevant sketches 10. Visit to the nearby Hydroelectric power plant and prepare are portony our observations w.r.t. generation of energy with relevant sketches wherever required. 11.Visit to the nearby solar energy plant and prepare are portony our observations w.r.t. generation of energy with relevant sketches. 12.Inspect any conventional building in your area to suggest the action plan for converting it into green building with necessary legal provisions to be followed 13.Visit the site for assessment of green building with relevant rating system and submit your findings in the form of a report. 14.Visit a building in your locality for suggesting necessary modifications required for energy conservation and improving green rating . 	<ol style="list-style-type: none"> 1. Information collection and presentation in form of report 2. Motivation through field exposure 3. Presentation skills 	CEH312-1 to CEH312-6

II) Theory

Section I

Sr. No.	Topics / Sub-topics	Lectures (Hours)	Theory Evaluation (Marks)
CEH312-1. Identify the need of Energy Conservation and understand renewable, non renewable energy sources.			
1	<p>Energy sources and energy conservation</p> <p>1.1 Renewable Energy Resources: Solar Energy, wind Energy, Ocean Energy, Hydro Energy, Biomass Energy</p> <p>Non-renewable Energy Resources: Coal, Petroleum, Natural Gas, Nuclear Energy, Chemical Sources of Energy, Fuel Cells, Hydrogen, Bio fuels</p> <p>1.2 Energy conservation: Introduction, Specific objectives, present scenario, Need of energy conservation, LEED India Rating System and Energy Efficiency.</p> <p>Functions of Government organization working for Energy conservation and Audit(ECA)-</p> <ul style="list-style-type: none"> National productivity council –NPC Ministry of New and Renewable energy-MNRE Bureau of energy efficiency BEE Maharashtra energy development agency MEDA 	10	14
CEH312-2 Justify the need of EIA and Implement the different steps in environmental impact assessment			
2.	<p>2.1 Environmental Audit: Meaning, Necessity, Norms</p> <p>2.2 Types: Objective based types: Liabilities audit, Management audit, Activities audit</p> <p>2.3 Client-driven types: Regulatory external audit, Independent external audit, Internal environmental audit, Third party audit</p> <p>Environmental</p> <p>2.4. Impact Assessment (EIA): Introduction, EIA regulations, Steps in environmental impact assessment process, Benefits of EIA, Limitations of EIA,</p> <p>2.5. Environmental clearance for the civil engineering projects</p>	06	10
CEH312-3 Identify Energy efficiency opportunities and suggest measures for energy efficiency in building			
3	<p>3.1 Energy Efficiency in building construction</p> <p>Environmental impact of building constructions, Concepts of embodied energy, operational energy and life cycle energy. Methods to reduce operational energy: Energy efficient building envelopes, efficient lighting technologies, energy efficient appliances for heating and air conditioning systems in buildings, zero ozone depleting potential (ODP) materials, wind and solar energy harvesting, energy metering and monitoring, concept of net zero buildings.</p>	06	10
TOTAL		22	34

Section –II

Sr. No.	Topics / Sub-topics	Lectures (Hours)	Theory Evaluation (Marks)
CEH312-4 Explain the principles of Green building and Suggest the strategies for design of the green buildings			
4	<p>Green Buildings</p> <p>4.1 Introduction to Green Buildings: Definition of green buildings and sustainable development, typical features of green buildings, benefits of green buildings towards sustainable development</p> <p>4.2 Principles: Principles of Green Building planning</p> <p>4.3. Features: Salient features of Green Building, Environmental design (ED) strategies for building construction</p> <p>4.4. Process: Improvement in environmental quality in civil structure</p>	14	22
CEH312-5 Identify the relevant Materials required for the given building to have green building construction			
5	<p>Building materials:</p> <p>5.1. Methods to reduce embodied energy in building materials:</p> <p>(a) Use of local building materials</p> <p>(b) Use of natural and renewable materials like bamboo, timber, rammed earth, stabilized mud blocks,</p> <p>(c) use of materials with recycled content such as blended cements, pozzolana cements, fly ash bricks, vitrified tiles, materials from agro and industrial</p>	04	07
CEH312-6 Select the relevant rating system for assessment of given Green building			
6	<p>Green building Rating system</p> <p>6.1 Indian Green Building Council (IGBC)</p> <p>IGBC Green new buildings rating systems</p> <p>Scope and benefits of IGBC</p> <p>Levels of certification</p> <p>6.2 Green Rating for Integrated Habitat Assessment. (GRIHA) criteria</p>	05	07
TOTAL		23	36

**** No questions will be asked on IKS learning subtopics in any question papers**

G: List of Assignments under SLA

Sr No.	Title of Practical Exercise	Skills / Competencies to be developed	Course Outcome
1.	<p>Micro-project Only one micro-project is planned to be undertaken by a student that needs to be assigned to him/her in the beginning. Each student will have to maintain dated work diary consisting of individual contribution in the project work and give a seminar presentation of it before submission. A. suggestive list of micro-projects is given here. Similar micro-projects could be added by the concerned faculty:</p> <ol style="list-style-type: none"> a. Prepare a report by taking case study to classify the terms and the construction methodologies between Traditional building and Green building. b. Collect the relevant information of recent technologies in green building construction and prepare a report on it. c. Make a model of hydroelectric power plant and prepare a report. d. Prepare questionnaires for environmental audit. <p>Prepare questionnaires for assessment of environmental impact.</p>	<ol style="list-style-type: none"> 1. Information collection and presentation in form of report 2. Motivation through field exposure <p>Presentation skills</p>	
2.	<ol style="list-style-type: none"> a. Other than the classroom and laboratory learning, following are the suggested student-related co-curricular activities which should be undertaken to accelerate the attainment of the various outcomes in this course: Students should prepare ASSIGNMENT ON EACH UNIT. 		

H : Specification table for setting question paper for semester end theory examination

Topic No.	Name of topic	Distribution of marks (Cognitive level-wise)			Course Outcome	Total Marks
		Remember	Understand	Application		
1	Energy sources and energy conservation	06	06	02	CEH312-1	14
2	Environmental Audit	02	04	04	CEH312-2	10
3	Energy Efficiency in building construction	02	04	04	CEH312-3	10
4	Green Buildings	06	08	08	CEH312-4	22
5	Building materials	03	04	--	CEH312-5	07

	TOTAL	21	28	21		70

I:-Assessment Criteria

i) Formative Assessment of Practical:-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr.no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Classroom practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

Sr. No.	Author	Title	Publisher
1.	Kibert, C.J.	Sustainable construction: Green Building design and Delivery	John Wiley Hoboken, New Jersey,

@\$ Internal Online Examination

EXTERNAL ASSESSMENT

*# ONLINE THEORY EXAMINATION

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

Semester : Fourth

Course Title : ENVIRONMENTAL EDUCATION AND SUSTAINABILITY

Course Code CCH206

I. RATIONALE

The survival of human beings is solely depending upon the nature. Thus, threats to the environment directly impact on existence and health of humans as well as other species. Depletion of natural resources and degradation of ecosystems is accelerated due to the growth in industrial development, population growth, and overall growth in production demand. To address these environmental issues, awareness and participation of individuals as well as society is necessary. Environmental education and sustainability provide an integrated, and interdisciplinary approach to study the environmental systems and sustainability approach to the diploma engineers.

II. INDUSTRY / EMPLOYER EXPECTED OUTCOME

Resolve the relevant environmental issue through sustainable solutions

III. COURSE LEVEL LEARNING OUTCOMES (COS)

Students will be able to achieve & demonstrate the following COs on completion of course based learning

CO1 - Identify the relevant Environmental issues in specified locality. CO2 - Provide the green solution to the relevant environmental problems. CO3 - Conduct SWOT analysis of biodiversity hotspot

CO4 - Apply the relevant measures to mitigate the environmental pollution.

CO5 - Implement the environmental policies under the relevant legal framework.

V. THEORY LEARNING OUTCOMES AND ALIGNED COURSE CONTENT

Sr.No	Theory Learning Outcomes (TLO's) aligned to CO's.	Learning content mapped with Theory Learning Outcomes (TLO's) and CO's.	Suggested Learning Pedagogies.
1	<p>CCH206.1</p> <p>1.1 Explain the need of studying environment and its components.</p> <p>1.2 Investigate the impact of population growth and industrialization on the relevant environmental issues and suggest remedial solutions</p> <p>1.3 Explain the Concept of 5 R w.r.t. the given situation</p> <p>1.4 elaborate the relevance of Sustainable Development Goals in managing the climate change</p> <p>1.5 Explain the concept of zero carbon-footprint with carbon credit</p>	<p>Unit - I Environment and climate change</p> <p>1.1 Environment and its components, Types of Environments, Need of environmental studies</p> <p>1.2 Environmental Issues- Climate change, Global warming, Acid rain, Ozone layer depletion, nuclear accidents. Effect of population growth and industrialization</p> <p>1.3 Concept of 5R, Individuals' participation in i) 5R policy, ii) segregation of waste, and iii) creating manure from domestic waste</p> <p>1.4 Impact of Climate change, Factor contributing to climate change, Concept of Sustainable development, Sustainable development Goals (SDGs), Action Plan on Climate Change in Indian perspectives</p> <p>1.5 Zero Carbon footprint for sustainable development, (IKS-Environment conservation in vedic and pre-vedic India)</p>	Lecture Using Chalk-Board Presentations

2	<p>CCH206.2</p> <p>2.1 Justify the importance of natural resources in sustainable development</p> <p>2.2 Explain the need of optimum use of natural resources to maintain the sustainability</p> <p>2.3 Differentiate between renewable and non-renewable sources of energy</p> <p>2.4 Suggest the relevant type of energy source as a green solution to environmental issues</p>	<p>Unit - II Sustainability and Renewable Resources</p> <p>2.1 Natural Resources: Types, importance, Causes and effects of depletion. (Forest Resources, Water Resources, Energy Resources, Land resources, Mineral resources), (IKS- Concepts of Panchmahabhuta)</p> <p>2.2 Impact of overexploitation of natural resources on the environment, optimum use of natural resources</p> <p>2.3 Energy forms (Renewable and non-renewable) such as Thermal energy, nuclear energy, Solar energy, Wind energy, Geothermal energy, Biomass energy, Hydropower energy, biofuel</p> <p>2.4 Green Solutions in the form of New Energy Sources such as Hydrogen energy, Ocean energy & Tidal energy</p>	Lecture Using Chalk-Board Presentations
3	<p>CCH206.3</p> <p>3.1 Explain the characteristics and functions of ecosystem</p> <p>3.2 Relate the importance of biodiversity and its loss in the environmental sustainability</p> <p>3.3 Describe biodiversity assessment initiatives in India</p> <p>3.4 Conduct the SWOT analysis of the biodiversity hot spot in India</p> <p>3.5 Explain the need of conservation of biodiversity in the given situation</p>	<p>Unit - III Ecosystem and Biodiversity</p> <p>3.1 Ecosystem - Definition, Aspects of ecosystem, Division of ecosystem, General characteristics of ecosystem, Functions of ecosystem</p> <p>3.2 Biodiversity - Definitions, Levels, Value, and loss of biodiversity</p> <p>3.3 Biodiversity Assessment Initiatives in India</p> <p>3.4 SWOT analysis of biodiversity hot spot in India</p> <p>3.5 Conservations of biodiversity - objects, and laws for conservation of biodiversity</p>	Lecture Using Chalk-Board Presentations Video Demonstration
4	<p>CCH206.4</p> <p>4.1 Classify the pollution based on the given criteria</p> <p>4.2 Justify the need of preserving soil as a resource along with the preservation techniques</p> <p>4.3 Maintain the quality of water in the given location using relevant preventive measures</p> <p>4.4 State the significance of controlling the air pollution to maintain its ambient quality norms</p> <p>4.5 Compare the noise level from different zones of city with justification</p> <p>4.6 Describe the roles and responsibilities of central and state pollution control board</p>	<p>Unit - IV Environmental Pollution</p> <p>4.1 Definition of pollution, types- Natural & Artificial (Man- made)</p> <p>4.2 Soil / Land Pollution – Need of preservation of soil resource, Causes and effects on environment and lives, preventive measures, Soil conservation</p> <p>4.3 Water Pollution - sources of water pollution, effects on environment and lives, preventive measures, BIS water quality standards for domestic potable water, water conservation</p> <p>4.4 Air pollution - Causes, effects, prevention, CPCB norms of ambient air quality in residential area</p> <p>4.5 Noise pollution - Sources, effects, prevention, noise levels at various zones of the city</p> <p>4.6 Pollution Control Boards at Central and State Government level: Norms, Roles and Responsibilities</p>	Lecture Using Chalk-Board Presentations

5	<p>CCH206.5</p> <p>5.1 Explain Constitutional provisions related to environmental protection</p> <p>5.2 Explain importance of public participation (PPP) in enacting the relevant laws</p> <p>5.3 Use the relevant green technologies to provide sustainable solutions of an environmental problem</p> <p>5.4 Explain the role of information technology in environment protection</p>	<p>Unit – V- Environmental legislation and sustainable practices</p> <p>5.1 Article (48-A) and (51-A (g)) of Indian Constitution regarding environment, Environmental protection and prevention acts</p> <p>5.2 Public awareness about environment. Need of public awareness and individuals' participation. Role of NGOs</p> <p>5.3 Green technologies like solar desalination, green architecture, vertical farming and hydroponics, electric vehicles, plant-based packaging</p> <p>5.4 Role of information technology in environment protection and human health</p>	<p>Lecture Using Chalk-Board Presentations Video Demonstrations</p>
---	--	--	---

**VI. LABORATORY LEARNING OUTCOME AND ALIGNED PRACTICAL / TUTORIAL EXPERIENCES:
N.A.**

VII. SUGGESTED MICRO PROJECT / ASSIGNMENT/ ACTIVITIES FOR SPECIFIC LEARNING / SKILLS DEVELOPMENT (SELF LEARNING)

Assignment

Suggest the steps to implement (or improve the implementation) of the 5R policy in your home/institute stating your contribution

Draft an article on India's Strategies to progress across the Sustainable Development Goals

Make a chart of Renewable and non-renewable energy sources mentioning the advantages and disadvantages of each source

Conduct the SWOT analysis of biodiversity hotspot in India

Prepare a mind-mapping for the zero carbon footprint process of your field

Prepare a chart showing sources of pollution (air/water/ soil), its effect on human beings, and remedial actions

Any other assignment on relevant topic related to the course suggested by the facilitator

UNICEF Certification(s)

Students may complete the self-paced course launched by Youth Leadership for climate Exchange under UNICEF program on portal www.mahayouthnet.in . The course encompasses five Modules in the form of Units as given below:

Unit 1: Living with climate change

Unit 2 : Water Management and Climate Action

Unit 3: Energy Management and Climate Action

Unit 4 : Waste Management and Climate Action

Unit 5 : Bio-cultural Diversity and Climate Action

If students complete all the five Units they are not required to undertake any other assignment /Microproject/activities specified in the course. These units will suffice to their evaluations under SLA component

Micro project

Technical analysis of nearby commercial RO plant.

Comparative study of different filters used in Household water filtration unit

Evaluate any nearby biogas plant / vermicomposting plant or any such composting unit on the basis of sustainability and cost-benefit

IKS-Study and prepare a note on Vedic and Pre-Vedic techniques of environmental conversion

Visit a local polluted water source and make a report mentioning causes of pollution
 Any other activity / relevant topic related to the course suggested by the facilitator

Activities

Prepare a report on the working and functions of the PUC Center machines and its relevance in pollution control.
 Prepare and analyse a case study on any polluted city of India
 Prepare a note based on the field visit to the solid waste management department of the municipal corporation / local authority
 Record the biodiversity of your institute/garden in your city mentioning types of vegetation and their numbers
 Visit any functional hall/cultural hall /community hall to study the disposal techniques of kitchen waste and prepare a report suggesting sustainable waste management tool
 Watch a video related to air pollution in India and present the summary
 Any other assignment on relevant topic related to the course suggested by the facilitator

Note :

Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.
 The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.
 If a microproject is assigned, it is expected to be completed as a group activity.
 SLA marks shall be awarded as per the continuous assessment record.
 If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and may be considered for FA-PR evaluations.

VIII. LABORATORY EQUIPMENT / INSTRUMENTS / TOOLS / SOFTWARE REQUIRED

Sr.No	Equipment Name with Broad Specifications	Relevant LLO Number
1	Nil	All

IX . SUGGESTED WEIGHTAGE TO LEARNING EFFORTS & ASSESSMENT PURPOSE (Specification Table)

Sr.No	Unit	Unit Title	Aligned COs	Learning Hours	R-Level	U-Level	A-Level	Total Marks
1	I	Environment and climate change	CO1	6	4	4	4	12
2	II	Sustainability and Renewable Resources	CO2	08	4	4	8	16
3	III	Ecosystem and Biodiversity	CO3	6	4	4	4	12
4	IV	Environmental Pollution	CO4	10	4	8	6	20
5	V	Environmental legislation and sustainable practices	CO5	5	4	4	4	10
Grand Total				30	20	24	26	70

X . ASSESSMENT METHODOLOGIES/TOOLS

Formative assessment (Assessment for Learning)

Two-unit tests (MCQs) of 30 marks will be conducted and average of two-unit tests considered. Formative assessment of self learning of 25 marks should be assessed based on self learning activity such as UNICEF Certification(s)/Microproject/assignment/activities. (60 % weightage to process and 40 % to product)

Two-unit tests (MCQs) of 30 marks will be conducted and average of two-unit tests considered.

Formative assessment of self learning of 25 marks should be assessed based on self learning activity such as UNICEF Certification(s)/Microproject/assignment/activities. (60 % weightage to process and 40 % to product)

Assessment of Self Learning :- Based on work done by students as a self learning Activities such as microprojects ,assignments and similar activities using proforma 1 marks of SLA can be calculated.

XI. SUGGESTED COS-POS MATRIX FORM

Course Outcomes (COs)	Programme Outcomes (POs)							Programme Specific Outcomes* (PSOs)		
	PO-1 Basic and Discipline Specific Knowledge	PO-2 Problem Analysis	PO-3 Design/ Development of Solutions	PO-4 Engineering Tools	PO-5 Engineering Practices for Society, Sustainability and Environment	PO-6 Project Management	PO-7 Life Long Learning	PSO-1	PSO-2	PSO-3
CO1	-	1	-	-	3	2	3			
CO2	-	2	2	-	3	2	3			
CO3	-	-	-	-	3	1	2			
CO4	1	-	-	-	3	2	2			
CO5	1	-	2	-	3	2	3			

Legends :- High:03, Medium:02,Low:01, No Mapping: -
*PSOs are to be formulated at institute level

XII. SUGGESTED LEARNING MATERIALS / BOOKS

Sr.No	Author	Title	Publisher with ISBN Number

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Hydraulics is a course of civil engineering which consists of study of fluid behavior and design of hydraulic structures. The study of hydraulics plays an important role in various civil engineering applications such as water supply, wastewater management, drainage systems and hydraulic structures. Understanding hydraulics for civil engineers will help them to make decisions during design of hydraulic structures and ensuring the efficient management of water supply and wastewater sources. In this course, student will learn behavior of fluid at rest, fluid in motion, flow through open channel and flow through pipe.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

1. Apply the principles of hydraulics in given situation to solve the civil engineering problem.
2. Designing the distribution system
3. Fixing the capacity of pumps
4. Designing most economical section of open channels.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH308- 1- Interrelate physical properties of fluid & Interpret the pressure parameters from Pressure Measuring devices in flowing liquids.

CEH308 -2- Determine total hydrostatic pressure and center of pressure for different Conditions.

CEH308- 3- Apply continuity equation & Bernoulli's theorem for calculations.

CEH 308-4- Determine loss of head & flow through pipes.

CEH 308-5- Calculate discharge through open channels.

CEH 308-6- Select relevant hydraulic pumps for different applications.

Competency, course outcomes and programme outcomes/programme specific outcomes

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in the Hydraulics Laboratory in the Institute in practical sessions of batches of about 20- 22 students:

Sr. no	Name of the Practical	CO
1	Computation of physical properties of given fluid (tap water and muddy water)	CO1
2	Computation of physical properties of given liquid (oil and Mercury)	CO1
3	Use of Bourdon Gauge to measure the pressure at a given point.	CO1
4	Use of U tube differential manometer to measure the pressure difference between two given points.	CO1
5	Use of Bernoulli's apparatus to obtain Total Energy Line for flow in closed conduit of varying cross sections.	CO1
6	Use of Friction factor Apparatus to determine the friction factor for the given pipe	CO1
7	Determination of minor losses in pipe for sudden contraction and sudden enlargement.	CO1
8	Use of 'V' notch to measure the discharge through open channel	CO1
9	Find the resultant pressure and its position for given situation of liquid in a tank.	CO1
10	Determination of efficiency of given Centrifugal Pump.	CO1

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO:CEH000-1: Interrelate physical properties of fluid & Interpret the pressure parameters from Pressure Measuring devices in flowing liquids			
1	Properties of fluid & pressure measurement 1.1 Definition of fluid, Hydraulics. Branches of hydraulics. Importance of Hydraulics with respect to Irrigation and Environmental engineering. 1.2 Physical properties of fluid Mass density, Weight density, Specific volume, Specific gravity, Surface tension capillarity, Compressibility, Viscosity, Dynamic and kinematic viscosity. Ideal and Real fluids. 1.3 Various types of pressure: Fluid Pressure, Pressure head, Pascal's Law and its applications, Absolute Pressure, Gauge Pressure, Atmospheric Pressure, Vacuum Pressure. 1.4 Pressure Measuring Devices: Piezometer, Simple U tube Manometer, U Tube Differential Manometer and	08	10

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	Inverted U Tube Differential Manometer, Bourdon Tube Pressure Gauge		
CO: CEH000-2: Determine total hydrostatic pressure and center of pressure for different Conditions.			
2	Hydrostatic pressure& its Measurement 2.1 Definition of Hydrostatics, Total Pressure and Centre of Pressure: Concept and Applications. 2.2 Total Hydrostatic Pressure and Center of Pressure on: Horizontally, Vertically Immersed Surfaces: for rectangular, Triangular and Circular lamina. 2.3 Total Pressure and Center of Pressure using Pressure diagram on sides , bottom and partition wall of a tank .	11	12
CO: CEH000-3: Apply continuity equation & Bernoulli's theorem for calculations.			
3	Hydro kinematics and Hydro dynamics 3.1 Types of Fluid Flow: Steady, unsteady, uniform, non uniform, laminar, turbulent, compressible and Incompressible flow, Reynolds's number. 3.2 Discharge: Definition, Unit, Continuity Equation. 3.3 Energies associated with fluid flow: Potential, Kinetic, Pressure Energy and total energy. 3.4 Bernoulli's Equation: Statement, Assumptions, Equation, Practical applications, Modified Bernoulli's Theorem.	11	12

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CEH000 -4: Determine loss of head & flow through pipes.			
4	Flow through Pipes 4.1 Major head loss in pipe: Frictional loss and its Computation by Darcy Weisbach equation. (Simple Numericals on Darcy Weisbach equation) 4.2 Minor Energy (Head) losses in pipe: Sudden Enlargement, Sudden Contraction, loss of head at entrance of pipe, loss of head at exit of pipe, loss of head due to bend in pipes and fittings. 4.3 Flow through pipes in series, pipes in parallel and Dupit's equation for equivalent pipe. 4.4 Hydraulic Gradient Line and Total Energy Line(No Numerical, only representative Diagram). Siphon pipe, Water hammer in pipes, causes and its effects and remedial Measures. Moody's Chart, Use of Nomograms for design of Water distribution system. 4.5 Discharge measuring device for pipe flow:	12	16

	Venturimeter, Construction and working. 4.6 Discharge measuring for a tank: using Orifice, Hydraulic Coefficients of Orifice.		
CO: EEG307-5: Calculate discharge through open channels.			
5	Flow through Open Channel 5.1 Types of channels - artificial & natural, purposes of artificial channel Geometrical properties of Channel section: Wetted area, Wetted perimeter, Hydraulic Radius for Rectangular and Trapezoidal Channel section. 5.2 Chezy's and Manning's equation of velocity for calculation of discharge through an open channel. Most economical channel section, conditions for most economical channel Velocity measuring devices for open channels sections. 5.3 Hydraulic Jump – Study & Uses 5.4 Velocity measuring devices for open channels. Floats, Pitot tube, current meter and its types. 5.5 Weir & Notches, expression for discharge for rectangular and triangular notches, Francis formula, end contraction and velocity of approach, Broad crested weir, cippolletti weir and expression for discharge through it.	12	12
CO: EEG307-6: Select relevant hydraulic pumps for different applications			
6	Hydraulic pumps 6.1 Pump: Types of pump :Centrifugal, Reciprocating pumps and Submersible pumps. 6.2 Centrifugal pump & Reciprocating pump Component parts and working. 6.3 Types of heads :Suction head, delivery head, static head and Manometric head. 6.4 Compute power requirement of Centrifugal Pump.	06	08

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Micro project/Assignments under SLA

Micro project-

1. Collect the technical brochure of available brands of pump in the market and prepare report with your comments.
2. Determination of type and capacity of pump for residential bungalow (06 Occupants) of G+1 Storey having 200 Sqm built up area.
3. Prepare a model of rectangular and trapezoidal channel.

*Similar topics related to concepts used in the hydraulics.

Sr.No	List of Assignment (under SLA)	Hrs Allotted
1	Explain the concept and use of pressure diagram with neat sketches	02
2	Explain with a neat sketch the working of Bourdon's pressure gauge	02
3	State Bernoulli's theorem. State any two applications of it.	02
4	Explain the reasons of using mercury in the manometers.	04
5	Describe the principle on which Venturimeter works.	02
6	Explain Moody's diagram and Nomograms with its use	02
7	State and explain causes and remedial measures of water hammer	04
8	Explain the necessity of hydraulic jump	02
9	Explain with neat sketch working of single acting and double acting reciprocating pump	02
10	Explain critical, sub critical and supercritical flow with reference to Froude's number	02

H : Specification table for setting question paper for semester end theory examination

I :-Assessment Criteria

i) Formative Assessment of Practical :-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical :

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

D. i) RATIONALE: -

With the preliminary understanding of forces and force systems acting on the engineering structures and their components. The focus now shifts on various actions and the corresponding strength evaluation of engineering materials under these specified actions to ascertain the suitability of materials, their size requirements. Simultaneously analytical approaches are dealt with behaviour of the materials in focus, understanding the engineering parameters of loading on these members namely shear force and bending moments for various configurations of members, support conditions and loading.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Analyse the stresses & strains in the given structural elements using relevant methods.

E. COURSE LEVEL LEARNING OUTCOMES (CO'S)

CEH309-1 Structural systems, actions and their types. Simple actions on a linear member causing deformations in the member.

CEH309-2 Elastic constants and their relation, strain energy for various forms of load application.

CEH309-3 Theorem of moments, M.I of single and built-up sections rectangular and circular used in Engineering applications.

CEH309-4 Engineering analysis of beams carrying transverse loading, constructing SFD and BMD for s/s and cantilever beams.

CEH309-5 Understanding pure and ordinary bending governing flexural behaviour.

CEH309-6 Understanding polar moment of inertia, torque and design of circular shafts and corner columns.

Competency, course outcomes and programme outcomes/programme specific outcomes (CP-CO-PO/PSO) matrix

i) Practical exercises

The following exercises shall be conducted as practical work as detailed in laboratory manual for Mechanics of Materials developed by the institute in practical sessions of batches of about 20- 22 students.

Sr No	Title Of Practical Exercise	Course Outcome
1	Study of Universal Testing machine and Compression testing machine	CEH309-1
2	Tension test on mild steel rod (Fe250)	CEH309 -1
3	Tension test on TOR steel or HYSD bar	CEH309 -2
4	Compression test on metals –Mild steel, Aluminum and timber	CEH309-2
5	Flexure test on metal	CEH309 -2
6	Shear test on metal	CEH309- 2
7	Impact test on metal	CEH309 -3
8	Rockwell Hardness test on metal	CEH309 -4
9	Shear force and BM diagram –problems on standard cases and, cantilever and s/s beams.	CEH309 -4
10	Brinell's Hardness Test	CEH309 -4
11	Flexure test on timber specimen	CEH309 -4
12	Torsion test on circular shaft	CEH309 -5

In the list, Expt. No.1 to7 exercises are compulsory and from 8 to 12, any three exercises shall be conducted. in all 10 experiments are mandatory.

ii) THEORY

SECTION – I

Sr. No	Topics/ Subtopics	Learning (Hours)	Classroom learning evaluation Marks
<p><i>Course Outcome CEH309/MEH305-1 Structural systems, actions and their types. Simple actions on a linear member causing deformations in the member.</i></p>			
1	<p>Engineering systems, actions and simple behaviour</p> <p>1.1 Engineering systems –buildings, machines, water tanks, chimney, bridges, retaining walls.</p> <p>1.2 Various actions and their effect – axial tension, axial compression, flexure, torsion</p> <p>1.3 Material behaviour –Elasticity, plasticity, ductility, malleability, toughness, hardness, brittleness-physical properties governing engineering design</p> <p>1.3 Force characteristics, definition, force and force system-principles and laws</p> <p>1.4 Simple stresses and strains- Hooke's law, linear stress, strain.</p>	8	12

	1.5 Compound bar subjected to axial loading.		
<i>Course Outcome CEH309/MEH305-2 Elastic constants and their relation, strain energy for various forms of load application.</i>			
2	Elastic Constants and strain energy 2.1 Elastic constants E, G, μ and K definition, sketches and explanation. 2.2, Relation among elastic constants. 2.3 Forms of loading and instantaneous stress produced in each form of loading –gradual, sudden and impact. 2.4 Composite section carrying load and its analysis 2.5 Temperature stress and its computation in a rigid member having single material and made of two materials.	12	12
<i>Course Outcome MEH305-3 Theorem of moments, M.I of single and built-up sections rectangular and circular used in Engineering applications.</i>			
3	M.I. and its Engineering applications 3.1 M. I definition; Area and mass moment of inertia. 3.2 Theorem on Moments –parallel and perpendicular axes theorems. 3.3 M. I of standard sections-square, rectangular, triangular, circle and rhombus 3.4 M. I. of built up sections – I, T and L sections.	10	10

SECTION – II

Sr. No	Topics/ Subtopics	Learning (Hours)	Classroom learning evaluation Marks
<i>Course Outcome CEH309 -4 Engineering analysis of beams carrying transverse loading, constructing SFD and BMD for s/s and cantilever beams.</i>			
4	Shear force and Bending Moment Diagrams 4.1 Definition of shear force and BM at any section of a beam carrying transverse loading 4.2 Sign convention and construction of SFD and BMD for standard cases of loading on cantilevers and s/s beams (point load and UDL only). 4.3 Plotting SFD and BMD for s/s beams with overhangs carrying point load, UDL and couple.	12 hours	14 marks
<i>Course Outcome CEH309 -5 Understanding pure and ordinary bending governing flexural behaviour leading to design of beams.</i>			
5	Bending theory of beams 5.1 Theory of Pure bending 5.2 Theory of ordinary bending 5.3. Flexure formula and assumptions made in its derivation. 5.4 Bending stress, section modulus and design of rectangular beams. 5.5 Shearing stress across any section –shear stress distribution and meaning of each term involved.	10 hours	12 marks

	4.15.6. Shearing stress across a rectangular and a circular section.		
<i>Course Outcome CEH309-6 Understanding polar moment of inertia, torque and design of circular shafts and corner columns.</i>			
6	Torsion on Circular shafts 6.1 Polar MI for circular section 6.2 Torsion formula for twist in a circular shaft subjected to pure torque. 6.3 Torsional section modulus and design of circular shaft from strength criteria and twist criteria 6.4 Power transmitted by circular shaft.	8 hours	10 marks
Total		30	70
Summative assessment – Theory paper should be such that total marks of questions on each topic are one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.			

**** No questions will be asked on IKS learning subtopics in any question papers.**

FA-TH represents average of two class tests of 30 marks each conducted during the semester.

1. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
2. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.

3. Notional Learning hours for the semester are (CL+LL+TL+SL) hrs.* 15 Weeks
4. 1(one) credit is equivalent to 30 Notional hrs.
5. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities.

D.RATIONALE:

Concrete is the most versatile invention of the modern infrastructure engineering and is undergoing phenomenal progress in attaining desired engineering qualities. The modern day building technologies are primarily due to concrete technology. The civil engineers have major role in construction industry and the job profile involves exposure to concrete technology. The course aims at understanding the properties ingredients, proportioning and evaluation of desired properties including strength in fresh and hardened state of its existence in desired shape and size. The special concretes, form work, admixtures and concept of mix design and ready mix concrete are all dealt with to expose the students to the state of art construction methods.

Competency identified for the course:

The MPEC 2023 curriculum design based on MSBTE K curriculum guideline and NEP2020 policy incorporates all self and tutorial such as notional hours and non-national hours of learning. Indian knowledge system is also intended to explore through additional hours of learning during the semester. Subject is allotted 3 hrs. of class room learning and 2hrs of practical (lab) and 2 hrs. of self-learning. All these hrs. Of learnings including IKS learning are aimed at achieving following skills sets.

E. COURSE OUTCOMES (COs):

CEH401-1 Concrete composition and Production

CEH401-2 Concrete ingredients properties and determination

CEH401-3 Fresh concrete and properties

CEH401-4 Concrete mix design methods, form work and IS code procedure

CEH401-5 Tests on hardened concrete and strength factors

CEH401-6. Special Concretes and execution

Competency, course outcomes and programme outcomes/programme specific outcomes

LABORATORY WORK

Laboratory manual on Concrete Technology developed by the department shall be used.(perform any 10 experiments and B,C and D compulsory

Sr. No	Laboratory Experience	Skills / Competencies to be developed	
A	Any ten experiments		
1	Determination of fineness of cement	<p>Follow IS code procedures for tests.</p> <p>Studying equipment.</p> <p>Understanding test procedure</p> <p>Accuracy in taking observation.</p> <p>Reinforcement of concepts.</p> <p>Performing calculation and plotting</p> <p>Graphs from observation. Interpreting test results.</p> <p>Classifying materials as per IS standards.</p>	CEH401-2
2	Determination of consistency of cement		CEH401-2
3	Determination of initial and final setting time of cement		CEH401-2
4	Determination of the Soundness of cement		CEH401-2
5	Determination of 3, 7- and 28-days strength of cement		CEH401-2
6	Determination of silt content of fine aggregate		CEH401-2
7	Determination of bulking of fine aggregate		CEH401-2
8	Determination of specific gravity of coarse aggregate and fine aggregate		CEH401-2
9	Determination of grading of aggregate by sieving		CEH401-2
10	Determination of bulk density of fine aggregate and coarse aggregate		CEH401-2
11	Determination of aggregate crushing value		CEH401-2
12	Determination of aggregate impact value		CEH401-2
13	Determination of workability of concrete by slump cone and/or compaction factor method		CEH401-3
14	Determination of compressive strength of concrete cubes (if available ready cubes)		CEH401-5
B	Determination of compressive strength of concrete with any one of the NDT equipment	Finding quality of material.	CEH401-5
C	Write IS code procedure for mix design (With help of a video) of any one of the Grade of concrete for data given by the teacher	Design Procedure.	CEH401-4
D	Field visit to construction site of RCC to study various concreting activities Field visit to a ready-mix concreting plant		ALL COs

I) THEORY:

Section I

Sr no	Course content	Lecture hours (class room learning)	Theory Assessment marks
CO: CEH-1 Concrete composition and Production			
1	<p>Introduction to Concrete and its production</p> <p>1.1 Introduction to concrete Definition of Concrete. Ingredients of Concrete, Importance of concrete as construction material. Historical background. Process diagram of concrete. Role of each ingredient. Admixtures: Definition and function. Accelerator, Retarder, Plasticizer, Super plasticizer. Pozzolan fly ash, silica fume, slag, metakaolin.</p> <p>1.2 Production of Concrete Process diagram of manufacture of concrete, Batching of ingredients of concrete. Mixing of concrete and concrete mixers, Transportation of concrete: Modes &precautions , Placing of concrete& Precautions, Compaction of concrete: Definition, importance &methods, Finishingof concretesurface, Curing of concrete: Definition, importance and methods</p>	10hours	12 marks
CO: CEH-2 Concrete ingredients properties and determination			
2	<p>2.1 Properties and testing of cement Definition of cement. Chemical composition of Portland cement,Raw material and manufacturing process of Portland cement,Hydration of cement. Setting and Hardening of cement.,Physical properties of cement & standard specifications for Ordinary Portland Cement. Grades of OPC. Types of cement and their applications: Rapid hardening cement, low heat cement, Portland pozzolana cement, sulphate resisting cement, blast furnace slag cement, white cement. ,Storage of cement</p> <p>2.2 Properties and testing of aggregates Definition of coarse and fine aggregate. Classification of aggregate, Properties of coarse and fine aggregates: Size, Shape, Texture, Strength, Specific gravity, Bulk Density, Water absorption, Bulking of sand, Soundness. Determination of aggregate grading, Sieve analysis, Fineness modulus, Crushing value, Impact Value, Abrasion Value, Flakiness index, Elongation Index Effect of aggregate properties on strength of concrete.</p>	12 hours	14marks
CO: CEH-3 Fresh concrete and properties			

3	Fresh concrete and its properties 3.1 Definition of workability and affecting factors. Measurement of workability. Slump cone test, Compaction factor Test. Range of values of workability 3.2 Segregation : Definition, effects and precautions Bleeding : Definition, effects and precautions	08 hours	08 marks
Total		30	34

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CEH-4 : Concrete mix design methods, form work and IS code procedure			
4	Concrete mix design methods and formwork 4.1 Introduction to Mix design Definition and importance of mix design, Methods used for mix design (only list), Procedure of mix design by IS code method 4.2 Formwork Definition and purpose of formwork. Requirement of good formwork Materials used for formwork, Forms for beam, slab, column. Stripping of forms	10 hours	14 marks
CO: CEH-5 Tests on hardened concrete and strength factors			
5	Explain, test and interpret properties of hardened concrete and quality control 5.1 Properties of Hardened Concrete Compressive strength of concrete. Factors affecting strength Characteristic strength. Grades of concrete Water-cement ratio law. Significance. Durability and impermeability of concrete 5.2 Inspection, testing and quality control Aim of inspection and testing of fresh concrete. Concrete cube testing , Non-destructive testing of concrete : Definition and methods. Rebound Hammer test. Ultrasonic pulse velocity test . Core test method, Factors causing variation in the quality of concrete. Quality control, professional ethics and environmental issues	12 hours	14 marks

CO: CEH-6 Special Concretes and execution

6	Special Concretes and execution 6.1 Concreting under special circumstances Hot weather concreting: Field situations. Effects of hot weather, precautions Cold weather concreting: Field situations. Effect of cold weather, precautions Underwater concreting: Field situations. Tremie method, Deep dump bucket method, grouting method, pumping, using bags. Precautions 6.2 Special concretes Ready Mixed Concrete (RMC): Definition, advantages and precautions Mass concrete: Definition. Field situations. Precautions. Fiber Reinforced Concrete: Definition. Properties, Field applications. Polymerconcrete: Definition. types. Properties. Applications. Light weight concrete: Definition. Applications. Ferro-cement: Definition. Materials used. Applications. Shotcreting or Guniting : Definition and applications	08 hours	08 marks
	Total	30	36

G. SLA (Self Learning Assessment)**Self learning/ Micro Projects: (One project to the group of 4/5 students)**

1. Market survey for study of cement/ aggregates / admixtures / additives available in market and prepare a report.
2. Field visit to quarry and crusher for manufacture of coarse aggregate (stone metal) and prepare a report.
3. Field visit to observe formwork, scaffoldings and prepare a report.
4. Visit to site for quality control of material used for construction and prepare a report.
5. Collection of information for concreting methods, new trends in the field and prepare a report.
6. Demonstration through video film for different methods of concrete.
7. Collection of photographs from site for different operations and prepare chart/report.
8. Collection of data/stipulations from site for the mix design.
9. Collection of material testing reports from construction site.
10. Prepare a chart of IS code for testing of materials.
11. Prepare a chart of IS code specifications for apparatus / machines used for concrete practicals.
12. software-based exercises.

INDUSTRIAL EXPOSURE

SN	Mode of Exposure	Topic
1.	Field examples of course application	Topics of theory syllabus
2.	Market survey	Admixtures available in market
3.	Field visits	Concreting procedure, RMC plant etc.

The assessment scheme for practicals and self learning as per MPEC2023 norms .

H: Specification table for setting question paper for semester end theory examination

Topic No.	Name of topic	Distribution of marks (level wise)			Total Marks
		Remember	Understand	Apply	
1.	Introduction to Concrete and Production of Concrete	02	04	06	12
2.	Properties and testing of cement and aggregates	02	06	06	14
3.	Properties of fresh concrete	02	02	04	08

	Total	12	26	32	70

I:-Assessment Criteria

i) Formative Assessment of Practical: -

Every practical shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical:

End exam practical assignment shall be assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Attendance at regular practical	05
2	Preparedness for practical	05
3	Neat & complete Diagram.	05
4	Observations & handling of instrument.	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

iii) Assessment of SLA: -

Every Self-learning assignment/microproject shall be assessed for 25 marks as per Following criteria

Sr.no	Criteria	Marks allotted
1	Attendance	05
2	Preparedness and workmanship	05
3	Presentation (neat figures/ diagrams/ tables/ graphs etc.)	05
4	Conclusion / Inference	05
5	Oral Based on microproject/ assignment/ activity	05
TOTAL		25

J. Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K. Teaching and Learning resources:

- | | |
|----------------------|---|
| 1. Chalk board | 2.LCD presentations |
| 3.Field visit to RMC | 4. Demonstrative charts |
| 5. Question Bank | 6. Digital learning resources -NPTEL,Swayam |

1. FA-TH represents average of two class tests of 30 marks each conducted during the semester.
2. If candidate is not securing minimum passing marks in FA-PR of any course then the candidate shall be declared as "Detained" in that semester.
3. If candidate is not securing minimum passing marks in SLA of any course then the candidate shall be declared as fail and will have to repeat and resubmit SLA work.
4. Notional Learning hours for the semester are (CL+LL+TL+SL)hrs.* 15 Weeks
5. 1(one) credit is equivalent to 30 Notional hrs.
6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Civil Engineering sector has completed number of projects with conventional techniques to meet the needs of the society. But, in recent two decades, various new innovative techniques are being used worldwide, which our practicing engineers, are also partially using to achieve their goals. The emerging trends in Civil Engineering help to complete the undertaken projects within prescribed schedule, saves the natural resources and to make the projects eco- friendly. This subject helps to make awareness about soft computing techniques, new materials, advanced machineries, sustainable resource management and advancement in Civil Engineering.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

The aim of this course is to help the student to attain the following industry identified outcome through various learning experiences:

- Recommend emerging techniques in civil engineering for the construction field.

COURSE LEVEL LEARNING OUTCOMES (COS)

CEH402- 1 Reveal different applications of software's for planning, designing and execution of projects

CEH402 - 2 Suggest the advanced materials as per site condition.

CEH402 - 3 Recommend the suitable tools and equipment's for the given situation.

CEH402 - 4 Suggest the advanced resource management techniques for the given project.

CEH402 - 5 Use the feasible advance techniques for various civil engineering projects

Competency, course outcomes and programme outcomes/programme specific outcomes

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO:CEH000-1: Reveal different applications of software's for planning, designing and execution of projects			
1	Soft Computing Techniques 1.1 Introduction of soft computing techniques and its types, Merits and demerits of soft computing technique, Graphical User Interface Software (GUI). 1.2 Introduction, salient features and applications of software's - REVIT, ETAB, 3D Architect Home, Build-Master, HEC-RAS, STRAP, WaterGEMS, Tekla, ArcGIS, QuikGrid, STAAO.Pro, SAFE, RISA-Connection, Civil 3D, Site 3D, SkyCiv Structural 3D, SAP 2000, MIDAS, LUSAS,	11	12

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
	BricsCAD, Estimate Master, ProEst, WinEst, Clear Estimate, Procore, Buildertrend, Building Management System (BMS), Plant Design and Management System (PDMS), Building Information Modeling (BIM), Primavera Pro, Microsoft Project (MSP)		
CO: CEH000-2: Suggest the advanced materials as per site condition.			
2	<p>Recent Construction Materilas</p> <p>2.1 Building Materials- Artificial sand, Sensi tile, carbon fibre, Bricks made up of cigarette butts, 3D printed bricks, Translucent wood, laminated timber, 3D Tiles</p> <p>2.2 Road Materials- Geo-synthetics, Noise-reducing asphalt, Porous Pavement, Plastic Roads, solar roads, Anti Icing Roads, Piezoelectric roads</p> <p>2.3 Concrete Materials- Portland Pozzolana Cement, Portland Slag Cement, New admixtures - Masterglanium, Polycarboxylic Ether, Self-Healing Concrete, Fibre- Reinforced Concrete, High Strength concrete, High Performance Concrete, Nano concrete, Light transmitting concrete.</p> <p>2.4 Sustainable Materials- Ground Granulated Glass Blast-furnace Slag (GGBS) concrete, Aero-gel insulation, Cooling bricks, Green concrete, Timbercrete, Ferrock</p>	12	14
CO: CEH000-3: Recommend the suitable tools and equipment's for the given situation			
3	<p>Latest Tools and Equipments</p> <p>3.1 Survey equipment- LiDAR, Scan Station, Global Positioning System (GPS), Geographical Information System (GIS), Photogrammetry, Drones, Direct Reading Grade Rods, 3D Laser scanning, laser level</p> <p>3.2 Construction Equipment- Earth moving equipment- Skid and crawler loaders, trenchers, scrapers, wheeled loading shovels, advanced plastering machine, Bridge launcher</p> <p>3.3 Material handling equipment- Cranes, conveyors, hoists, forklifts, mobile concrete mixer, paver, road header, tunnel boring machine.</p>	12	14

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
CO: CEH000 -4: Suggest the advanced resource management techniques for the given project			
4	<p style="text-align: center;">Sustainable Resource Management</p> <p>4.1 Water resource management- Principles and techniques</p> <p>4.2 4R's in waste management-Reduce, Reuse, Recycle and Recover, Concept of Zero Waste</p> <p>4.3 Reuse of waste in construction-Fly Ash, Slag and Plastic</p> <p>4.4 Renewable energy sources-solar energy, biomass, wind energy, ocean wave energy, Geo thermal Energy and hybrid power system.</p> <p>4.5 Energy Audit-Necessity and methods.</p> <p>4.6 Natural disaster management- Flood,Earthquake, Tsunami, Volcanic Eruption, Hurricanes, Landslides.</p> <p>4.7 Site Safety-necessity, principles, tools, techniques, laws rules and regulations.</p>	11	12
CO:CEH00-5: Use the feasible advance techniques for various civil engineering projects			
5	<p style="text-align: center;">Advancement in Construction</p> <p>5.1 Zero energy building, Green building, Mass housing- precast housing, prefab homes, pre-engineering building, Solar Paints, Building Integrated Photovoltaic (BIPV), Earthquake Resisting Controls-Isolation and Dissipation</p> <p>5.2. Road construction techniques- 3D Printing, Road Printer, smart roads</p> <p>5.3 Coastal construction techniques- Sound Proofing walls, water resistant roofs, high performance doors and windows, air and moisture barriers</p> <p>5.4 Ground improvement techniques- Advanced piling techniques - Stone Column, Vibro Flootation, Micro Piles, Soil Nailing, Vertical drains- Sand Drains, Pre-Fabricated Vertical Drains,Thermal Methods- soil heating and soil freezing.</p>	14	18

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Activities Under SLA

- a. Visit the Appropriate website and observe the relevant videos and other related learning material.
- b. Group discussion on sustainable resource management.

c. Undertake small micro projects.

A suggestive list of micro project is given here. Similar micro-projects could be added by the concerned faculty.

- a. Prepare chart showing software and their applications.
- b. Prepare a model of any one construction material or machinery used in recent days.
- c. Prepare a report on advanced machinery and materials.
- d. Elaborate the process of mass housing, pre-engineered building etc.
- e. Make a poster showing site safety and its awareness.
- f. Prepare the charts showing different types of safety rules and regulations of site.

I :-Assessment Criteria

i) Formative Assessment of Practical :-Not Applicable

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05
	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical : Not Applicable

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

6. * Self learning hours shall not be reflected in the Time Table.

* Self learning includes micro project / assignment / other activities. (Provide list of all assignments here in tabular format At least 6 to 8 assignments to be given)

D. i) RATIONALE:-

Calculation of quantities and cost estimates for civil engineering works is one of the major functions for the civil engineer and he has to acquire the knowledge of calculating the quantities of each item of work from available drawings & to prepare the estimate of the work which is necessary for allocation of funds for the required purpose and further continue to execute the work as per the drawings and estimates. The ability of recording measurements for various items of work from drawings, finding rates for different items using schedule of rates and preparing the abstract constitutes the important step in the preparation of estimate.

This subject also has a strong linkage with proper supervision of construction work mainly because of its relation to work specifications and planning and execution of site activities like stacking of materials, ordering of equipment and materials, arranging for skilled and semiskilled labourers needed on site, preparing bills for payment of work already completed etc. For proper competence in this subject, one has to be skilled in reading and interpretation of drawings and also taking measurements of completed items. The subject of Estimating and costing is therefore very important as far as its strong relevance to the actual job of a site supervisor/engineer is concerned.

ii) INDUSTRY / EMPLOYER EXPECTED OUTCOME

Estimate for the given construction materials, labor, and resources required for construction projects accurately.

E. COURSE LEVEL LEARNING OUTCOMES (COS)

CEH403-1 Understand P.W.D. procedures & mode of measurements as per IS-1200

Understand the methods and procedures of approximate estimates.

CEH403 -2 Understand the methods and procedures of detailed estimates.

CEH403 -3 Calculate quantities of various items of buildings/other structures and prepare the Abstract.

CEH403 -4 Draft detailed specifications for the items of civil engineering works.

CEH403 -5 Prepare Rate Analysis for the items of civil engineering works.

CEH403 -6 Calculate quantities of earthwork and prepare detailed estimate of road.

Competency, course outcomes and programme outcomes/programme specific outcomes

CEH403-6. Calculate quantities of earthwork and prepare detailed estimate of road	3	3	2	2	2	2	1	2	1	1

F. CONTENT:-

I) Practical exercises

The following practical exercises shall be conducted in the in practical sessions of batches of about 20- 22 students:

Sr. no	Laboratory experiences	CO
1	Preparing checklist of Items of following civil engineering works (Any three). <ul style="list-style-type: none"> • Load bearing structure • Framed structure • Water bound Macadam road • Septic tank 	CEH403-1
2	Analysis of SSR for any five Different item of construction.	CEH403-1
3	Preparations of approximate estimate by	CEH403-1

Sr. no	Laboratory experiences	CO
	<ul style="list-style-type: none"> • Plinth Area Method • service unit method • Typical bay method 	
4	Calculation of the quantities for Excavation, PCC, UCR, DPC of 1BHK load bearing residential building using long wall short wall method.	CEH403-3
5	Calculation of the quantities for Excavation, PCC ,UCR,DPC of 1BHK load bearing residential building using Center line method	CEH403-3
6	Preparation of detailed estimate with abstract for RCC (G+1) residential framed structure.	CEH403-3
7	Writing the rules of deduction for below mentioned items of work as per IS: 1200 <ul style="list-style-type: none"> • Brick/ Stone Masonry • Plastering/ Pointing 	CEH403-1
8	Writing detailed specification for following item of work for Building construction <ul style="list-style-type: none"> • M20 Concrete • Brick Masonry • Plastering 	CEH403-4
9	Rate Analysis for the following <ul style="list-style-type: none"> • Building work - any Three items • Roads work - any one item 	CEH403-5
10	Taking of quantities of following items for small R.C.C. Hall <ul style="list-style-type: none"> • Concreting for Footing, Column, Beam, Slab • Reinforcement for above items by preparing bar bending schedule 	CEH403-3
11	Detailed Estimate of any two of the following <ul style="list-style-type: none"> • Septic tank. • Community well. • Water-supply from overhead tank to bath, W.C., basin, sink, geyser. • Estimate of Plumbing work from W.C., Bath connection to Public Sewer/ Septic Tank 	CEH403-3
12	Preparation of detailed estimate with abstract for RCC (G+1) residential framed structure using relevant available open source Software. (Optional)	CEH403-3
13	Determination of the earth quantity in embankment and cutting using Trapezoidal method.	CEH403-6
14	Determination of the earth quantity in embankment and in cutting using mid sectional area/ mean area method.	CEH403-6

II) Theory

Section I

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
COURSE OUTCOME CEH403-1. Understand P.W.D. procedures and mode of measurements as per IS-1200 Understand the methods and procedures of approximate estimates.			
1	<p>Introduction</p> <p>1.1 Meaning of the terms estimating and costing, Roles and responsibility of Estimator</p> <p>1.2 Purpose of estimating and costing</p> <p>1.3 Meaning of check list. Purpose of check list and Check list of items of civil engineering structures</p> <p>1.4 Modes of measurements of items of work as per P.W.D and IS: 1200. Desired accuracy in taking measurements.</p> <p>1.5 SSR: Meaning, Purpose,</p> <p>Approximate Estimates</p> <p>1.6 Definition and purpose of approximate estimates</p> <p>1.7 Methods of approximate estimates used for buildings, Plinth area method, Cubical content method, Approximate quantity method, Service unit method and typical bay method. (Numerical on any method)</p> <p>1.8 Methods of approximate estimates used for Roads, Bridges/culverts, Railways, Water Supply and Irrigation projects.</p>	11	10
COURSE OUTCOME CEH403-2. Understand the methods and procedures of detailed estimates.			
2	<p>Detailed Estimates</p> <p>2.1 Detailed Estimate: Definition and Purpose, Data required for detailed estimate,</p> <p>2.2 Types and Uses of detailed estimates, Revised estimate, Supplementary estimate, Maintenance estimate, Repair and Special repair estimates.</p> <p>2.3 Factors to be considered during preparation of detailed estimate.</p> <p>2.4 Provisions in detailed estimate for contingencies, work charged establishment, Provisional items, Provisional sum, Provision for water supply and sanitary charges, Electrification charges, Centage charges, Tools and Plants,</p>	06	07

	Prime Cost and Daywork.		
3.1 COURSE OUTCOME CEH403-3. Calculate quantities of various items of buildings and prepare abstract. , water supply and sanitary Charges and electrification charges.			
3	Preparing Detailed Estimate of Building 3.1 Unit quantity method and total quantity method 3.2 Steps in preparing detailed estimate- Tacking out quantities, Abstracting. Measurement sheet, Abstract sheet and Face sheet 3.3 Procedure for taking out quantities for building work items such as Earth work in foundation , Foundation concrete, Stone/ Brick masonry work in foundation, plinth and superstructure by Long wall and short wall method and Centre line method 3.4 Procedure of detailed estimate for One room, Two room and complete 1B.H.K. load bearing structure Procedure for R.C.C work by using 3.6 Thumb rule for reinforcement quantity calculation for Slab, Beam, Column, Footing etc. 3.7 Preparing Bar bending Schedule for Lintel, Beam, Slab, Column and Footing 3.8 Detailed estimate of small R.C.C. structure such as Hall with column, footing, beams and slab including preparing schedule of reinforcement	13	18
	Total	30	35
Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.			

Section –II

Sr. no.	Topics/Subtopics	Learning (Hours)	Classroom learning evaluation Marks
COURSE OUTCOME CEH403-4. Draft detailed specifications for the items of civil engineering works.			
4	Specifications 4.1 Definition of specification and its necessity Purpose and legal aspect of specifications. 4.2 Types of specifications – General, Detailed/standard specifications. 4.3 Points to be considered in framing the specification of an item. 4.4 Drafting detailed specification for common items of civil engineering works such as P.C.C. ,R.C.C., Brick, Stone Masonry, Door, windows, specifications for plumbing, and Plastering 4.5 Standard specification book	07	8

COURSE OUTCOME CEH403-5. Prepare Rate Analysis for the items of civil engineering works.			
5	Rate Analysis 5.1 Definition, Necessity of Rate Analysis. 5.2 Factors affecting Rate Analysis 5.3 Data required for rate analysis 5.4 Market rates for materials and labours 5.5 Task work- definition and factors affecting the task work, Task works for various items of work 5.6 Transportation of construction materials – Capacities of Truck, Dumpers and carts and their costs. 5.7 Labour – Categories of labours 5.8 Overheads- General and job overheads, Contractors profit and water charges. 5.9 Calculation of quantities of materials required for various items of work such as B.B. Masonry, Half brick work, Stone masonry, Cement concrete, P.C.C. Flooring, Vitrified Tiled flooring, Cement plaster 5.10 Analysis of rates of civil engineering items such as P.C.C., R.C.C., Brick masonry in cement mortar in superstructure, U.C.R. masonry in cement mortar, P.C.C flooring and Ceramic flooring	14	16
COURSE OUTCOME CEH403-6. Calculate quantities of earthwork and prepare detailed estimate of road.			
6	Calculation of Quantities of Earth work for different civil engineering works 6.1 Methods of Mean area, <i>Mid</i> sectional area, Trapezoidal and Prismoidal formula (No derivations) for calculation of earth work. 6.2 Earth work calculation for Roads, Dam, Canals, Railway Embankment	09	11
	Total	32	35
Semester end exam question paper should be such that total marks of questions on each topic is one and half times the marks allotted above but the candidates are able to attempt questions of the above allotted marks only.			

**** No questions will be asked on IKS learning subtopics in any question papers.**

G : List of Assignments under SLA

- Enlist the minimum ten salient provisions made in IS:1200 with special reference to load bearing structure.
- Enlist the minimum ten salient provisions made in IS:1200 with special reference to Framed structure.
- Prepare approximate estimate of minimum one civil engineering project..
- Prepare approximate estimate of minimum one residential building.
- Prepare detailed estimate of minimum one load bearing structure using available open source software.

- Collect the rebar reinforcement drawings of minimum one building and interpret the drawings with report.
- Prepare rate analysis of Painting work for OBD, Plastic emulsion, Oil paint, luster paint having minimum 150 m2 area.

Note :

Above is just a suggestive list of microprojects and assignments; faculty must prepare their own bank of microprojects, assignments, and activities in a similar way.

The faculty must allocate judicious mix of tasks, considering the weaknesses and / strengths of the student in acquiring the desired skills.

If a microproject is assigned, it is expected to be completed as a group activity. SLA marks shall be awarded as per the continuous assessment record.

***If the course does not have associated SLA component, above suggestive listings is applicable to Tutorials and maybe considered for FA-PR evaluations.

H : Specification table for setting question paper for semester end theory examination

Section /Topic No.	Name of topic	Distribution of marks (level-wise)			Total marks	CO
		Remember	Understand	Apply		
1/1	Introduction Approximate Estimates	04	04	02	10	CO-1
1/2	Detailed Estimates	02	02	03	07	CO-2
1/3	Preparing Detailed Estimates of Buildings	04	04	10	18	CO-3
2/4	Specifications	02	02	04	08	CO-4
2/5	Rate Analysis	04	04	08	16	CO-5
2/6	Calculation of Quantities of work for different civil engineering works	02	02	07	11	CO-6
	TOTAL	18	18	34	70	

I :-Assessment Criteria

i) Formative Assessment of Practical :-

Every assignment shall be assessed for 25 marks as per following criteria:

Domain	Particulars	Marks out of 25
Cognitive	Understanding	05
	Application	05
Psychomotor	Operating Skills	05

	Drawing / drafting skills	05
Affective	Attendance/Discipline and punctuality	05
TOTAL		25

ii) Summative Assessment of Practical :

At the time of Practical Examination assessed for 25 marks as per following criteria:

Sr. no	Criteria	Marks allotted
1	Knowledge about the course	05
2	Preparedness for practical /Oral	05
3	Neat & complete Diagram/write up	05
4	Observations/Handling of instrument/ Communication/Presentation	05
5	Oral Based on Lab work and completion of task	05
TOTAL		25

J) Instructional Methods:

1. Lectures cum Demonstrations,
2. Class room practices.
3. Use of projector and soft material for demonstration
- 4.

K) Teaching and Learning resources:

Chalk board, LCD presentations, Demonstrative kits, Demonstrative charts.

L) Reference Books:

Sr.No	Author	Title	Publisher with ISBN Number
